**Animal Traffic** Rosemary-Claire Collard, 2020-08-24 Parrots and snakes, wild cats and monkeys---exotic pets can now be found everywhere from skyscraper apartments and fenced suburban backyards to roadside petting zoos. In *Animal Traffic* Rosemary-Claire Collard investigates the multibillion-dollar global exotic pet trade and the largely hidden processes through which exotic pets are produced and traded as lively capital. Tracking the capture

of animals in biosphere reserves in Mexico, Guatemala, and Belize; their exchange at exotic animal auctions in the United States; and the attempted rehabilitation of former exotic pets at a wildlife center in Guatemala, Collard shows how exotic pets are fetishized both as commodities and as objects. Their capture and sale sever their ties to complex socio-ecological networks in ways that make them appear as if they do not have lives of their own. Collard demonstrates that the enclosure of animals in the exotic pet trade is part of a bioeconomic trend in which life is increasingly commodified and objectified under capitalism. Ultimately, she calls for a "wild life" politics in which animals are no longer enclosed, retain their autonomy, and can live for the sake of themselves.

**The Habana Café Cookbook** Josefa Gonzalez-Hastings, 2004-06-01 Culinary wizard and cafe owner Josefa Gonzalez-Hastings offers this extravagance of Cuban cooking as a celebration of her heritage. Many of the recipes were passed down to her from her mother and aunts; others are nuevo Latino cuisine--a fusion of traditional Cuban foods with modern dishes. Cuban food and preparation always has been varied, she says, flavored by the ancestry of the island, with contributions from Spanish conquistadors, African slaves, Asian laborers, and Indian natives. Of course, she also includes Habana Cafe's standard sides of rice, black beans, and glazed golden-brown plantains. Customer favorites are all represented here in easy-to-follow recipes and colorful photographs--from appetizers and soups, seafood and vegetarian entrees, to classics (Cuban sandwiches and flan) and beverages (mojitos, sangria, cafe con leche, Cuba libre). Gonzalez-Hastings also provides a glossary explaining typical ethnic Cuban ingredients such as bijol, a condiment used to give rice a yellow color; naranja agria, the tart Seville orange often used to marinate meat and make mojo sauce; and malanga, a mild, nutty root that flavors soups and other sauces. In my Cuban family, she writes, two things were always certain-- food and good times. Gonzalez-Hastings shares family stories and photographs of life in pre-Castro Cuba, re-creating the days when Havana was a dining mecca, Ernest Hemingway frequented La Floridita restaurant, and the island gave birth to the daiquiri.

**Pesticides** G. W. A. Milne, 2006-11-03 Chemicals are used worldwide to protect crops and structures, manage pests, and prevent the spread of disease. While beneficial to society, these pesticides can pose human health and environmental risks. Pesticides provides a comprehensive and international collection of data concerning the substances used to repel or mitigate pests ranging from insects, animals and weeds to microorganisms. A valuable feature of this reference is its organization by functional category. The 1,844 chemical entities are divided into the following 17 functional categories: Acaricides, Algicides, Animal Repellants, Bactericides, Bird Repellants, Fungicides, Herbicides, Insecticides, Molluscicides, Nematicides, Piscicides, Plant Growth Regulators, Rodenticides, Safeners, Slimicides, Termiticides and Miscellaneous Chemicals. This compilation provides important chemical and toxicity data for the 1800 substances registered by the US Environmental Protection Agency and used largely in the agricultural environment. The chemical, physical and bioactivity properties of each agent are recorded along with a comprehensive listing of product trade names and synonyms as well as manufacturers. The EPA status of each agent is given and each record carries the appropriate CAS Registry Number and the associated EINECS Number where available. The Merck Index number is provided for all chemicals in this edition which also appear in the 13th edition of the Merck Index. Wherever possible, the following information is also displayed for each entry: melting point, boiling point, density or specific gravity, refractive index, optical rotation, ultraviolet absorption, and solubility as well as chronic and acute toxicities. A key strength of this new reference is the extensive coverage of synonyms. The book includes an index of 28,000 chemical synonyms and trade names with a cross-reference to their main entry. This extraordinarily comprehensive view of trade name and generic synonyms makes Pesticides one of the world's most exhaustive references for agricultural chemical synonyms.

**Talking Back** Evagrius Of Pontus, 2009-08-01 How did the monks of the Egyptian desert fight against the demons that attacked them with tempting thoughts? How could Christians resist the thoughts of gluttony, fornication, or pride that assailed them and obstructed their contemplation of God? According to Evagrius of Pontus (345 '399), one of the greatest spiritual directors of ancient monasticism, the monk should talk back to demons with relevant passages from the Bible. His book Talking Back (Antirrhêtikos) lists over 500 thoughts or circumstances in which

the demon-fighting monk might find himself, along with the biblical passages with which the monk should respond. It became one of the most popular books among the ascetics of Late Antiquity and the Byzantine East, but until now the entire text had not been translated into English. From Talking Back we gain a better understanding of Evagrius's eight primary demons: gluttony, fornication, love of money, sadness, anger, listlessness, vainglory, and pride. We can explore a central aspect of early monastic spirituality, and we get a glimpse of the temptations and anxieties that the first desert monks faced. David Brakke is professor and chair of the Department of Religious Studies in the College of Arts and Sciences of Indiana University. He studied ancient Christianity at Harvard Divinity School and Yale University. Brakke is the author of *Athanasius and Asceticism* and *Demons and the Making of the Monk: Spiritual Combat in Early Christianity*, and he edits the *Journal of Early Christian Studies*.
