**The New Threat of Type 3 Diabetes** Alan D. Raguso,Maria Lizotte RN BSN CDE,2018-11-08 The American diet is typically high in sugar consumption and extremely acidic. In *The New Threat of Type 3 Diabetes*, authors Alan D. Raguso and Maria Lizotte offer an understanding of diabetes, discussing why people's health declines and why they get sick. Based on their personal and professional experiences with diabetes, they discuss concepts of body chemistry, look at inflammation as a health risk, and share how it's a result of improper food intake, heredity, and environmental conditions, along with economics, poor pH balance, lack of moderate exercise, and the modern technological world. Raguso and Lizotte tell how type 3 diabetes is a newly accepted category, connecting a lifetime of damage caused by excessive blood sugar levels. With illustrations and graphics included, *The New Threat of Type 3 Diabetes* reviews the basic definitions of medical terms, the possible connections to prediabetes, type 2 and type 3 diabetes, and the steps that can be taken to prevent or reverse these diseases. Raguso and Lizotte suggest ways to make simple changes to live more healthily, better, and longer.

**Diabetes without Drugs** Suzy Cohen,2010-11-09 Based on breakthrough studies, Cohen's program reveals how people with diabetes can reduce their need for prescription medication and minimize the disease's effect on the body. Most doctors consider diabetes a one-way street—once you have it, your only option is to manage the symptoms with a restricted diet, close monitoring of blood sugar, and expensive medications. Pharmacist Suzy Cohen shows that diabetes can be treated instead through safe, natural means, like food and vitamins, rather than strictly relying on prescription drugs. She shifts the focus away from glucose management to a whole body approach, using supplements, minerals, and dietary changes to lose weight, repair cell damage, improve insulin function, and reduce the side effects from prescription drugs, many of which rob nutrients from the body and cause additional symptoms. This 5-step program uses natural alternatives, such as drinking nutrition-packed green drinks, adding vitamin D and anti-inflammatory

supplements, increasing fiber intake, and including minerals in the diet to help restore the body's own supply of insulin. Diabetes without Drugs explains how patients can protect their heart, kidneys, eyesight, and limbs from the damage often caused by diabetes and shows the impact that the right foods and the right supplements can make in reducing blood sugar levels, aiding weight loss, and restoring vibrant health to everyone with diabetes.
