Nicolo Cesa-Bianchi, Gabor Lugosi

The Professor, the Banker, and the Suicide King Michael Craig, 2008-06-17 The Players: the best poker professionals in the world The Challenger: a wealthy banker from Dallas The Game: the richest poker stakes of all time... In 2001, a rich stranger from Texas descended upon the high-stakes poker room in the opulent Bellagio casino in Las Vegas. A self-made billionaire by the name of Andy Beal, the stranger challenged some of the world's greatest poker players-including Doyle Brunson, Chip Reese, Howard Lederer, and Jennifer Harman-to heads-up matches in the richest poker game ever played This is that story... Beginning the scintillating contest that would shock the world of poker, Andy and each opponent had \$1 million, betting \$10,000 and \$20,000 per round. As the games intensified over the coming months and Andy developed into a great player, he realized how he could take his adversaries out of their comfort zone-he raised the stakes to put everything they had on the line. By the time the battle of wits ended, there was more than \$20 million on the table. For the first time ever, here is the detailed, true account of the Big Game that has already achieved legendary status in poker lore. Putting you railside to observe the pulse-pounding action, where you can almost hear the distinct sound of clay chips on felt, Michael Craig takes you inside the iron-nerved mind and pathological psyche of the professional gambler. Filled with vivid characters, sensational tales, and riveting human drama, The Professor, the Banker, and the Suicide King is a unique, suspenseful journey into the world of people who live on the razor's edge of fortune-where incredible wealth, or utter ruin, turns on the flip of a card.

Pandas Cookbook Theodore Petrou, 2017-10-23 Over 95 hands-on recipes to leverage the power of pandas for efficient scientific computation and data analysis About This Book Use the power of pandas to solve most complex scientific computing problems with ease Leverage fast, robust data structures in pandas to gain useful insights from your data Practical, easy to implement recipes for quick solutions to common problems in data using pandas Who This Book Is For This book is for data scientists, analysts and Python developers who wish to explore data analysis and scientific computing in a practical, hands-on manner. The recipes included in this book are suitable for both novice and advanced users, and contain helpful tips, tricks and caveats wherever necessary. Some understanding of pandas will be helpful, but not mandatory. What You Will Learn Master the fundamentals of pandas to quickly begin exploring any dataset Isolate any subset of data by properly selecting and querying the data Split data into independent groups before applying aggregations and transformations to each group Restructure data into tidy form to make data analysis and visualization easier Prepare real-world messy datasets for machine learning Combine and merge data from different sources through pandas SQL-like operations Utilize pandas unparalleled time series functionality Create beautiful and insightful visualizations through pandas direct hooks to Matplotlib and Seaborn In Detail This book will provide you with unique, idiomatic, and fun recipes for both fundamental and advanced data manipulation tasks with pandas. Some recipes focus on achieving a deeper understanding of basic principles, or comparing and contrasting two similar operations. Other recipes will dive deep into a particular dataset, uncovering new and unexpected insights along the way. The pandas library is massive, and it's common for frequent users to be unaware of many of its more impressive features. The official pandas documentation, while thorough, does not contain many useful examples of how to piece together multiple commands like one would do during an actual analysis. This book guides you, as if you were looking over the shoulder of an expert, through practical situations that you are highly likely to encounter. Many advanced recipes combine several different features across the pandas library to generate results. Style and approach The author relies on his vast experience teaching pandas in a professional setting to deliver very detailed explanations for each line of code in all of the recipes. All code and dataset explanations exist in Jupyter Notebooks, an excellent interface for exploring data.

Poker & Pop Culture Martin Harris, 2019-06-23 Introduced shortly after the United States declared its independence, poker's growth and development has paralleled that of America itself. As a gambling game with mass appeal, poker has been played by presidents and peasants, at

kitchen tables and final tables, for matchsticks and millions. First came the hands, then came the stories – some true, some pure bluffs, and many in between. In *Poker & Pop Culture: Telling the Story of America's Favorite Card Game*, Martin Harris shares these stories while chronicling poker's progress from 19th-century steamboats and saloons to 21st-century virtual tables online, including: Poker on the Mississippi Poker in the Movies Poker in the Old West Poker on the Newsstand Poker in the Civil War Poker in Literature Poker on the Bookshelf Poker in Music Poker in the White House Poker on Television Poker During Wartime Poker on the Computer From Mark Twain to "Dogs Playing Poker" to W.C. Fields to John Wayne to A Streetcar Named Desire to the Cold War to Kenny Rogers to ESPN to Star Trek: The Next Generation and beyond, *Poker & Pop Culture* provides a comprehensive survey of cultural productions in which poker is of thematic importance, showing how the game's portrayal in the mainstream has increased poker's relevance to American history and shaped the way we think about the game and its significance.

Advances in Artificial Intelligence - SBIA 2008 Gerson Zaverucha, Augusto Loureiro da Costa, 2008-10-08 This book constitutes the refereed proceedings of the 19th Brazilian Symposium on Artificial Intelligence, SBIA 2008, held in Salvador, Brazil, in October 2008. The 27 revised full papers presented together with 3 invited lectures and 3 tutorials were carefully reviewed and selected from 142 submissions. The papers are organized in topical sections on computer vision and pattern recognition, distributed AI: autonomous agents, multi-agent systems and game knowledge representation and reasoning, machine learning and data mining, natural language processing, and robotics.

Artificial Intelligence Lu Fang, Yiran Chen, Guangtao Zhai, Jane Wang, Ruiping Wang, Weisheng Dong, 2022-01-01 This two-volume set LNCS 13069-13070 constitutes selected papers presented at the First CAAI International Conference on Artificial Intelligence, held in Hangzhou, China, in June 2021. Due to the COVID-19 pandemic the conference was partially held online. The 105 papers were thoroughly reviewed and selected from 307 qualified submissions. The papers are organized in topical sections on applications of AI; computer vision; data mining; explainability, understandability, and verifiability of AI; machine learning; natural language processing; robotics; and other AI related topics.

AI 2009: Advances in Artificial Intelligence Ann Nicholson, Xiaodong Li, 2009-11-09 We are pleased to present this LNCS volume, the Proceedings of the 22nd Australasian Joint Conference on Artificial Intelligence (AI2009), held in Melbourne, Australia, December 1-4, 2009. This long established annual regional conference is a forum both for the presentation of research advances in artificial intelligence and for scientific interchange amongst researchers and practitioners in the field of artificial intelligence. Conference attendees were also able to enjoy AI 2009 being co-located with the Australasian Data Mining Conference (AusDM 2009) and the 4th Australian Conference on Artificial Life (ACAL 2009). This year AI 2009 received 174 submissions, from authors of 30 different countries. After an extensive peer review process where each submitted paper was rigorously reviewed by at least 2 (and in most cases 3) independent reviewers, the best 68 papers were selected by the senior Program Committee for oral presentation at the conference and included in this volume, resulting in an acceptance rate of 39%. The papers included in this volume cover a wide range of topics in artificial intelligence: from machine learning to natural language systems, from knowledge representation to soft computing, from theoretical issues to real-world applications. AI 2009 also included 11 tutorials, available through the First Australian Computational Intelligence Summer School (ACISS 2009). These tutorials – some introductory, some advanced – covered a wide range of research topics within artificial intelligence, including data mining, games, evolutionary computation, swarm optimization, intelligent agents, Bayesian and belief networks.

The Intelligent Guide to Texas Hold'em Poker Sam Braids, 2010 This concise, comprehensive guide, on Texas Hold'em Poker is packed with tips and information that players need to know. For beginners, it explains the rules of Texas Hold'em, basic strategy, and how to play in a cardroom. More advanced players, benefit from statistical charts, vignettes from actual poker games, and detailed information on how the social and psychological aspects of the game determine strategy. Readers also learn the unique view that an expert chess player brings to analyzing poker, as author Sam

Braids compares and contrasts the two games. As a special bonus, the book includes an analysis of online poker, instructions on how to use a computer to play Internet poker, and explains the strategic adjustments necessary to succeed online.

Treat Your Poker Like a Business, 2009-12 Poker star Dusty Schmidt presents his first book [– one that stands to shake up poker in the same way Moneyball did for baseball. Schmidt offers an inspiring look at how in just five years, he went from not knowing a thing about poker to netting a seven-figure annual income. Far from a mathematical or technological genius, Schmidt says what guides him through is a fundamental understanding of business. Treat Your Poker Like A Business provides a foundation upon which all poker will be evaluated in the future, and will help an entire generation of poker players evolve their games into empires. A consummate grinder, Dusty Schmidt has played nearly 7 million hands of online poker over more than 10,000 hours during his five-year career. He's won over \$3 million during that period, and has never experienced a losing month. In 2007, he achieved Poker Stars' SuperNova Elite status in just eight months while playing high-stakes cash games exclusively. Schmidt posted the world's highest win rate in both 5/10 NL and 10/20 NL in both 2007 and 2008. In a four-month period between Nov. 2007 and Feb. 2008, Schmidt won in excess of \$600,000 in high-stakes cash games. He is now a highly respected instructor at Stoxpoker.com, and plays as high as 25/50 NL. As a young man, Schmidt was a top-ranked golfer. He broke two of Tiger Woods' junior records, and was the leading money winner on the Golden States Tour when, at age 23, he suffered a career-ending heart attack. Schmidt returned to golf in 2009, winning medalist honors in qualifying for the Oregon Amateur Championship. Later that year, Schmidt famously represented himself in federal court in his suit against the United States Golf Association, which controversially stripped him of his amateur status, in part due to his poker profession. Schmidt is now a volunteer assistant coach for the

University of Oregon's men's golf team, working under his good friend, Head Coach Casey Martin. Schmidt is also a successful entrepreneur. He is part-owner of Stoxpoker.com and Imagine Media, and the creator of 10thGreen.com, the first social network for golfers. His story has been featured in Sports Illustrated, Card Player, Poker News, Golf Magazine, Fairways and Greens, Golf Week, Golf World and the Portland Oregonian, as well as on ESPN, cnn.com, wallstreetjournal.com, forbes.com, fortune.com, espn.com, golfdigest.com and golf.com, among many others. He recently founded the House of Cards Project, a philanthropic effort to provide food and shelter to disadvantaged families. His life story will be told in the book [–Raise: The Impossibly True Tale of Dusty Schmidt, [–? to be released later in 2010. He lives in Portland, Ore., with his wife, Nicole, and daughter, Lennon.

One Jump Ahead Jonathan Schaeffer, 2013-03-09 This extraordinary book tells of the creation of the world-class checkers computer program, Chinook. From its beginnings in 1988, Chinook became a worthy opponent to the world champion and by 1992 had defeated all the world's top human players. In his fascinating account, Jonathan Schaeffer, the originator and leader of the Chinook team, provides an engrossing story of failures and successes. He describes the human story behind Chinook and his own feelings in his continuous effort to improve the program's performance. We follow the development of Chinook from an innocent question asked over lunch, through to the final match against the then world champion, Marion Tinsley. As the story unfolds, readers are introduced to the rules of checkers and the basics of computer game programs, as well as to the key figures in the story. The culmination of this new edition expounds upon checker finally perfected and solved by Chinook ten years after the story was originally told.

Enterprise Information Systems Runtong Zhang, Juliang Zhang, Zhenji Zhang, Joaquim Filipe, José Cordeiro, 2012-05-20 This book contains substantially extended and revised versions of the best papers from the 13th International Conference on Enterprise Information Systems (ICEIS 2011), held in Beijing, China, June 8-11, 2011. The 27 papers included (plus one invited paper) in this volume were carefully reviewed and selected from 57 full papers presented at the conference (out of 402 submissions). They reflect state-of-the-art research that is often driven by real-world applications, thus successfully relating the academic with the industrial community. The topics covered are: databases and information systems integration, artificial intelligence and decision support systems, information systems analysis and specification, software agents and Internet computing, and human-computer interaction.

Kill Phil Blair Rodman, Lee Nelson, Steven Heston, 2009-06 The Kill Phil strategy remains highly effective when used in confrontations with even the world's best players, but tournament play is evolving. This edition reflects the new trends in tournament poker by refining the use of the all-in move and providing adaptations that take into account the new style of hyper-aggressive play.

AI & The Industry Thorsten Bohnenberger, 2023-12-07 Explore the fascinating field of Artificial Intelligence and its profound impact on the industry in this insightful book. With a focus on the positive potentials of AI, the author navigates through the subtleties of this transformative technology. This book aims to empower readers to engage in informed discussions about AI and contribute to business decisions involving its application. The author's collaboration with ChatGPT, a generative AI tool currently gaining a lot of attention, resulted in a well-structured and comprehensive exploration of AI & The Industry. Being a proof of concept of effective human-AI collaboration itself, the book provides a comprehensive AI overview, both readable and informative. Stripped of technical jargon, algorithms, and intricate mathematical formulae, the narrative unfolds in pure English language, making it accessible to a broad audience. This book is an ideal starting point for readers who want to comprehend the versatility of Artificial Intelligence itself as well as its applications in industry. Join the exploration, gain insights, and make AI a joyful part of your reading adventure.

Advances in Artificial Intelligence Ziad Kobti, Dan Wu, 2007-06-22 This book constitutes the refereed proceedings of the 20th Conference of the Canadian Society for Computational Studies of Intelligence, Canadian AI 2007, held in Montreal, Canada, in May 2007. The 46 revised full papers cover agents, bioinformatics, classification, constraint satisfaction, data mining, knowledge representation and reasoning, learning, natural language, and

planning.

The Biggest Bluff Maria Konnikova, 2021-06-08 A New York Times bestseller • A New York Times Notable Book “The tale of how Konnikova followed a story about poker players and wound up becoming a story herself will have you riveted, first as you learn about her big winnings, and then as she conveys the lessons she learned both about human nature and herself.” —The Washington Post It's true that Maria Konnikova had never actually played poker before and didn't even know the rules when she approached Erik Seidel, Poker Hall of Fame inductee and winner of tens of millions of dollars in earnings, and convinced him to be her mentor. But she knew her man: a famously thoughtful and broad-minded player, he was intrigued by her pitch that she wasn't interested in making money so much as learning about life. She had faced a stretch of personal bad luck, and her reflections on the role of chance had led her to a giant of game theory, who pointed her to poker as the ultimate master class in learning to distinguish between what can be controlled and what can't. And she certainly brought something to the table, including a Ph.D. in psychology and an acclaimed and growing body of work on human behavior and how to hack it. So Seidel was in, and soon she was down the rabbit hole with him, into the wild, fiercely competitive, overwhelmingly masculine world of high-stakes Texas Hold'em, their initial end point the following year's World Series of Poker. But then something extraordinary happened. Under Seidel's guidance, Konnikova did have many epiphanies about life that derived from her new pursuit, including how to better read, not just her opponents but far more importantly herself; how to identify what tilted her into an emotional state that got in the way of good decisions; and how to get to a place where she could accept luck for what it was, and what it wasn't. But she also began to win. And win. In a little over a year, she began making earnest money from tournaments, ultimately totaling hundreds of thousands of dollars. She won a major title, got a sponsor, and got used to being on television, and to headlines like How one writer's book deal turned her into a professional poker player. She even learned to like Las Vegas. But in the end, Maria Konnikova is a writer and student of human behavior, and ultimately the point was to render her incredible journey into a container for its invaluable lessons. The biggest bluff of all, she learned, is that skill is enough. Bad cards will come our way, but keeping our focus on how we play them and not on the outcome will keep us moving through many a dark patch, until the luck once again breaks our way.

The Mathematics of Poker Bill Chen, Jerrod Ankenman, 2006 For decades, the highest level of poker have been dominated by players who have learned the game by playing it, road gamblers' who have cultivated intuition for the game and are adept at reading other players' hands from betting patterns and physical tells. Over the last five to ten years, a whole new breed has risen to prominence within the poker community. Applying the tools of computer science and mathematics to poker and sharing the information across the Internet, these players have challenged many of the assumptions that underlay traditional approaches to the game.'

Prediction, Learning, and Games Nicolo Cesa-Bianchi, Gabor Lugosi, 2006-03-13 This important text and reference for researchers and students in machine learning, game theory, statistics and information theory offers a comprehensive treatment of the problem of predicting individual sequences. Unlike standard statistical approaches to forecasting, prediction of individual sequences does not impose any probabilistic assumption on the data-generating mechanism. Yet, prediction algorithms can be constructed that work well for all possible sequences, in the sense that their performance is always nearly as good as the best forecasting strategy in a given reference class. The central theme is the model of prediction using expert advice, a general framework within which many related problems can be cast and discussed. Repeated game playing, adaptive data compression, sequential investment in the stock market, sequential pattern analysis, and several other problems are viewed as instances of the experts' framework and analyzed from a common nonstochastic standpoint that often reveals new and intriguing connections.
