Reconciliation, Civil Society, and the Politics of Memory Birgit Schwelling,2014-10-31 How did civil society function as a locus for reconciliation initiatives since the beginning of the 20th century? The essays in this volume challenge the conventional understanding of reconciliation as a benign state-driven process. They explore how a range of civil society actors - from Turkish intellectuals apologizing for the Armenian Genocide to religious organizations working towards the improvement of Franco-German relations - have confronted and coped with the past. These studies offer a critical perspective on local and transnational reconciliation acts by questioning the extent to which speech became an alternative to silence, remembrance to forgetting, engagement to oblivion.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Programming in Modula-2 N. Wirth,2012-12-06 This text is an introduction to programming in general, and a manual for programming with the language Modula-2 in particular. It is oriented primarily towards people who have already acquired some basic knowledge of programming and would like to deepen their understanding in a more structured way. Nevertheless, an introductory chapter is included for the benefit of the beginner, displaying in a concise form some of the fundamental concepts of computers and their programming. The text is therefore also suitable as a self-contained tutorial. The notation used is Modula-2, which lends itself well for a structured approach and leads the student to a working style that has generally become known under the title of structured programming. As a manual for programming in Modula-2, the text covers practically all facilities of that language. Part 1 covers the basic notions of the variable, expression, assignment, conditional and repetitive statement, and array data structure. Together with Part 2 which introduces the important concept of the procedure or subroutine, it contains essentially the material commonly discussed in introductory programming courses. Part 3 concerns data types and structures and constitutes the essence of an advanced course on programming. Part 4 introduces the notion of the module, a concept that is fundamental to the design of larger programmed systems and to programming as team work. The most commonly used utility programs for input and output are presented as examples of modules. And fmally, Part 5 covers facilities for system programming, device handling, and multiprogramming.

Publicly Engaged Scholars Margaret A. Post,Elaine Ward,Nicholas V. Longo,John Saltmarsh,2023-07-03 The concern that the democratic purposes of higher education -- and its conception as a public good -- are being undermined, with the growing realization that existing structures are unsuited to addressing today's complex societal problems, and that our institutions are failing an increasingly diverse population, all give rise to questioning the current model of the university. This book presents the voices of a new generation of scholars, educators, and practitioners who are committed to civic renewal and the public purposes of higher education. They question existing policies, structures, and practices, and put forward new forms of engagement that can help to shape and transform higher education to align it with societal needs.The scholars featured in this book make the case for public scholarship and argue that, in order to strengthen the democratic purposes of higher education for a viable future that is relevant to the needs of a changing society, we must recognize and support new models of teaching and research, and the need for fundamental changes in the core practices, policies, and cultures of the academy. These scholars act on their values through collaboration, inclusiveness, participation, task sharing, and reciprocity in public problem solving. Central to their approach is an authentic respect for the expertise and experience that all stakeholders contribute to education, knowledge generation, and community building. This book offers a vision of the university as a part of an ecosystem of knowledge production, addressing public problems with the purpose of advancing a more inclusive, deliberative democracy; and explores the new paradigm for teaching, learning, and knowledge creation necessary to make it a reality.
