Great Meat Dave Kelly,2013-10-01 Recipes are only as good as their ingredients, especially when it comes to meat. That's why having a good understanding of how to select, cut, and cook meat makes all of the difference in the final taste. Written by Ruby & White, one of Britain's leading butcher shops, Great Meat debunks myths and misinformation around selecting and cooking meat and offers up valuable information to meat lovers and serious home cooks who want to learn new and different preparation techniques. This go-to guide to meat takes you through the technical aspects of meat, while providing recipes along the way that will help you try out your newfound techniques. Learn how to identify and use different cuts, why and when free-range and grass-fed is better, the basics of home butchery, and much more. Great Meat is filled with photos and diagrams showing where different cuts of meat come from, their corresponding preparation techniques, and recipes from the leading chefs and restaurants in Britain.

Engaging Learners with Semiotics Ruth Gannon-Cook,Kathryn Ley,2020-11-09 This educators' introduction to semiotics describes a communications phenomenon that has permeated and influenced learner attitudes, behaviors and cognition in any learning environment but especially formal mediated learning environments. Relevant semiotic theory is meaningfully integrated into each chapter.

Reading Programs for Young Adults Martha Seif Simpson,2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade, but there is little available to young adults. For them, libraries become a place for work—the place to research an assignment or find a book for a report—but the thought of the library as a place for enjoyment is lost. So how do librarians recapture the interest of teenagers? This just might be the answer. Here you will find theme-based units (such as Cartoon Cavalcade, Log On at the Library, Go in Style, Cruising the Mall, Space Shots, Teens on TV, and 44 others) that are designed for young adults. Each includes a display idea, suggestions for local sponsorship of prizes, a program game to encourage participation, 10 theme-related activities, curriculum tie-in activities, sample questions for use in trivia games or scavenger hunts, ideas for activity sheets, a bibliography of related works, and a list of theme-related films. The units are highly flexible, allowing any public or school library to adapt them to their particular needs.

Dinner: A Love Story Jenny Rosenstrach,2012-06-19 Inspired by her beloved blog, dinneralovestory.com, Jenny Rosenstrach's Dinner: A Love Story is many wonderful things: a memoir, a love story, a practical how-to guide for strengthening family bonds by making the most of dinnertime, and a compendium of magnificent, palate-pleasing recipes. Education and Technology Support for Children and Young Adults With ASD and Learning Disabilities Kats, Yefim,Stasolla, Fabrizio,2020-11-13 Among the disabilities covered at the state and federal levels, autism and related conditions are a sharply growing diagnostic category among children and young adults. In education, administrators and practitioners working with affected learners are continually faced with confronting difficult problems such as getting adequate personnel training and choosing appropriate tools and techniques that best fit the specific needs of their students while at the same time satisfying their budget, technical resources, curriculum, and profile of the ASD population they serve. The choice of appropriate tools is especially complex due to the intrinsic connection between technical specifications, educational/therapeutic methods, and the wide variety of ASDs and related conditions. In this respect, tools chosen to support children may need to target those diagnosed not only with ASD but also with such co-morbidity conditions as attention deficit disorder. The instructional strategies and use of technology currently have room for improvement for online, hybrid, and face-to-face counseling settings. Also, an effective evaluation of educational technologies and tools would be fundamentally incomplete without a thorough understanding and assessment of the related special education practices as well as psychological and neurological issues specific for ASD and learning disabilities. Education and Technology Support for Children and Young Adults With ASD and Learning Disabilities provides an in-depth analysis on the use of available technology solutions, instructional design methods, and assessment techniques in the context of standards and regulations in classroom or counseling settings. The chapters contain theoretical analyses, vital practical information, and case studies that can function as guidelines for those

involved in helping children and young adults with ASD or learning disabilities in online, hybrid, or face-to-face environments. While highlighting topics such as inclusive education, online gaming environments, assistive technologies, and cognitive development, this book is ideally intended for administrators, instructional technology specialists, special education faculty, counselors, instructional designers, course developers, social workers, and psychologists along with practitioners, stakeholders, researchers, and academicians interested in education and technology support for children and young adults with ASD and learning disabilities.

Texas History for Kids Karen Gibson,2015-02-01 Like everything in the Lone Star State, the history of Texas is larger than life. The flags of six different nations have flown over the state, which had a rich Native American heritage long before European explorers such as Cabeza de Vaca, Coronado, and La Salle ever arrived. The state was even its own republic, achieving independence from Mexico in 1836, yet joined the United States in 1845. Author Karen Bush Gibson tells the 500-year saga of this unique state, from the founding of the Spanish Missions to the victory at San Jacinto, from the Civil War to the first oil gusher at Spindletop, from the Great Storm that destroyed Galveston to the establishment of NASA's Mission Control in Houston. Texas History for Kids also includes 21 informative and fun activities to help readers better understand the state's culture, politics, and geography. Kids will recreate one of the six flags to fly over Texas, make castings of local wildlife tracks, design a ranch's branding iron, celebrate Juneteenth by reciting General Order Number 3, build a miniature Battle of Flowers float, and more. This valuable resource also includes a time line of significant events, a list of historic sites to visit or explore online, and Web resources for further study. Karen Bush Gibson is the author of Women in Space, Women Aviators, Native American History for Kids, and three dozen other books for young readers. She lives in Norman, Oklahoma.

The State, Literacy, and Popular Education in Chile, 1964-1990 Robert Austin,2003 The popular education and adult literacy movements in Chile have historically represented competing paths toward a literate society: one born and nurtured through bitter nineteenth-century labor struggles, the other a compensatory effort by the modern state to limit the political potential of literacy. Robert Austin's book explores the contest between the state and popular education in three paradigmatic Latin American regimes: that of Eduardo Frei Montalva (Christian Democrat, 1964-70), Salvador Allende (Socialist, 1970-73) and Augusto Pinochet (Dictator, 1973-90). Robert Austin's engaging narrative captures the relationship between the Chilean state, formal and non-formal literacy, and popular education, from the demise of liberal capitalism to the consolidation of neoliberalism. This remarkable investigation of the dynamic link between the historical process, literacy, and pedagogy celebrates popular education's victory in securing the inclusion, and subsequent empowerment, of women and ethnic minorities. *The State, Literacy, and Popular Education in Chile, 1964-1990* will be of great interest to political scientists, cultural historians, and scholars of education.

Collaboration and Technology Nelson Baloian,Frada Burstein,Hiroaki Ogata,Flavia Santoro,Gustavo Zurita,2014-08-01 This book constitutes the proceedings of the 20th Collaboration Researchers' International Working Group Conference on Collaboration and Technology, held in Santiago, Chile, in September 2014. The 16 revised papers presented together with 18 progress papers and 3 invited talks were carefully reviewed and selected from 49 submissions. The papers published in proceedings of this year's and past CRIWG conferences reflect the trends in collaborative computing research and its evolution. There was a growing interest in social networks analysis, crowdsourcing and computer support for large communities in general. A special research topic which has been traditionally present in the CRIWG proceedings has been collaborative learning.
