This tiered education method will assist learners in working though essential team building skills, increasing their knowledge base and finally having concrete items in which to further their professional skills. Each chapter starts with a learning objective and presents the simulation case before launching into the case progression, detailing how the simulated patient's vital signs, physical exam findings, and clinical picture change over the course of the simulation. They are concluded with a master checklist of items the learner should accomplish during the course of the simulation along with a section summary and important teaching points.
