Two corporate opponents: One, Steve Dern, becomes CEO; the other, Geoff Mann, ends up on the street, where his taste for extreme sports and a chance encounter with a desperate young prostitute show him that murder delivers the best rush of all. Then, Geoff thrusts Steve into a dangerous game with Steve's wife, Lisa, as the prize. To save her, Steve must find a way to make Geoff feel pain. To experience fear. **Hooked on Adrenaline** Bart Collins,2006-10-06 Hooked on Adrenaline, is a work of fiction based on real life experiences. It is an adventure/romance about a young man and his journey through life always seeking adventure and finding the love of his life on the way. Packed with gems of wisdom it makes Brad wise far beyond his years but hopefully helping the younger audience through some of the speed bumps in life. Right from the start, Hooked on Adrenalin pulls the reader into a late 50s Key West and the fast-paced exciting life of young hero, Brad Parker, a recent underage returnee from the battlefields of Korea. Within the first few pages, Brad meets his soul mate and life mate, Anne, then is unexpectedly sucked into an underwater cavern during an underwater construction project. There he finds a World War II Japanese mini-sub and the mystery surrounding it. Caches of cash, drug runners, kidnappings, and moonshiners all fill the pages of the book with excitement, mystery, and a bond so strong between Brad and Anne that nothing can break. The flavor of Old Key West is everywhere in the book. As Brad and Anne scuba dive, build a business, and solve mysteries, the reader will find themselves on the edge of their chair, unable to stop reading. Moreover, although at the end of the book they motor off into the sunset looking for new adventure, storm clouds are brewing on the horizon as the family of the drug runners head for Key West to start the business again and seek revenge.

**Adrenaline and the Inner World** David S. Goldstein,2006-03-15 This accessible work is the first in more than seventy-five years to discuss the many roles of adrenaline in regulating the inner world of the body. David S. Goldstein, an international authority and award-winning teacher, introduces new concepts concerning the nature of stress and distress across the body's regulatory systems. Discussing how the body's stress systems are coordinated, and how stress, by means of adrenaline, may affect the development, manifestations, and outcomes of chronic diseases, Goldstein challenges researchers and clinicians to use scientific integrative medicine to develop new ways to treat, prevent, and palliate disease. Goldstein explains why a former attorney general with Parkinson disease has a tendency to faint, why young astronauts in excellent physical shape cannot stand up when reexposed to Earth's gravity, why professional football players can collapse and die of heat shock during summer training camp, and why baseball players spit so much. Adrenaline and the Inner World is designed to supplement academic coursework in psychology, psychiatry, endocrinology, cardiology, complementary and alternative medicine, physiology, and biochemistry. It includes an extensive glossary.

**Buzz!** Kenneth Carter,2019-12-31 Most of us crave new experiences and sensations. Whether it's our attraction to that new burger place or the latest gadget, newness tugs at us. But what about those who can't seem to get enough? They jump out of planes, climb skyscrapers, and will eat

anything (even poisonous pufferfish) ... Prompting others to ask 'what's wrong' with them. These are high sensation-seekers and they crave intense experiences, despite physical, or social risk. They don't have a death wish, but seemingly a need for an adrenaline rush, no matter what. Buzz! describes the world of the high sensation-seeking personality in a way that we can all understand. It explores the lifestyle, psychology, and neuroscience behind adrenaline junkies and daredevils. This tendency, or compulsion, has a role in our culture. But where is the line between healthy and unhealthy thrill-seeking? The minds of these adventurers are explained page by page.

**Eat, Chew, Live** John Poothullil, 2015-03-16 Diabetes is among the fastest growing diseases in the world. In the U.S. 1 in 3 adults over age 20 has high blood sugar and 1 in 4 adults over age 65 is fully diabetic. Yet, nearly every single person could avoid high blood and diabetes if they understood its real causes and Eat, Chew, Live provides exactly the new science & powerful inspiration to help people prevent this serious disease from altering their lives "without drugs. Eat, Chew, Live offers a revolutionary new science-based explanation of what really happens in the body to cause high blood sugar. While traditional medicine blames the condition on insulin resistance, Dr. Poothullil disagrees, offering systematic proof of a far better biological explanation for it. According to him, diabetes is not a hormonal disease; in fact, he demonstrates that insulin resistance is not even logical. Instead, high blood sugar and diabetes are the result of over consumption, especially of grain-based carbohydrates that cause a normal bodily metabolism--cells burning fatty acids rather than glucose--to go haywire. When people understand this insight, everything about preventing high blood sugar and diabetes becomes clear. Eat, Chew, Live goes on to present three other revolutionary ideas to help people get in tune with their body's need for nutrition, their hunger and satisfaction signals, and the causes of their overeating. Dr. Poothullil's offers insightful and persuasive advice about why avoiding complex carbohydrates even whole grain and gluten free -- is the key to losing weight and preventing high blood sugar. He goes on to teach readers how to eat mindfully, chewing fully to enjoy and savor food. Many readers report that the book helped them lose weight, get in touch with their body, and reduce their diabetes medications significantly. Eat, Chew, Live is unlike other books on diabetes, as nearly every one accepts insulin resistance as the cause. Dr. Poothullil's theory is a medically sound new approach to explaining high blood sugar and the implications are enormous for the entire medical approach to treating high blood sugar with medications rather than teaching people how to eat what they enjoy to lower blood sugar. Eat, Chew, Live may be one of the most important health books of the decade, as its 4 revolutionary ideas will save many lives.
