Bovine Surgery and Lameness Guy St. Jean, Adrian

Steiner, A. David Weaver, 2013-05-31 Bovine surgery is both

challenging and complicated. Not only does the surgeon

have to decide whether surgery is economically justified,

but surgery often has to be performed in a sub-optimal

environment. Following on from the worldwide success of

the first edition, this new edition continues to act as a step-

by-step guide to standard surgical techniques. Now with

two new authors from Switzerland and North America,

both the text and illustrations have been considerably

expanded. In addition, special attention is given to issues

relating to peri-operative analgesia and animal welfare,

food safety, and drug dosages. Maintains the popular

concise and accessible format of the first edition – perfect

for on-the-field work; Two additional authors, with world

renowned expertise in bovine surgery and lameness;

Detailed instruction on the basics of effective surgery –

proper instrumentation, asepsis, effective anaesthesia and essential techniques; Much more information on lameness, as well as numerous new line drawings to aid instruction.

Niche Envy Joseph Turow, 2008-02-15 The price we pay for the new strategies in database marketing that closely track desirable customers, offering them benefits in return for personal information. We have all been to Web sites that welcome us by name, offering us discounts, deals, or special access to content. For the most part, it feels good to be wanted—to be valued as a customer. But if we thought about it, we might realize that we've paid for this special status by turning over personal information to a company's database. And we might wonder whether other customers get the same deals we get, or something even better. We might even feel stirrings of resentment toward customers more valued than we are. In *Niche Envy*, Joseph Turow examines the emergence of databases as marketing tools and the implications this may have for media, advertising, and society. If the new goal of marketing is to customize commercial announcements according to a buyer's preferences and spending history—or even by race,

gender, and political opinions—what does this mean for the twentieth-century tradition of equal access to product information, and how does it affect civic life? Turow shows that these marketing techniques are not wholly new; they have roots in direct marketing and product placement, widely used decades ago and recently revived and reimagined by advertisers as part of customer relationship management (known popularly as CRM). He traces the transformation of marketing techniques online, on television, and in retail stores. And he describes public reaction against database marketing—pop-up blockers, spam filters, commercial-skipping video recorders, and other ad-evasion methods. Polls show that the public is nervous about giving up personal data. Meanwhile, companies try to persuade the most desirable customers to trust them with their information in return for benefits. Niche Envy tracks the marketing logic that got us to this uneasy impasse.

The Organic Carbon Cycle in the Arctic Ocean
Rüdiger Stein,Robie W. Macdonald,2011-06-27 The flux,

preservation, and accumulation of organic carbon in marine systems are controlled by various mechanisms including primary production of the surface water, supply of terrigenous organic matter from the surrounding continents, biogeochemical processes in the water column and at the seafloor, and sedimentation rate. For the world's oceans, phytoplankton productivity is by far the largest organic carbon source, estimated to be about 30 to 50 Gt (10 tonnes) per year (Berger et al. 1989; Hedges and Keil 1995). By comparison, rivers contribute about 0.15 to 0.23 Gt y of particulate organic matter.

Palaeobiology and Geobiology of Fossil Lagerstätten through Earth History Reitner, Joachim, Yang, Qun, Wang, Yongdong, Reich, Mike, 2013-09-06 Exceptionally preserved fossils from Fossil Lagerstätten contribute greatly to resolving details on the history of life on Earth. For the first time, the "Paläontologische Gesellschaft" (PalGes) and the "Palaeontological Society of China" (PSC) combined forces to jointly present an international conference aimed to highlight and encourage the study of exceptionally well-preserved fossil sites worldwide. The conference focused on all aspects of palaeontology and geobiology, also incorporating related fields like biogeochemistry, biology, sedimentology and stratigraphy. The present volume contains the abstracts of more than 275 lectures and posters presented during the joint international conference "Palaeobiology & Geobiology of Fossil Lagerstätten through Earth History". This year's conference was held at the northern campus of the Georg-August University in

Göttingen, Germany, from September 23-27, 2013. More than three hundred palaeontologists, biologists, geologists and other scientists and researchers from sixteen countries, mainly from Germany and the P. R. of China, participated.

The Peasant of the Garonne Jacques

Maritain, 2013-01-25 At eighty-five, Jacques Maritain, the most distinguished Catholic philosopher of the twentieth century, has written what he offers as his last book, and it turns out to be a shocker. The peasant, as Maritain calls himself in the title, is a man who calls a spade a spade; and a storm of controversy descended immediately on the book's publication in France, as both Right and Left reeled from the force of Maritain's criticism. The Peasant of the Garonne is a sharp attack on the new philosophy, hoping to cool off the fever for change that Maritain believes is imperiling the church's traditional spirituality and even the substance of doctrine. There is sardonic humor in his treatment of Teilhardians, phenomenologists, existentialists, new-style biblical critics, and clerical Freudians, but Maritain is deeply serious in warning that their capitulation to fashionable trends represents a kind of kneeling before the world.

Textile Terminologies from the Orient to the Mediterranean and Europe, 1000 BC to 1000 AD

Salvatore Gaspa, Cécile Michel, Marie-Louise Nosch, 2017 The papers in this volume derive from the conference on textile terminology held in June 2014 at the University of Copenhagen. Around 50 experts from the fields of Ancient History, Indo-European Studies, Semitic Philology, Assyriology, Classical Archaeology, and Terminology from twelve different countries came together at the Centre for Textile Research, to discuss textile terminology, semantic

fields of clothing and technology, loan words, and developments of textile terms in Antiquity. They exchanged ideas, research results, and presented various views and methods. This volume contains 35 chapters, divided into five sections: - Textile terminologies across the ancient Near East and the Southern Levant - Textile terminologies in Europe and Egypt - Textile terminologies in metaphorical language and poetry - Textile terminologies: examples from China and Japan - Technical terms of textiles and textile tools and methodologies of classifications

Liquidated Karen Ho, 2009-06-22 Financial collapses—whether of the junk bond market, the Internet bubble, or the highly leveraged housing market—are often explained as the inevitable result of market cycles: What goes up must come down. In *Liquidated*, Karen Ho punctures the aura of the abstract, all-powerful market to show how financial markets, and particularly booms and busts, are constructed. Through an in-depth investigation into the everyday experiences and ideologies of Wall Street investment bankers, Ho describes how a financially dominant but highly unstable market system is understood, justified, and produced through the restructuring of corporations and the larger economy. Ho, who worked at an investment bank herself, argues that bankers' approaches to financial markets and corporate America are inseparable from the structures and strategies of their workplaces. Her ethnographic analysis of those workplaces is filled with the voices of stressed first-year associates, overworked and alienated analysts, undergraduates eager to be hired, and seasoned managing directors. Recruited from elite universities as "the best and the brightest," investment bankers are socialized into a world of high risk and high reward. They are paid handsomely, with the

understanding that they may be let go at any time. Their workplace culture and networks of privilege create the perception that job insecurity builds character, and employee liquidity results in smart, efficient business. Based on this culture of liquidity and compensation practices tied to profligate deal-making, Wall Street investment bankers reshape corporate America in their own image. Their mission is the creation of shareholder value, but Ho demonstrates that their practices and assumptions often produce crises instead. By connecting the values and actions of investment bankers to the construction of markets and the restructuring of U.S. corporations, Liquidated reveals the particular culture of Wall Street often obscured by triumphalist readings of capitalist globalization.
