Technical Abstract Bulletin ,

Romans and Christians AD 64 Andrea Lorenzo Molinari,2009-01-01 Romans and Christians AD 64 is an experiential learning module for use by youth ministers, campus ministers, and teachers of church history. It is designed to be used to present the subjects of martyrdom and persecution in the early church. It has been extensively play-tested and has proven very effective with junior-high and high-school students, and even with college-age students and older adults. This play-testing has determined that Romans and Christians AD 64 works best as an intergenerational learning experience or as intergenerational catechesis. Romans and Christians AD 64 has three components. First, it provides a general introduction to the subjects of martyrdom and persecution in the early church, complete with specific analyses of several important ancient documents and lists of primary sources such as apologies, martyrologies, and exhortations to martyrdom. Second, after laying this historical groundwork, the module explains how to play a role-playing game that offers a chance to reenact the famous Neronic Persecution of AD 64. Third, a DVD (an audiovisual rulebook) accompanies the game. The DVD explains the game using words and real game footage. This experiment in experiential learning allows participants to work through in an entertaining and memorable format the historical dynamics that the early church faced.

Danger Sound Klaxon! Matthew F.

Jordan, 2023-02-15 Danger Sound Klaxon! reveals the untold story of the Klaxon automobile horn, one of the first great electrical consumer technologies of the twentieth century. Although its metallic shriek at first shocked pedestrians, savvy advertising strategies convinced consumers across the United States and western Europe to adopt the shrill Klaxon horn as the safest signaling

technology available in the 1910s. The widespread use of Klaxons in the trenches of World War I, however, transformed how veterans heard this car horn, and its traumatic association with gas attacks ultimately doomed this once ubiquitous consumer technology. By charting the meteoric rise and eventual fall of the Klaxon, Matthew Jordan highlights how perceptions of sound-producing technologies are guided by, manipulated, and transformed through advertising strategies, public debate, consumer reactions, and governmental regulations. Jordan demonstrates in this fascinating history how consumers are led toward technological solutions for problems themselves created by technology.

Conservative Political Communication Sharon E. Jarvis,2021-04-14 Conservative Political Communication examines the evolution of appeals, media, and tactics in right-wing media and political communication, tracking trends and shifts from the early days of contemporary conservatism in the 1950s to the Trump administration. The chapters in this edited volume feature the work of senior and junior scholars from the fields of communication, journalism, and political science employing content analytic, experimental, survey, historical, and rhetorical research methodologies. Analyses of the rise of the 24-hour news cycle, the range of partisan news sources, and the role of social media algorithms in political campaigns yield insights for our

media and information ecosystems. A key theme across these chapters is how right-wing channels and communications help and hinder partisan fragmentation, a condition whereby novice elected officials create personal conservative brands, appeal to the base through partisan media, and complicate senior leadership's ability to engage in bargaining, compromise, and deal-making. This volume interrogates conservative media and messaging to track where these processes came from, how they functioned in the 2016 U.S. presidential campaign, and where they may be going in the future. This book will interest scholars and upper-level students of political communication, media and politics, and political science, as well as readers invested in today's political media landscape in the United States.
