Temper Sands in Prehistoric Oceanian Pottery William R.

Dickinson,2006-01-01 Oceanian ceramic cultures making earthenware pottery spread during the past 3500 years through a dozen major island groups spanning 6000 km of the tropical Pacific Ocean from western Micronesia to western Polynesia. Island potters mixed sand as temper into clay bodies during ceramic manufacture. The nature of island sands is governed by the geotectonics of hotspot chains, island arcs, subduction zones, backarc basins, and remnant arcs as well as by sedimentology. Because small islands with bedrock exposures of restricted character are virtual point sources of sand, many tempers are diagnostic of specific islands. Petrographic study of temper sands in thin section allows distinction between indigenous pottery

and exotic pottery transported from elsewhere. Study of 2223 prehistoric Oceanian potsherds from 130 islands and island clusters indicates the nature of Oceanian temper types and documents 105 cases of interisland transport of ceramics over distances typically

Bovine Surgery and Lameness Guy St. Jean, Adrian Steiner, A. David Weaver, 2013-05-31 Bovine surgery is both challenging and complicated. Not only does the surgeon have to decide whether surgery is economically justified, but surgery often has to be performed in a sub-optimal environment. Following on from the worldwide success of the first edition, this new edition continues to act as a step-by-step guide to standard surgical techniques. Now with two new authors from Switzerland and North America, both the text and illustrations have been considerably expanded. In addition, special attention is given to issues relating to peri-operative analgesia and animal welfare, food safety, and drug dosages. Maintains the popular concise and accessible format of the first edition – perfect for on-the-field work; Two additional authors, with world renowned expertise in bovine surgery and lameness; Detailed instruction on the basics of effective surgery – proper instrumentation, asepsis, effective anaesthesia and essential techniques; Much more information on lameness, as well as numerous new line drawings to aid instruction.

Oracle Database Programming using Java and Web Services Kuassi Mensah, 2011-04-08 The traditional division of labor between the database

(which only stores and manages SQL and XML data for fast, easy data search and retrieval) and the application server (which runs application or business logic, and presentation logic) is obsolete. Although the book's primary focus is on programming the Oracle Database, the concepts and techniques provided apply to most RDBMS that support Java including Oracle, DB2, Sybase, MySQL, and PostgreSQL. This is the first book to cover new Java, JDBC, SQLJ, JPublisher and Web Services features in Oracle Database 10g Release 2 (the coverage starts with Oracle 9i Release 2). This book is a must-read for database developers audience (DBAs, database applications developers, data architects), Java developers (JDBC, SQLJ, J2EE, and OR Mapping frameworks), and to the emerging Web Services assemblers. Describes pragmatic solutions, advanced database applications, as well as provision of a wealth of code samples. Addresses programming models which run within the database as well as programming models which run in middle-tier or client-tier against the database. Discusses languages for stored procedures: when to use proprietary languages such as PL/SQL and when to use standard languages such as Java; also running non-Java scripting languages in the database. Describes the Java runtime in the Oracle database 10g (i.e., OracleJVM), its architecture, memory management, security management, threading, Java execution, the Native Compiler (i.e., NCOMP), how to make Java known to SQL and PL/SQL, data types mapping, how to call-out to external Web components, EJB components, ERP frameworks, and external databases. Describes JDBC programming and the new

Oracle JDBC 10g features, its advanced connection services (pooling, failover, load-balancing, and the fast database event notification mechanism) for clustered databases (RAC) in Grid environments. Describes SQLJ programming and the latest Oracle SQLJ 10g features , contrasting it with JDBC. Describes the latest Database Web services features, Web services concepts and Services Oriented Architecture (SOA) for DBA, the database as Web services provider and the database as Web services consumer. Abridged coverage of JPublisher 10g, a versatile complement to JDBC, SQLJ and Database Web Services.

Selected Papers from XVI MaNaPro and XI ECMNP. Vítor Vasconcelos, Susana P Gaudencio, Rui Pedrosa, 2021 The oceans harbor the majority of the Earth's

biodiversity. Marine organisms/microorganisms provide a diverse array of natural products, which are important sources of biologically active agents with unique chemical structures and a broad range of medical and biotechnological applications. The XVI MaNaPro and XI ECMNP conferences aim to present advances and future perspectives on marine natural product research to the scientific community by gathering scientists who work in marine chemistry and related scientific fields from all over the world and at different seniority levels. This Special Issue was organized on the occasion of the 2nd joint XVI MaNaPro and XI ECMNP meeting (<http://wmnp2019.ipleiria.pt/>) held in Peniche, Portugal, in 2019. It comprises 12 original research articles that exemplify research performed in the scope of the conference topics.

Polymer Characterisation B.J. Hunt,M.I. James,2012-12-06 Polymers continue to play an ever increasing role in the modern world. In fact it is quite inconceivable to most people that we could ever have existed of the increased volume and variety of materials without them. As a result currently available, and the diversity of their application, characterisation has become an essential requirement of industrial and academic laboratories involved with polymeric materials. On the one hand requirements may come from polymer specialists involved in the design and synthesis of new materials who require a detailed understanding of the relationship between the precise molecular architecture and the properties of the polymer in order to improve

its capabilities and range of applications. On the other hand, many analysts who are not polymer specialists are faced with the problems of analysing and testing a wide range of polymeric materials for quality control or material specification purposes. We hope this book will be a useful reference for all scientists and techno or industrial laboratories, logists involved with polymers, whether in academic and irrespective of their scientific discipline. We have attempted to include in one volume all of the most important techniques. Obviously it is not possible to do this in any great depth but we have encouraged the use of specific examples to illustrate the range of possibilities. In addition numerous references are given to more detailed texts on specific subjects, to direct the reader where appropriate. The book is divided into II chapters.

On the Move Timothy Cresswell, 2012-11-12 On the Move presents a rich history of one of the key concepts of modern life: mobility. Increasing mobility has been a constant throughout the modern era, evident in mass car ownership, plane travel, and the rise of the Internet. Typically, people have equated increasing mobility with increasing freedom. However, as Cresswell shows, while mobility has certainly increased in modern times, attempts to control and restrict mobility are just as characteristic of modernity. Through a series of fascinating historical episodes Cresswell shows how mobility and its regulation have been central to the experience of modernity.

Digital Content Creation Rae Earnshaw, John Vince, 2012-12-06 The very word digital has acquired a status that far exceeds its humble dictionary definition. Even the prefix digital, when associated with familiar sectors such as radio, television, photography and telecommunications, has reinvented these industries, and provided a unique opportunity to refresh them with new start-up companies, equipment, personnel, training and working practices - all of which are vital to modern national and international economies. The last century was a period in which new media stimulated new job opportunities, and in many cases created totally new sectors: video competed with film, CDs transformed LPs, and computer graphics threatened traditional graphic design sectors. Today, even the need for a physical medium is in question. The virtual digital domain allows the capture, processing, transmission, storage, retrieval and display of text, images, audio and animation without familiar materials such as paper, celluloid, magnetic tape and plastic. But moving from these media to the digital domain introduces

all sorts of problems, such as the conversion of analog archives, multimedia databases, content-based retrieval and the design of new content that exploits the benefits offered by digital systems. It is this issue of digital content creation that we address in this book. Authors from around the world were invited to comment on different aspects of digital content creation, and their contributions form the 23 chapters of this volume.

Brokers of Modernity Martin Kohlrausch, 2019-03-11 The story of modernist architects in East Central Europe The first half of the twentieth century witnessed the rise of modernist architects. *Brokers of Modernity* reveals how East Central Europe turned into one of the pre-eminent testing grounds of the new belief system of modernism. By combining the internationalism of the CIAM organization and the modernising aspirations of the new states built after 1918, the reach of modernist architects extended far beyond their established fields. Yet, these architects paid a price when Europe's age of extremes intensified. Mainly drawing on Polish, but also wider Central and Eastern European cases, this book delivers a pioneering study of the dynamics of modernist architects as a group, including how they became qualified, how they organized, communicated and attempted to live the modernist lifestyle themselves. In doing so, *Brokers of Modernity* raises questions concerning collective work in general and also invites us to examine the social role of architects today. Ebook available in Open Access. This publication is GPRC-labeled (Guaranteed Peer-Reviewed Content).

Microbial Action on Hydrocarbons Vivek Kumar, Manoj Kumar, Ram Prasad, 2019-02-08 The book discusses ways to overcome the side effects of using hydrocarbon-based products as energy sources. Hydrocarbons produce raw crude oil waste of around 600,000 metric tons per annum, with a range of uncertainty of 200,000 metric tons per year. The various chapters in this book focus on approaches to reduce these wastes through the application of potential microbes, in a process called bioremediation. The book is a one-stop reference resource on the methods, mechanisms and application of the bio-composites, in the laboratory and field. Focusing on resolving a very pressing environmental issue, it not only provides details of existing

challenges, but also offers deeper insights into the possibility of solving problems using hydrocarbon bioremediation.
