Red Dragon Thomas Harris, 2009-01-06 THE NEW YORK TIMES BESTSELLER Feed your fears with the terrifying classic that introduced cannibalistic serial killer Hannibal Lecter. FBI agent Will Graham once risked his sanity to capture Hannibal Lecter, an ingenious killer like no other. Now, he's following the bloodstained pattern of the Tooth Fairy, a madman who's already wiped out two families. To find him, Graham has to understand him. To understand him, Graham has only one place left to go: the mind of Dr. Lecter.

War Girls Tochi Onyebuchi, 2019-10-15 Two sisters are torn apart by war and must fight their way back to each other in a futuristic, Black Panther-inspired Nigeria. The year is 2172. Climate change and nuclear disasters have rendered much of earth unlivable. Only the lucky ones have escaped to space colonies in the sky. In a war-torn Nigeria, battles are fought using flying, deadly mechs and soldiers are outfitted with bionic limbs and artificial organs meant to protect them from the harsh, radiation-heavy climate. Across the nation, as the years-long civil war wages on, survival becomes the only way of life. Two sisters, Onyii and Ify, dream of more. Their lives have been marked by violence and political unrest. Still, they dream of peace, of hope, of a future together. And they're willing to fight an entire war to get there. Acclaimed author, Tochi Onyebuchi, has written an immersive, action-packed, deeply personal novel perfect for fans of Nnedi Okorafor, Marie Lu, and Paolo Bacigalupi.

Eternity in the Midst of Time Fr. Wilfrid Stinissen, 2019-01-21 Can time be our friend? At first glance the question seems ridiculous, because the apparent scarcity of time is a constant source of stress in our busy lives. There are not enough hours in the day, we say as we collapse late at night. Deep down we know that we cannot go on like this. Father Stinnisen's book dares us to see time with new eyes. The insight that eternity is written in the depths of our hearts helps us to live in time in a way that leads us deeper into God's joy. We are like children in a land of fairy tales where everything is exciting and exploration never ends. We therefore should rejoice that everything around us is great and mysterious and that we can live in eternal wonder. His intention is not to explain what time is and thus take away its mystery. Instead, his aim is to show us how to see time from different perspectives and to discover how rich and multifaceted it is. Above all, he demonstrates how we can make use of the tremendous possibilities that time offers to us.

Goldenhand Garth Nix, 2016-10-04 The long-awaited fifth installment in Garth Nix's New York Times bestselling Old Kingdom series, for readers who enjoy series by Rae Carson, Kristin Cashore, Scott Westerfeld, and Cassandra Clare. Goldenhand takes place six months after the events of Abhorsen and follows the novella Nicholas Sayre and the Creature in the Case, which is featured in Across the Wall. Lirael lost one of her hands in the binding of Orannis, but now she has a new hand, one of gilded steel and Charter Magic. On a dangerous

journey, Lirael returns to her childhood home, the Clayr's Glacier, where she was once a Second Assistant Librarian. There, a young woman from the distant North brings her a message from her long-dead mother, Arielle. It is a warning about the Witch with No Face. But who is the Witch, and what is she planning? Lirael must use her new powers to save the Old Kingdom from this great danger—and it must be forestalled not only in the living world but also in the cold, remorseless river of Death.

King Leopold's Ghost Adam Hochschild, 2019-05-14 With an introduction by award-winning novelist Barbara Kingsolver In the late nineteenth century, when the great powers in Europe were tearing Africa apart and seizing ownership of land for themselves, King Leopold of Belgium took hold of the vast and mostly unexplored territory surrounding the Congo River. In his devastatingly barbarous colonization of this area, Leopold stole its rubber and ivory, pummelled its people and set up a ruthless regime that would reduce the population by half. . While he did all this, he carefully constructed an image of himself as a deeply feeling humanitarian. Winner of the Duff Cooper Prize in 1999, *King Leopold's Ghost* is the true and haunting account of this man's brutal regime and its lasting effect on a ruined nation. It is also the inspiring and deeply moving account of a handful of missionaries and other idealists who travelled to Africa and unwittingly found themselves in the middle of a gruesome holocaust. Instead of turning away, these brave few chose to stand up against Leopold. Adam Hochschild

brings life to this largely untold story and, crucially, casts blame on those responsible for this atrocity.

Polymer Characterisation B.J. Hunt, M.I. James, 2012-12-06 Polymers continue to play an ever increasing role in the modern world. In fact it is quite inconceivable to most people that we could ever have existed of the increased volume and variety of materials without them. As a result currently available, and the diversity of their application, characterisation has become an essential requirement of industrial and academic laboratories involved with polymeric materials. On the one hand requirements may come from polymer specialists involved in the design and synthesis of new materials who require a detailed understanding of the relationship between the precise molecular architecture and the properties of the polymer in order to improve its capabilities and range of applications. On the other hand, many analysts who are not polymer specialists are faced with the problems of analysing and testing a wide range of polymeric materials for quality control or material specification purposes. We hope this book will be a useful reference for all

scientists and techno or industrial laboratories, logists involved with polymers, whether in academic and irrespective of their scientific discipline. We have attempted to include in one volume all of the most important techniques. Obviously it is not possible to do this in any great depth but we have encouraged the use of specific examples to illustrate the range of possibilities. In addition numerous references are given to more detailed texts on specific subjects, to direct the reader where appropriate. The book is divided into II chapters.

Writing Science Through Critical Thinking Marilyn F. Moriarty, 1997 Written and extensively class tested with NSF/NIH support, this timely and useful text addresses a crucial need which is acknowledged in most universities and

colleges. It is the need for students to learn to write in the context of their field of study; in this case science. Although numerous how to writing books have been published, few, if any, address the central pedagogical issues underlying the process of learning to think and write scientifically. The direct connection between this writing skill and that of critical thinking is developed with engaging style by the author, an English professor. Moriarty's book is an invaluable guide for both undergraduate and graduate science students. In the process of learning the specific requirements of organization demanded by scientific writing, students will develop strategies for thinking through their scientific research, well before they sit down to write. This instructive text will be useful to students who need to satisfy a science writing proficiency requirement in the context of a science course, a course in technical writing, advanced composition, or writing for the profession.
