

Age Of Conquest Asia

S. Frederick Starr

Lost Enlightenment S. Frederick Starr, 2015-06-02 The

forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. Lost Enlightenment recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote

the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. *Lost Enlightenment* chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

Age of Conquests Angelos Chaniotis, 2018 The world that Alexander remade in his lifetime was transformed once again by his death in 323 BCE. Over time, trade and intellectual achievement resumed, but Cleopatra's death in 30 BCE brought this Hellenistic moment to a close--or so the story goes. Angelos Chaniotis reveals a Hellenistic world that continued to Hadrian's death in 138 CE.

The Spiritual Expansion of Medieval Latin Christendom: The Asian Missions James D. Ryan, 2017-03-02 During the thirteenth and fourteenth centuries religious zeal nourished by the mendicants' sense of purpose motivated Dominican and Franciscan friars to venture far beyond Europe's cultural frontiers to spread their Christian faith into the farthest reaches of Asia. Their incredible journeys were reminiscent of heroic missionary ventures in earlier eras and far more exotic than evangelization during the tenth through twelfth centuries, when the western church Christianized Eastern Europe and Scandinavia. This new mission effort was stimulated by a variety of factors and facilitated by the establishment of the Mongol Empire, and, as the fourteenth century dawned, missionaries entertained fervent but vain hopes of success within khanates in China, Central Asia, Persia and

Kipchak. The reports these missionaries sent back to Europe have fascinated successive generations of historians who analyzed their travels and struggled to understand their motives and aspirations. The essays selected for this volume, drawn from a range of twentieth-century historians and contextualized in the introduction, provide a comprehensive overview of missionary efforts in Asia, and of the developments in the secular world that both made them possible and encouraged the missionaries' hopes for success. Three of the studies have been translated from French specially for publication in this volume.

The Central Asian Revolt of 1916 Alexander Morrison, Cloé Drieu, Aminat Chokobaeva, 2019-10-02 The 1916 Revolt was a key event in the history of Central Asia, and of the Russian Empire in the First World War. This volume is the first comprehensive re-assessment of its causes, course and consequences in English for over sixty years. It draws together a new generation of leading historians from North America, Japan, Europe, Russia and Central Asia, working with Russian archival sources, oral narratives, poetry and song in Kazakh and Kyrgyz. These illuminate in unprecedented detail the origins and causes of the revolt, and the immense human suffering which it entailed. They also situate the

revolt in a global perspective as part of a chain of rebellions and disturbances that shook the world's empires, as they crumbled under the pressures of total war.

The Eagle and the Dragon Serge Gruzinski,2014-12-23 In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans

who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age.

Colonies and Conquest Richard Bodley Scott, 2011-03-22

Following in the footsteps of Marco Polo, Colonies and Conquest, the fourth Field of Glory: Renaissance companion, presents the armies and allies of the great civilizations of Asia. Take on the role of a Portuguese conquistador or Dutch colonist, pushing ever-eastwards, seeking to bring trade and religion to the continent, or command the colorful and unique armies of India, China or Japan, and defend and expand your own empires. With artwork, maps and historical overviews, Colonies and Conquest presents everything

you need to wargame the battles and conflicts of Renaissance-era Asia.

The Conquest of Civilization James Henry Breasted, 1926 The present treatise first appeared as a text-book, under the title, *Ancient times*, in 1916--Foreword.

War and Nationalism in South Asia Marcus Franke, 2009-01-21 This book presents and analyses the oldest sub-national war of postcolonial South Asia, between the Indian state and the Nagas of Northeast India. It offers a serious and thorough political history on the Naga region over three periods, pre-colonial, colonial, and post-colonial. Drawing on a wealth of primary sources and comparative and theoretical literature, Marcus Franke demonstrates that agency and identity-formation are an on-going process that neither started nor ended with colonialism. Although the interaction of the local population with colonialism produced a Naga national élite, it was the emergence of the Indian political class, with access to superior means of nation and state-building, that was able to undertake the modern Indo-Naga war. This war firmly made the Nagas into a 'nation' and that set them onto the road to independence. *War and Nationalism in South Asia* fundamentally revises our understanding of the existing 'histories' of the Nagas by exposing them to be

influenced by colonial or post-colonial narratives of domination. Furthermore, by placing the region into the *longue durée* of state formation with its involved technique of imperial rule, the book presents a new approach to the study of nationalism and war in South Asia in general. This book will be of interest to students and scholars of politics, history, anthropology and South Asian studies.

The Ethics of War in Asian Civilizations Torkel

Brekke, 2006-03-13 This book explores how issues of ethics in war and warfare have been treated by major ethical traditions of Asia. It looks at six different Asian religious, philosophical and political traditions: Islam, Judaism, Hinduism, Buddhism, China and Japan; and it is organized in three parts according to geography: West Asia, South Asia and East Asia. While chapters are written by specialists in Asian cultures, some of the conceptual apparatus is drawn from the scholarly discourse on just war developed in the study of the ethical tradition of Christianity. These concepts provide the necessary focus and makes comparison across cultural boundaries possible. As a study of the comparative ethics of war, this book opens a discussion about whether there are universal standards in the ideologies of warfare between the major religious traditions of the world. The concept of just war is at the core of the

argument. This new approach opens a new field of research on war and ideology.--Jacket.

Warfare, Crusade and Conquest in the Middle Ages John

France,2023-04-21 This volume brings together a series of articles by John France, published over a span of more than forty years, covering a number of aspects of the military and crusading history of the Middle Ages, both in Europe and the Near East. An interest in understanding how war worked and why informs a first group of articles, ranging from Carolingian armies to the organisation of war in the 13th century. The focus then turns to the Crusades, the most ambitious conquests of the era, with a set of studies on the First Crusade and others on the manner and conduct of warfare in the territories of the Latin East. The volume also includes a major unpublished analysis, co-authored with Nicholas Morton, of the problems faced by the local Islamic powers in the early Crusading period, reminding us that an army is only as strong as its enemies permit, and suggesting that the crusaders should be seen in this light.

The History of Central Asia Christoph Baumer,2016-08-03

Between the ninth and the fifteenth centuries, Central Asia was a major political, economic and cultural hub on the Eurasian

continent. In the first half of the thirteenth century it was also the pre-eminent centre of power in the largest land-based empire the world has ever seen. This third volume of Christoph Baumer's extensively praised and lavishly illustrated new history of the region is above all a story of invasion, when tumultuous and often brutal conquest profoundly shaped the later history of the globe. The author explores the rise of Islam and the remarkable victories of the Arab armies which - inspired by their vital, austere and egalitarian desert faith - established important new dynasties like the Seljuks, Karakhanids and Ghaznavids. A golden age of artistic, literary and scientific innovation came to a sudden end when, between 1219 and 1260, Genghiz Khan and his successors overran the Chorasmian-Abbasid lands. Dr Baumer shows that the Mongol conquests, while shattering to their enemies, nevertheless resulted in much greater mercantile and cultural contact between Central Asia and Western Europe.

Western Visions of the Far East in a Transpacific Age, 1522–1657 Dr Christina H Lee, 2012-10-28 Bringing to bear the latest developments across various areas of research and disciplines, this collection provides a broad perspective on how Western Europe made sense of a complex, multi-faceted, and by

and large Sino-centered East and Southeast Asia. The volume covers the transpacific period--after Magellan's opening of the transpacific route to the Far East and before the eventual dominance of the region by the British and the Dutch. In contrast to the period of the Enlightenment, during which Orientalist discourses arose, this initial period of encounters and conquest is characterized by an enormous curiosity and a desire to seize--not only materially but intellectually--the lands and peoples of East Asia. The essays investigate European visions of the Far East--particularly of China and Japan--and examine how and why particular representations of Asians and their cultural practices were constructed, revised, and adapted. Collectively, the essays show that images of the Far East were filtered by worldviews that ranged from being, on the one hand, universalistic and relatively equitable towards cultures to the other extreme, unilaterally Eurocentric.

Keywords for Asian American Studies Cathy J. Schlund-Vials, Linda Trinh Võ, K. Scott Wong, 2015-05-08 Introduces key terms, research frameworks, debates, and histories for Asian American Studies Born out of the Civil Rights and Third World Liberation movements of the 1960s and 1970s, Asian American

Studies has grown significantly over the past four decades, both as a distinct field of inquiry and as a potent site of critique.

Characterized by transnational, trans-Pacific, and trans-hemispheric considerations of race, ethnicity, migration, immigration, gender, sexuality, and class, this multidisciplinary field engages with a set of concepts profoundly shaped by past and present histories of racialization and social formation. The keywords included in this collection are central to social sciences, humanities, and cultural studies and reflect the ways in which Asian American Studies has transformed scholarly discourses, research agendas, and pedagogical frameworks. Spanning multiple histories, numerous migrations, and diverse populations, Keywords for Asian American Studies reconsiders and recalibrates the ever-shifting borders of Asian American studies as a distinctly interdisciplinary field. Visit keywords.nyupress.org for online essays, teaching resources, and more.
