The Coming of Age of Solar and Wind Power Tariq Muneer, Eulalia Jadraque Gago, Saioa Etxebarria Berrizbeitia, 2022-02-03 This book focuses on the current situation of two technologies for electricity production from renewable energy sources, wind and solar photovoltaic energy, analysing and describing both technologies in detail. Four regions of the world, with distinct energy markets and conditions, are explored. Together, the USA, Europe, China and Japan represent one third of the world's population and occupy 25% of the planet, therefore offering a representation of a global picture. In each of these regions, the development of the solar and wind energy is examined, and the economic implications are described.

Star Trek and the British Age of Sail Stefan Rabitsch, 2018-12-06 Clear all moorings, one-half impulse power and set course for a mare incognitum... A popular culture artifact of the New Frontier/Space Race era, Star Trek is often mistakenly viewed as a Space Western. However, the Western format is not what governs the worldbuilding of Star Trek, which was, after all, also pitched as "Hornblower in space." Star Trek is modeled on the world of the "British Golden Age of Sail" as it is commonly found in the genre of sea fiction. This book re-historicizes and remaps the origins of the franchise and subsequently the entirety of its fictional world—the Star Trek continuum—on an as yet uncharted transatlantic bearing.

The Mediterranean and the Mediterranean World in the Age of Philip II Fernand Braudel, 2023-07-25 The focus of Fernand Braudel's great work is the Mediterranean world in the second half of the sixteenth century, but Braudel ranges back in history to the world of Odysseus and forward to our time, moving out from the Mediterranean area to the New World and other destinations of Mediterranean traders. Braudel's scope embraces the natural world and material life, economics, demography, politics, and diplomacy.

The Golden Age of Weird Fiction MEGAPACK TM, Vol. 2: George T. Wetzel George T. Wetzel, 2015-02-03 George T. Wetzel (1921-1983) was, for decades, the leading researcher into the life and works of H.P. Lovecraft. His scholarly essays (which Wildside Press is working on collecting) appeared in numerous books and magazines from the 1940s through the 1970s. All the time he dabbled in writing weird fiction on his own, but never pursued it beyond the occasional contribution to a small press anthology or fan-produced magazine. Like his idol, H.P. Lovecraft, he dabbled in the art. We are pleased to include a fine selection of virtually all of his fiction, including: A TALE OF THE ELDER GODS ANONYMOUS THE GOTHIC HORROR CAER SIDHI THE ENTITY EATER OF THE DEAD NIGHTMARE HOUSE WHAT THE MOON BRINGS NIGHT ON FORT CARROLL POISON PEN THE ADVENTURE OF GOSNELL JUMBEE SEEING THINGS AT NIGHT THE PIRATE OF SHELL CASTLE If you enjoy this book, search your favorite ebook store for Wildside Press Megapack to see the more than 180 other entries in the series, covering science fiction, modern authors, mysteries, westerns, classics, adventure stories, and much, much more!

Energy Sustainability and Climate Change in ASEAN Han Phoumin, Farhad Taghizadeh-Hesary, Fukunari Kimura, Jun Arima, 2021-07-15 This book provides several up-to-date empirical policy-oriented studies on assessing the impacts of climate change on various economic sectors and the role of renewable energy resources in mitigating pollution and climate change. It suggests various policy recommendations on how to increase the share of renewable energy resources in the energy baskets of the members of the Association of Southeast Asian Nations (ASEAN) and the rest of the world to ensure energy sustainability. As of 2020, most of the world's energy investment still went to carbon-emitting sources, namely, fossil fuels. On the other hand, the Covid-19 pandemic and the economic Project Overview 20 March 2021 08:39 Page 6 of 9 downturns shrank the global energy demand, including fossil fuels, resulting in a sharp drop in their prices. Low fossil fuel prices are harmful to developing renewable energy projects, making solar, wind, and other renewable energy resources less competitive as sources of electricity. This is endangering the Paris agreement and the "Climate Action" goal of the United Nations. Given the high share of fossil fuels in the energy mix of the members of ASEAN, tremendous challenges must be faced for their energy transition in the post-Covid-19 world. The authors call for sound policy and applicable technologies to ensure sustainable energy availability, accessibility, and affordability to reach emission reduction targets.

The Golden Age of Yachting L. Francis Herreshoff, 2022-06-15 The Golden Age of Yachting presents a panoramic view of yachting, providing an insightful introduction to the pleasures, craft, and history of the sport, with emphasis on the era of the great steam yachts. It is a meticulous account based on accurate knowledge and detailed research. Most yachting histories have been so much influenced by the nationality of the author that the British and American versions are quite different, but L. Francis Herreshoff was equally familiar with both sides. He has

given a much more factual account of the international races than can be found in other writings. This book will appeal to the large group of amateur and professional seamen who strive to keep alive the traditions and lore of sail. The book was first published by Sheridan House in 1963 under the title An Introduction to Yachting and reprinted in 1980. The title of this new paperback edition, The Golden Age of Yachting, more accurately reflects the treasures found in this magnificent volume.

Latin American trade in the age of climate change Amir Lebdioui,2022-05-25 The economic future of Latin America and the Caribbean is intrinsically linked to climate change. In the context of a 21st century that will be marked by climate change and the global fight against it, the status quo is unlikely to help Latin American economies leap forward economically, which calls for a major rethinking of trade and investment strategies in the region. Across the region there is growing evidence of climate change - precipitation patterns are shifting, temperatures are rising, and some areas are experiencing changes in the frequency and severity of weather extremes such as floods and droughts. By 2050, it is estimated that climate change damage could cost USD 100 billion annually to the region. The impact of climate change, which will be more devastating in Latin America than in most parts of the world, also influences the region's ability to trade and its long-term export prospects. A Latin American Green Deal, based on regional coordination to exploit existing synergies and economies of scale, could be the way forward.
