OmniFocus Task Manager User Guide Bryan Bent,2021-10-13 In 2018, version 3 of OmniFocus was released for iOS and macOS. With the release, the previous concept of contexts taken from GTD was replaced with tags. The Pro version adds the Perspectives window to OmniFocus, where you can choose which perspectives to display as tabs in the sidebar (and determine their order), and create custom perspectives that reflect views on your OmniFocus data that you want to come back to again and again. Choose Show Perspectives (Control Command-P) from the Perspectives menu to open the Perspectives window. The Perspectives window in the Pro version, with the built-in Inbox perspective selected. On the left side of the Perspectives window you'll see a list of your existing OmniFocus perspectives, including the built-in ones, where you can choose which ones to display as tabs in the sidebar and drag and drop to arrange them in your preferred order. To set a perspective as a sidebar tab, click the star button used to promote a perspective to the list of tabs in the sidebar next to the perspective name. The perspective list also serves as a way to navigate between perspectives in the main window: double-click a perspective in the list to open it. If you find this useful, you can click Collapse in the bottom bar of the Perspectives window in the bottom bar to hide the Editor when all you need is the list. Ready to explore new features and know your software better? Read this book and Learn How To Use OmniFocus Task Manager Like A Pro
