Safety and Health in Confined Spaces Neil McManus,2018-12-18 Safety and Health in Confined Spaces goes beyond all other resources currently available. International in scope, the 15 chapters and 10 appendices cover every facet of this important subject. A significant addition to the literature, this book provides a confined space focus to other health and safety concepts. Confined spaces differ from other workspaces because their boundary surfaces amplify the consequences of hazardous conditions. The relationship between the individual, the boundary surface, and the hazardous condition is the critical factor in the onset, outcome, and severity of accidents in these workspaces. The author uses information about causative and other factors from analysis of fatal accidents to develop a hazard assessment and hazard management system. He provides a detailed, disciplined protocol, covering 36 hazardous conditions, that addresses all segments of work--the undisturbed space, entry preparation, work activity, and emergency preparedness and response--and illustrates how to use it. Safety and Health in Confined Spaces gives you the tools you need for preventing and responding to accidents.

No Breaks Roddy McDougall,2021-05-03 No Breaks: A Lost Season in British Speedway is a story of survival. Once the country's second most popular sport, filling Wembley Stadium for meetings, speedway now gets by on crowds numbered in the hundreds. It's been banished to industrial estates in towns like Redcar and Scunthorpe and generally forgotten by the mainstream media. And yet, going into 2020, things were looking up: several star riders were returning to race in Britain for the first time in years and a new, long-term TV contract was in place. Then the coronavirus lockdown happened, cancelling the league season and threatening the sport's very existence. Starting in September 2019, No Breaks hears from those who earn a living from speedway - the riders - and those who continue to keep it alive against the odds: the promoters and fans. Month by month, the book explores British speedway's current health - itself a reflection of wider society - while shining a much-needed light on many compelling and positive stories.

**Sailing to Jessica** Kelly Watts,2012-11-16 At 35-years old, Kelly and Paul Watts sold their home and quit their jobs to sail around the world, without any sailing experience. Two days after purchasing their forty-two-foot sloop, they got caught in a forty-knot gale off the coast of Cape Fear, NC. Their sails ripped; the engine overheated; the GPS broke; they suffered hypothermia and severe seasickness. And yet they persevered on their journey, discovering the playful sea lions of the Galapagos, the seductive dance of the Polynesian girls, and the primitive beat of Tuvaluan music, all while learning how to sail and repair their boat. They narrowly avoided a shark attack in Suwarro, fled from suspected pirates off the coast of Ecuador, and hit a submerged container - the fear of all sailors - near Midway Island. What started as a search to find meaning to "life without children," only strengthened their desire to have a family. After fertility attempts failed in America and New Zealand, they unexpectedly adopted a two-month old baby in Kiribati. And so began the adventure of raising a baby on a boat in the middle of the Pacific, battling Dengue Fever and an epidemic of e-coli., almost losing their lives in a 60-knot westerly gale and navigating through the maze of international adoption paperwork. Told from Kelly's conversational point of view, "Sailing to Jessica" will inspire anyone who is searching for meaning in their life to get up and find it.
