AIR CRASH INVESTIGATIONS, LOST OVER THE ATLANTIC The Crash of Air France Flight 447 THE FINAL REPORT George Cramoisi, editor, 2012-09-01 On 31 May 2009, the Airbus A330 flight AF 447 took off from Rio de Janeiro Galeo airport bound for Paris Charles de Gaulle. At around 2 h 02, the Captain left the cockpit for a short nap. At around 2 h 08, at flight level 350, the crew made a course change of 12 degrees to the left, to avoid bad weather. At 2h 10min 05, likely following the obstruction of the Pitot probes by ice crystals, the speed indications were incorrect and some automatic systems disconnected. The aeroplane's flight path was not controlled by the two copilots. They were rejoined 1 minute 30 later by the Captain, while the aeroplane was in a stall situation that lasted until the impact with the sea at 2 h 14 min 28 s, killing all 228 persons on board. It took almost two years to recover the wreck of the aircraft from a depth of 4.000 metres. The accident resulted from a succession of events, such as inconsistency between the measured airspeeds, inappropriate control inputs, and the crew's failure to diagnose the stall situation

Air France Geoff Jones, 2008 Air France is one of the world's great airlines. It is a French institution with its own unique style, part of the fabric of the country as well as being the national flag carrier. This history of Air France is published in the 75th anniversary year of its foundation, and it is as much a slice of French social history as it is an aviation title. This book covers the many airlines that were associates of Air France in recent years and the diverse aircraft types and airlines that provide the current national and sometimes international feeds to Air France's main hubs at Paris Charles de Gaulle, Orly, and Lyons.

On final approach, the aircraft's weather radar was displaying heavy precipitation encroaching on the runway from the northwest. The aircraft touched down 3800 feet down the runway, and was not able to stop before the end of it. The aircraft stopped in a ravine and caught fire. All passengers and crew members were able to evacuate the aircraft on time. Only 2 crew members and 10 passengers were seriously injured during the crash and the evacuation.
