**Aim High** Deborah Lee James, 2019-04-30 Dysfunction abounds in America in so many ways, from continuous turbulent change in the business environment, to a US federal government polarized by an inability to compromise and fulfill its historic missions, to personal levels where even deeper and darker levels of dysfunction reside within our colleagues, families, friends, and ourselves. Can any of us survive and thrive against such a backdrop of unsettledness and anxiety? Deborah Lee James wants to help us try. As the 23rd Secretary and the "CEO" of the male-dominated US Air Force (only the second woman to lead a US military service), Secretary Deborah Lee James led a force of 660,000 people and managed a \$139 billion

budget—larger than the GDP of more than 120 countries. In the midst of unprecedented political dysfunction in Washington, she faced down enormous challenges, including preparing military women and men to fight terror in the Middle East, combatting sexual assault in the military, and responding to a crisis in the nuclear enterprise. In *Aim High: Chart Your Course and Find Success*, Deborah James shares her personal and professional challenges, outcomes, strategies for success, and the problem-solving principles she used to overcome the daunting pressures, threats, and challenges that come with rising to the top of the US Armed Forces. As a supplement to her storytelling, Bain and Company, a top-tier management consulting firm, offers research and statistics that prove James' insights have widespread impact. The book offers an insider's view on how things really work in Washington—and how the author's five-step, repeatable problem-solving approach can work in any walk of life. As a mother and wife, Deborah James carried her insights and problem-solving skills home. For women in similar circumstances, her story will provide a powerful guidebook for excelling in both public and private life, and ensuring that their battles can be won and their challenges overcome.

Mobile Information Retrieval Fabio Crestani, Stefano Mizzaro, Ivan Scagnetto, 2017-07-19 This book offers a helpful starting point in the scattered, rich, and complex body of literature on Mobile Information Retrieval (Mobile IR), reviewing more than 200 papers in nine chapters. Highlighting the most interesting and influential contributions that have appeared in recent years, it particularly focuses on both user interaction and techniques for the perception and use of context, which, taken together, shape much of today’s research on Mobile IR. The book starts by addressing the differences between IR and Mobile IR, while also reviewing the foundations of Mobile IR research. It then examines the different kinds of documents, users, and information needs that can be found in Mobile IR, and which set it apart from standard IR. Next, it discusses the two important issues of user interfaces and context-awareness. In closing, it covers issues related to the evaluation of Mobile IR applications. Overall, the book offers a valuable tool, helping new and veteran researchers alike to navigate this exciting and highly dynamic area of research.

*Pursuing the Triple Aim* Maureen Bisognano, Charles Kenney, 2012-05-01 Written by the President and CEO of the Institute for Healthcare Improvement (IHI) and a leading health care journalist, this groundbreaking book examines how leading organizations in the United States are pursuing the Triple Aim—improving the individual experience of care, improving the health of populations, and reducing the per capita cost of care. Even with major steps forward – including the Affordable Care Act and the creation of the

Center for Medicare and Medicaid Innovation -- the national health care debate is too often poisoned by negativity. A quieter, more thoughtful, and vastly more constructive conversation continues among health care leaders and professionals throughout the country. Innovative solutions are being designed and implemented at the local level, and countless health care organizations are demonstrating breakthrough remedies to some of the toughest and most expensive challenges in health care. Pursuing the Triple Aim shares compelling stories that are emerging in locations ranging from Pittsburgh to Seattle, from Boston to Oakland, focused on topics including improving quality and lowering costs in primary care; setting challenging goals to control chronic disease with notable outcomes; leveraging employer buying power to improve quality, reduce waste, and drive down cost; paying for care under an innovative contract that compensates for quality rather than quantity; and much more. The authors describe these innovations in detail, and show the way toward a health care system for the nation that improves the experience and quality of care while at the same time controlling costs. As the Triple Aim moves from being largely an aspirational framework to something that communities all across the US can implement and learn from, its potential to become a touchstone for the work ahead has never been greater. Pursuing the Triple Aim lays out the vision, the interventions, and promising examples of success.

**Aim High** Marc Y. Chenevert, 2009-11-23 Aim High is my true story of coming to terms with being gay—most of which occurred while I was a member of the US Air Force as an air traffic controller. This book serves as a prime example of why the military's "Don't ask, don't tell" policy (regarding gays in the military) needs to and should be eliminated in favor of a fair and fully accepting one. With

the launch of Aim High, I am also committing myself to do all that I can to further this cause until it becomes a reality. Meanwhile, fasten your seatbelts!

*Workshops Proceedings of the 5th International Conference on Intelligent Environments* M. Schneider,A. Kröner,J.E. Alvarado,2009-10-02 Advances in the engineering of sensing and acting capabilities distributed in wide range of specialized devices is providing at last an opportunity for the fundamental advances that computer science achieved in the past few decades to make an impact in our daily lives. This technical confluence is matched by a unique historical context where users are

better informed (more aware of the benefits that technology can provide) and production of more complex systems is becoming more affordable. Sensors/actuators deployed in an environment (in this context it can be any physical space like a house, office, classroom, car, street, etc.) facilitate a link between an automated decision-making system connected to that technologically enriched space. This computing empowered environment enables the provision of an intelligent environment, i.e., a digital environment that proactively, but sensibly, supports people in their daily lives. This is an active area of research which is attracting an increasing number of professionals (in academia and industry) worldwide. The prestigious 5th International Conference on Intelligent Environments (IE'09) is focused on the development of advanced intelligent environments and stimulates the discussion on several specific topics which are crucial to the future of the area. As part of that five workshops were supported as part of IE'09. This volume is the combined proceedings of those five workshops: Workshop on Digital Object Memories (DOME'09), Workshop on RFID Technology: concepts, practices & solutions (RFID'09), Workshop on Artificial Intelligence Techniques for Ambient Intelligence (AITAmI'09), Workshop on Ethical Design of Ambient Intelligence (EDAmI'09), Workshop on Smart Offices and Other Workplaces (SOOW'09).

**Jugaad Time** Amit S. Rai, 2019-02-05 In India, the practice of jugaad—finding workarounds or hacks to solve problems—emerged out of subaltern strategies of negotiating poverty, discrimination, and violence but is now celebrated in management literature as a disruptive innovation. In *Jugaad Time* Amit S. Rai explores how jugaad operates within contemporary Indian digital media cultures through the use of the mobile phone. Rai shows that despite

being co-opted by capitalism to extract free creative labor from the workforce, jugaad is simultaneously a practice of everyday resistance, as workers and communities employ hacks to oppose corporate, caste, and gender power. Locating the tensions surrounding jugaad—as both premodern and postdigital, innovative and oppressive—Rai maps how jugaad can be used to undermine neoliberal capitalist media ecologies and nationalist politics.
