The Global Airline Industry Peter Belobaba,Amedeo Odoni,Cynthia Barnhart,2009-04-01 In today's rapidly changing air transport environment, the aviation professionals require access to advanced and comprehensive knowledge, coupled with an in-depth understanding of the needs of the airline industry. Drawing on the editors' extensive experience with airline and air transport issues, The Global Airline Industry provides a definitive introduction to our air transportation system. Featuring contributors from 3 different continents, all affiliated to MIT's Global Airline Industry Program, this book's unique and holistic perspective is allied with detailed coverage of: • air transportation economics • airline planning and operations • industrial relations and human resource issues • aviation safety and security • aviation infrastructure and environmental impacts • airline pricing and distribution. The Global Airline Industry is accompanied by a book companion website hosting databases with regular updates of airline & air transport related statistics and information as well as updates of the book material, housed at www.wiley.com/belobaba . It engenders a crucial understanding of the essential parameters within which the interfacing disciplines in the industry must operate that will benefit both students in air transportation/ aviation management degree programmes as well as professionals working in the industry.

Ryanair-Aer Lingus Fabio La Pergola,2010

Air Transport in the 21st Century Dr George Williams,Dr J Frankie O'Connell,2012-10-01 Airlines are buffeted by fluctuating political and economic landscapes, ever-changing competition, technology developments, globalization, increasing deregulation and evolving customer requirements. As a consequence all sectors of the air transport industry are in a constant state of flux. The principle aim of this book is to review current trends in the airline industry and its related suppliers, thereby providing an insight into the forces that are changing its dynamics. The factors that are reshaping the structure of the industry are examined with a view to identifying the key issues whose impact will be critical in the future. The book features two very distinct sections. The first contains short contributions from industry executives at CEO/VP level from airlines, aircraft/engine manufacturers, safety and navigational provider organisations, who have set out their take of where the airline industry is heading. This commercial input sets the scene for the book and provides the bridge to the second section, which is composed of 18 chapters written by distinguished academic authors. Each chapter presents a valuable insight into a specific area of the air transport industry, including: airlines, airports, cargo, deregulation, the environment, navigation, strategy, information technology, security and tourism. The shared objective of the authors is to describe and explain the core competencies that are determining the current shape of the industry and to examine the forces that will change its direction going forward. The book is written in a management style and will appeal to all levels of personnel who work for airlines across the world. It is also written for airport authorities, aerospace manufacturers, regulatory and government transportation agencies, researchers and students of aviation management, transport studies, tourism and the wider air transport industry.

Deregulation and the Airline Business in Europe Sean Barrett,2009-05-15 Almost 117 million passengers flew on Europe's low cost airlines in 2006.

This statistic would have seemed beyond belief in the mid-1980s when air transport was a heavily regulated sphere. This book examines the deregulation which has taken place since then and in particular looks at the single most important repercussion of the deregulation of Europe's skies - the rise of the low cost airline. Sean Barret has been involved in the debates surrounding this right from the start and is well placed to provide a scholarly study of the issue. The book spends much time looking at the success of Ryanair in this period - this provides the perfect case study given the dominant role that the company has taken up over recent years.

Corporate Argumentation in Takeover Bids Rudi Palmieri,2014-11-15 This volume systematically investigates the role of argumentation in takeover bids. The announcement of these financial proposals triggers an argumentative situation, in which both the economic desirability and the social acceptability of the deal become argumentative issues for different classes of stakeholders (shareholders, employees, customers, etc.). The study focuses on the strategic maneuvers that corporate directors deploy in order to persuade their audiences while complying with precise regulatory requirements, designed to allow shareholders to make reasonable decisions. A conceptual reframing of takeovers as an argumentative context brings to light the different argumentative situations of friendly and hostile bids. The argumentative strategies that corporate directors adopt in the two situations are identified and analyzed on the basis of a corpus of takeover documents referring to offers launched in the UK market between 2006 and 2010. The argumentative reconstruction focuses in particular on the inferential configuration of arguments, which is accomplished by means of the Argumentum Model of Topics (AMT). This kind of analysis enables capturing the inherently argumentative processes through which information becomes a relevant starting point for investment decisions.

The Irish Yearbook of International Law, Volumes 4-5, 2009-10 Fiona de Londras,Siobhán Mullally,2012-05-28 The Irish Yearbook of International Law is intended to stimulate further research into Ireland's practice in international affairs and foreign policy, filling a gap in existing legal scholarship and assisting in the dissemination of Irish thinking and practice on matters of international law. On an annual basis, the Yearbook presents peer-reviewed academic articles and book reviews on general issues of international law. Designated correspondents provide reports on international law developments in Ireland, Irish practice in international fora and the European Union, and the practice of joint North-South implementation bodies in Ireland. In addition, the Yearbook reproduces documents that reflect Irish practice on contemporary issues of international law. Publication of the Irish Yearbook of International Law makes Irish practice and opinio juris more readily available to Governments, academics and international bodies when determining the content of international law. In providing a forum for the documentation and analysis of North-South relations the Yearbook also make an important contribution to post-conflict and transitional justice studies internationally. As a matter of editorial policy, the Yearbook seeks to promote

a multilateral approach to international affairs, reflecting and reinforcing Ireland's long-standing commitment to multilateralism as a core element of foreign policy.

EU Competition Law Ariel Ezrachi, 2018-06-28 This book is designed as a working tool for the study and practice of European competition law. It is an enlarged and updated sixth edition of the highly practical guide to the leading cases of European competition law. This sixth edition focuses on Article 101 TFEU, Article 102 TFEU and the European Merger Regulation. In addition it explores the public and private enforcement of competition law, the intersection between intellectual property rights and competition law, the application of competition law to state action and state aid laws. Each chapter begins with an introduction which outlines the relevant laws, regulations and guidelines for each of the topics, setting the analytical foundations for the case entries. Within this framework, cases are reviewed in summary form, accompanied by analysis and commentary. Praise for earlier editions: 'This book should be in the library of every competition law practitioner and academic. The summary of cases is first class. But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decisions but also some of the leading cases from the US and European Member States.' Ali Nikpay, Gibson, Dunn & Crutcher LLP 'The study of EU competition law requires the analysis and understanding of a number of increasingly complex European Commission and European Court decisions. Through the provision of case summaries, excerpts from the important passages and concise commentary linking these decisions to other key case law and Commission documents, this unique and impressive book, now in its fifth edition, provides the student and practitioner of EU competition law with an extremely clear and useful introduction to these leading decisions.' Dr Kathryn McMahon, Associate Professor, School of Law, University of Warwick 'This book is especially valuable for competition law specialists in Europe and abroad who are interested in the jurisprudence and policy of the European Union and its member states. Familiarity with the European regime is essential for proficiency in competition law today, and this volume provides an excellent foundation.' William E Kovacic, Global Competition Professor of Law and Policy, George Washington University Law School, Former Chairman, US Federal Trade Commission 'The Guide is an invaluable tool for both students and practitioners. It provides a compact overview of the fundamental cases and highlights the essential problems in a clear and sharp analysis.' Dr Christoph Voelk, Antitrust Practice Group, McDermott, Will & Emery LLP, Brussels

Business Performance and Financial Institutions in Europe Alexandra Horobet, Persefoni Polychronidou, Anastasios Karasavoglou, 2020-10-24 This book examines the business models, performance, and decision-making approaches employed by financial institutions in Central and Southeast Europe. The respective contributions cover a wide range of industries, including banking, pharmaceuticals, and airline business services, and present both theoretical and empirical studies that highlight economy-wide risks and opportunities for European companies. The book is divided into four parts, the first of which provides a critical assessment of the competitiveness and performance of European companies, while the second examines decision-making approaches at financial institutions; the third and fourth parts address the macroeconomic risks and opportunities for business development in Europe. Intended for scholars, political decision-makers, and practitioners, the book offers new perspectives on Central and Southeast European financial and business research.
