An Assessment of Existing Studies of Wind  
Loading on Solar Collectors Lawrence Martin  
Murphy, 1981 This paper discusses current design  
and testing procedures for wind loading. The test  
results corresponding to numerous wind tests on  
heliostats, parabolic troughs, parabolic dishes,  
and field mounted photovoltaic arrays are  
discussed and the applicability of the findings  
across the various technologies is assessed. One  
of the most significant consistencies in the data  
from all of the technologies is the apparent  
benefit provided by fences and field shielding.  
Taken in toto, these data show that load  
reductions of three or possibly more seem  
feasible, though a more thorough understanding of  
the phenomena involved must be attained before  
this benefit can be realized. It is recommended  
that the required understanding be developed to  
take advantage of this benefit and that field  
tests be conducted to correlate with both analyses  
and tests.

## **Environmental Impacts of Wind-Energy Projects**

National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Environmental Impacts of Wind-Energy Projects, 2007-09-27 The generation of electricity by wind energy has the potential to reduce environmental impacts caused by the use of fossil fuels. Although the use of wind energy to generate electricity is increasing rapidly in the United States, government guidance to help communities and developers evaluate and plan proposed wind-energy projects is lacking.

Environmental Impacts of Wind-Energy Projects offers an analysis of the environmental benefits and drawbacks of wind energy, along with an evaluation guide to aid decision-making about projects. It includes a case study of the mid-Atlantic highlands, a mountainous area that spans parts of West Virginia, Virginia, Maryland, and Pennsylvania. This book will inform policy makers at the federal, state, and local levels.

*What Color Is the Wind?* Anne Herbauts, 2016 A blind child questions all he encounters--a dog, wolf, elephant, mountain, bird, stream, and tree--about the color of the wind. Each responds differently, with a shape, color, smell, texture, or idea. Each page displays a visual and tactile palette of cutouts, textures, colors. It is a sensory experience that makes the invisible experiential, ending with the wind as the pages fly. A graduate of the Academy of Fine Arts in Brussels, Anne Herbauts expresses an original world in each of her books. Awake to the richness of the world, endlessly curious, and rigorous in

her work, Anne has written and illustrated over twenty books.

River of Wind (Guardians of Ga'Hoole #13)

Kathryn Lasky, 2010-06-01 The adventure continues! In a land no owl knew existed, Soren, Coryn, and the Guardians find danger, knowledge, and new allies. Coryn and the Band have returned to the Great Ga'Hoole Tree and restored order. With the Ember safely hidden away, the tree shakes off its gaudy golden glow and recovers its natural majesty. Meanwhile, deep in the Palace of Mists, Bess finds an ancient map fragment that reveals that there are not 5 owl kingdoms -- as has been thought since time immemorial -- but 6. Coryn and the chaw of chaws set off to find this unknown land. In a landscape of perpetual winter, they discover a monastery of serene, learned owls, the likes of which no one has ever seen before.
