So You Want a Meade LX Telescope! Lawrence Harris,2010-07-20 Computers and Astronomy Perhaps every generation of astronomers believes that their telescopes are the best that have ever been. They are surely all correct! The great leap of our time is that computer-designed and machined parts have led to more accurately made components that give the astronomer ever better views. The manual skills of the craftsman mirror grinder have been transformed into the new-age skills of the programmer and the machine maker. (The new products did not end the work of craftsman telescope makers, though. Many highly skilled amateur/professional opticians continued to produce good-quality mirrors that are still seen today.) Amateur-priced telescopes are now capable of highly accurate tracking and computer control that were once only the province of professionals. This has greatly increased the possibilities of serious astronomy projects for which tailor-made software has been developed. Add a CCD camera to these improved telescopes (see Chap. 3), and you bring a whole new dimension to your astronomy (see Fig. 1. 1). Look Before You Leap! But first, a word of caution. Unless you are already familiar with astronomy and basic telescopes, it is not wise to start spending large amounts of money on a featured telescope. Such an instrument might otherwise be subsequently abandoned due to a perceived overcomplexity coupled with a waning interest.

Spirit Harrison Owen,1987 The New York Times Magazine calls Harrison Owen a Management guru. FORTUNE: There is value to SPIRIT, however difficult that value is to quantify. Just ask Harrison Owen. UTNE READER describes SPIRIT as, a cult classic. It is making splashes with unexpected folks - from nuns to Fortune 500 types. NEW OPTIONS says, SPIRIT has become an underground best-seller among executives & administrators. This book is written for every person who has ever said, The Spirit around here is terrible, & wished they could do something to make it better. Or, The Spirit here is Great, & hoped to keep it that way. Harrison Owen makes sense out of Spirit by telling a likely story about how Spirit works, ways to make it stronger, & what to when it seems to be falling apart. There is a theory, a tested practice, & three case studies, describing what happens when you intentionally set out to grow Spirit. As one who frequents the existential world of organizations, I found Harrison Owen's SPIRIT a treasure of knowledge & lore. His theory is intriguing; the case studies are informative, colorful & fun to read.--Terry Deal, Co-author, CORPORATE CULTURES. Believing is seeing! Remain open while you read this book, & you will be rewarded with an alternative view of organizational reality that is both confronting & challenging. Harrison Owen invites the reader into a process of co-creation. The next step will be yours at an exciting frontier of organizational theory & practice.--Robert Tannenbaum, Teacher.

Britain's Glorious Aircraft Industry J Paul Hodgson,2021-03-03 “The rich and diverse history of the British aircraft industry is captured in superb detail by the author in this weighty tome.” —Aviation News Great Britain’s aircraft industry started in 1908, with the first formally registered organization in the world to offer to design and build an aeroplane “for commercial gain.” This book tells the complete story of the 110 years since the start, all the companies formed and the aircraft they produced, highlighting the advances in aeronautical ambition and technology. It is the story of the creation, survival and decline of all one hundred and twenty-three of the aircraft design and construction companies formed between 1908 and 2018. The exhilaration of success and the magic of aviation technology are vividly illustrated by the technical and political birth stories of iconic projects, such as the Cirrus/Gypsy Moths, the Tiger Moth, the flying boats of Imperial Airways, Spitfire, Lancaster, Viscount, Vulcan, Harrier, Buccaneer and many more. The rotary wing industry is not forgotten. The birth of the jet turbine engine and the quest for supersonic speed is included. The stories of the disappointments of failure and disaster, such as the Brabazon, Comet, Princess, Rotodyne and TSR-2, and the growth of international collaboration in Concorde, Tornado, Airbus, Eurofighter Typhoon and other projects are included, in the context of the international scene and domestic politics. The conclusion highlights the prominent reminiscences and speculates on the future of the aircraft industry in Britain. “An outstanding reference book and a thoroughly enjoyable canter through the decades, from the days of wood and fabric to the modern composite structure of the wings of the A400 Atlas.” —RAF Historical Society
