Saving Ourselves: Interviews With World Leaders On The Sustainable Transition Belhaj-bouabdallah Yacine,2017-03-09 Sustainability is going to be one of the most important issues of the coming decades. For the first time, institutions at all levels, public and private, national and international, are teaming up to combat climate change and to promote more sustainable societies. In this book, Yacine Belhaj-Bouabdallah interviews heads of states, politicians, religious leaders, leading academics, diplomats, CEOs, and heads of NGOs to make the challenges and solutions facing us more understandable to everyone. Covering issues such preserving biodiversity, improving our food systems, building sustainable cities, and promoting good governance, Saving Ourselves aims to show that though we are facing some unprecedented challenges, we are also at a critical point in time to take advantage of all the opportunities sustainable development provides. Through interviews with 90 world leaders, this book sheds light on the different arguments presented in the fight to save our planet. The contributors include, Prime Minister Justin Trudeau of Canada, President Michelle Bachelet of Chile, Prime Minister Sheikh Hasina of Bangladesh, President Ameenah-Gurib Fakim of Mauritius, President Marie Louise Coleiro Preca of Malta, Prime Minister Enele Sopoaga of Tuvalu, 6 former heads of states/governments, 5 mayors, 7 ministers, 2 Nobel Prize winners, leading academics, and the heads of organisations such as WWF International, Oxfam International, the IUCN, Unilever, and the World Business Council on Sustainable Development.

Quantitative Analysis of Poetic Texts Ioan-Iovitz Popescu,Mihaiela Lupea,Doina Tatar,Gabriel Altmann,2015-07-01 The book presents methods for the objective analysis of poetic language. Common objects of literary studies such as rhythm, semantic explications, interpretation and personal impressions are avoided. Only those properties of poetic texts are taken into account that could be quantified. For all methods both statistical tests, theoretical derivations, and examples are presented.
