Airfix Model World Basic Guide to Modelling Stuart Fone, 2022-11 This how-to guide takes you step by step through the art and skill of creating models. Showing everything from best varnishes to use, how to apply light, and what tools you need, this is an essential guide for any novice or returning modeler.

The Boys' Book of Airfix Arthur Ward, 2009 Airfix is the most famous plastic model construction kit company in the world. This title packs with photos of the kits from the 1950s. It provides the story of the dramatic twists and turns of the Airfix saga.

Sixty Years of Airfix Models Jeremy Brook, 2015-06-30 The best-known and most important manufacturer of plastic model kits in the UK, Airfix has been at the forefront of the industry since 1955 when the first Airfix aircraft kit appeared in UK branches of Woolworth's. The kits were made to a constant scale and covered a wide variety of subjects, from aircraft to birds and from tanks to dinosaurs. In 1981 the famous London-based company closed down and only the kits survived intact. For the next twenty-five years Airfix was run by Palitoy and later Humbrol, but suffered from a lack of investment. In 2006, Hornby Hobbies Ltd, the train and Scalextric manufacturer, bought the ailing company and transformed it. Money and resources were ploughed into the range, and today Airfix releases around twenty new kits per year, designed to an incredibly high standard. The old kits of the 1950s and 1960s are gradually being replaced by new state-of-the-art tooling, all bearing that most prestigious name - Airfix. Published to coincide with the sixtieth anniversary of the first Airfix aircraft kit, *Sixty Years of Airfix Models*, tells the full story, year by year, of the company and its products. Illustrated throughout with colour photographs of kits, box art and completed models.

The Airfix Book of Scale Modelling Jonathan Mock, 2014-02-06 The Airfix Book of Scale Modelling is the essential guide to getting the most out of this fascinating and rewarding hobby, explaining how to build scale models to suit all levels of modelling skill. With full colour photography throughout, the book covers the history of modelling and of the Airfix company, and shows how injection moulded kits are made. It then describes and reviews the major modelling scales, as well as outlining the range of paints, tools and accessories that are available. Chapters include guides to choosing a kit, tools for the job, painting, decals, conversions, figure-painting, dioramas and more. Common problems and how to solve them are addressed, and there is also a series of step-by-step construction projects, including expert builds of the F86 Sabre jet, the Aston Martin DBR9, a Panzer IV tank, the Airfix yeoman figure (reissued for the London 2012 Olympics), a Trafalgar class submarine and a scenic diorama.

Classic Kits Arthur Ward, 2004 This fun book treats you to a nostalgic look at the history of model kits from worldwide manufacturers over the last 75 years. Classic Kits revisits our favourite model kits whether they were tanks, ships, aircraft, spaceships or tractors. With superb photography of boxes, magazines, kits and ephemera Arthur Ward reminds us all of a time when pocket money was spent on a Spitfire after school, which was assembled by tea time and destroyed, in an imaginary but fierce air battle, by bed-time. Arthur Ward, with his expert knowledge, reveals the histories of the companies behind the kits we all loved, while at the same time giving us a fun look at our favourite models. Book jacket.

Creating a Military Modelling Diorama Terry Booker, 2021-07-26 Creating a diorama offers modellers a chance to display their figures and vehicles in a realistic setting, often providing a 'snapshot' of a moment in history. This book provides step-by-step instructions on how to plan, design and build a diorama and is suitable for new and more experienced modellers. With over 270 colour photographs, it considers all scales from 1/87 (H0) to 1/32 and their implications for the diorama builder. The importance of research to ensure historical accuracy is emphasized. Advice is given on the creation of dioramas in different scales and sizes. It demonstrates the techniques required to achieve effective results for landscapes, terrain and vegetation. Finally, examples are included from the Napoleonic Wars, American Civil War, World War I and World War II.

Scale Car Modelling Mat Irvine, 2012-05-01 Cars have always appealed as model subjects as - unlike aeroplanes or military subjects - the real thing is likely to be sitting outside the modeller's house. From the first car kits produced in the early 1950s, mainly dominated by American machinery, we now have a choice of automotive examples from around the world. The joint scale of 1:24/1:25 dominates car models, and it is these scales that will mostly be found in this book, from stock builds to race cars to wild customs. In addition, although injection styrene is the main material of choice, there are specialist builds using resin, white metal and photo-etched parts. The book includes detailed step-by-step guides for Building 'out of the box'; Customs and conversions; Applying decals; Dealing with resin; Wiring and engines; Salvaging old kits; A dented ride for 007; NASA's Hot Road; Dirtying a dirt track racer; An alien homage to Roth.

The Other Side Of Airfix Arthur Ward, 2013-02-18 Airfix is synonymous with plastic model kits. The brand name has virtually become a noun, occupying a special place in that lexicon of trade names alongside Hoover, Sellotape, Perspex and Aqua-Lung. Throughout the war years Airfix survived on government contracts for a whole range of plastic items and by virtue of Kove's tenacious appetite for business and doing a deal. By the war's end Airfix was the market leader in plastic injection moulded combs in Britain. By the time Airfix had released its first proper construction kit, a tiny model of Drake's flagship Golden Hind, in 1952, the firm was well established as a leading toy brand. Indeed throughout the 1950s, 60s and 70s Airfix invested heavily in developing new toys or manufacturing them under license for large US toy companies such as Hasbro. Very soon Airfix extended its activities beyond toys into games and arts and crafts and in short time famous names. Indeed so successful was Airfix at diversifying that by the 1970s the company had grown to such an extent that it had acquired other famous toy brands including Dinky Toys, Tri-ang, Meccano, and Romper Room. With its subsidiary Crayonne Airfix even harnessed the design talents of the then Terence Conran in attempt to elevate plastic products to the rarified atmosphere of designer chic. So there's a lot more to Airfix than many might think and this book is the first attempt to document the myriad successful lines, outside of plastic kits, which contributed to the company's dramatic growth before a combination of factors forced it into brief liquidation in 1981. Written by someone with a lifetime's fascination for Airfix and who has written other books about the better known construction kit side of the business, *The Other Airfix* is a nostalgic trip down memory lane.

Forty Years of Airfix Toys Jeremy Brook, 2019-04-09 Airfix acquired the first plastic injection moulding machine in the U.K. in the mid 1940's and was soon manufacturing vast numbers of plastic toys. By 1981, when Airfix's financial woes led to takeover and the end of all production save for plastic model kits, it had made a wide variety of toys, games, arts, crafts, building sets, racing sets, model trains and even Meccano and Dinky toys. Profusely illustrated with over three hundred photographs, *Forty Years of Airfix Toys* gives the full history of the Airfix toy range including year-by-year listings of all the toys sold by Airfix; logs and packaging; Airfix's magazines and a full listing of Airfix pattern numbers. It is a comprehensive guide to the history of the toys produced by the iconic brand Airfix.

Airfix Kits Trevor Pask, 2011-08-20 With the aid of stringy glue and scalpel-sliced fingers, young and old have turned display cabinets and bedrooms into mini-museums, or tiny battlefields. This book looks at the fascinating tale of this British company a pioneer in the world of modelling as well as its products, its changing fortunes over the years, and its links with popular culture. Using colour images, Trevor Pask explores this thriving pastime, allowing Airfix kit lovers to indulge in a nostalgic journey and those new to the hobby an intriguing insight into its history.

Airfix Arthur Ward, 2003 This title aims to enable everyone to relive the glory days of the Airfix plastic air forces (or tank fleets) and perhaps to pass the torch to their children. Photographs show the rare and collectible kits as well as the best sellers, with illustrations of the packets, box art, adverts in 1960s and 1970s magazines, and a mass of period ephemera. The accompanying text charts the rise, fall and rise again of Airfix

models. are now re-releasing 40 kits a year, bringing back some not seen for 20 years.

Make: Technology on Your Time Volume 28 Mark Frauenfelder, 2011-10-25 The first magazine devoted entirely to do-it-yourself technology projects presents its 28th quarterly edition for people who like to tweak, disassemble, recreate, and invent cool new uses for technology. Express your inner child with MAKE Volume 28, featuring toys and games. Any maker can tell you that lots of experimentation and play time are essential to developing brainpower and creativity. Model Soldiers Martin Windrow, Gerry A. Embleton, 1976

The Art of Roy Cross Roy Cross, 2019-12-05 Roy Cross RSMA GAvA began work as an illustrator in Fairey Aviation during World War II. Over the next thirty years, he progressed from line illustration, via colour artwork, to top-class advertising art for the aircraft industry and other companies, including Airfix, for whom he produced many hundreds of artworks to adorn model kit boxes over a ten-year period. His illustrations for Airfix included superb depictions of aircraft, cars, ships, spacecraft, armoured vehicles and dioramas. Though Roy is perhaps most famous for his Airfix box art, his work has encompassed book and magazine illustrations, including highly detailed cutaways and other technical drawings. In more recent years, Roy has concentrated on the production of his magnificent maritime paintings.

The Hawker Hunter Martin W. Bowman, 2020-07-22 A “well-done” pictorial history of the legendary fighter plane “that both enthusiasts and modelers alike will enjoy” (ModelingMadness). If ever there was a real pilot’s airplane it was the Hunter: an outstanding multipurpose aircraft which excelled in the roles of interceptor fighter, ground attack, reconnaissance, research vehicle, and two-seater trainer, not forgetting its dramatic formation aerobatic performances. For decades, pilots have enthused about the Hunter, extolling the virtues of its smooth, aerodynamic lines, 4 x 30mm cannon, the Rolls-Royce Avon engine, and its outstandingly honest handling characteristics combined with a lively performance. It saw operational deployment in Europe with Fighter Command and 2nd TAF, in Cyprus, the Middle East, and the Far East, operating in the ground-attack role against rebels in Aden and Malaysia respectively. The Hunter was a classic thoroughbred of its time, from the stables of one of the finest fighter manufacturers in the world and, for fifty years, its adaptability was rarely challenged. Although the last example was retired in July 2001, the Hunter legend undoubtedly lives on, with 114 potentially air-worthy airframes located in fourteen countries around the world. Here, the legendary tale of the Hunter is told in words and images.

Western Class Locomotives Bernard Mills, 2022-08-31 Unusually for a large class of locomotives, all Western Class locomotives had the same prefix which gave them a unique identity. Redesignated as Class 52 in the early 1970s, they were essentially designed by and for the Western Region, which saw hydraulic transmission as the way forward in replacing the 4-6-0 steam locomotives that Swindon had produced. However, the rest of British Rail went down the road of electric transmission as the mistakes of the wholesale lunge into dieselization came to fruition, and when BR opted for a standard policy the Western Region was forced to comply. It was in 1967 that the death warrant for the hydraulics was signed, though it would take more than a decade to finally end the hydraulic era. Illustrated with full-color photographs of all 74 of the Western Class locomotives, on a variety of workings that illustrate their versatility, this nostalgic volume gives a portrait of a much-loved, but short-lived, class of locomotive.

The Schneider Trophy Air Races Jerry Murland, 2021-09-15 The history of the Schneider Trophy is the history of aircraft development. When Jacques Schneider devised and inaugurated the Coupe d’Aviation Maritime race for seaplanes in 1913, no-one could have predicted the profound effect the Series would have on aircraft design and aeronautical development, not to mention world history. Howard Pixton’s 1914 victory in a Sopwith Tabloid biplane surprisingly surpassed the performance of monoplanes and other manufacturers turned back to biplanes. During The Great War aerial combat was almost entirely conducted by biplanes, with their low landing speeds, rapid climb rates and maneuverability. Post-war the Races resumed in 1920. The American Curtiss racing aircraft set the pattern for the 1920s, making way for Harold Mitchell’s Supermarines in the 1930’s. Having won the 1927 race at Venice Mitchell developed his ground-breaking aircraft into the iconic Spitfire powered by the Rolls-Royce Merlin engine. This new generation of British fighter aircraft were to play a decisive role in defeating the Luftwaffe and thwarting the Nazis’ invasion plans. This is a fascinating account of the air race series that had a huge influence on the development of flight.

F-111 Bob Archer, 2022-05-19 When introduced, the F-111 was a revolutionary aircraft and extremely popular. Capable of delivering a wide variety of ordnance, it was arguably one of the best tactical aircraft of its time. With 180 photos, this book covers the operational period of the F-111 Aardvark and EF-111 Raven from the 1960s through to eventual retirement in the 1990s.

Tank Destroyer, Achilles and M10 Dennis Oliver, 2019-04-30 A guide that blends the history behind this British World War II tank with resources for military vehicle modeling enthusiasts. In this heavily illustrated volume in the TankCraft series Dennis Oliver focuses on the Achilles—the British variant of the American M10—which was one of the most important Allied tank destroyers of the Second World War. It played a key role in the armored battles fought on the Western Front, in particular in France, the Low Countries, Germany and Italy. Built on an adapted Sherman chassis, with sloped armor, an open-topped turret and powerful 17-pounder gun, it was designed to counter the threat posed by the formidable panzers deployed by the German army toward the end of the conflict, in particular the Panther and Tiger tanks. The book covers the design and operational history of the Achilles in close detail, using rare archive photographs and meticulously researched color illustrations, as well as a detailed, authoritative text. A key section displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeler needs to recreate an accurate representation of these historic armored fighting vehicles. Praise for Tank Destroyer, Achilles and M10 “Covers the design and operational history of the Achilles in close detail, using rare archive photographs and meticulously researched color illustrations, as well as a detailed, authoritative text.” –Military Vehicles “Gamers will find this book a useful reference and painting guide.” –The Miniatures Page

Wade McClusky and the Battle of Midway David Rigby, 2019-05-30 During the Battle of Midway in June 1942, US Navy dive bomber pilot Wade McClusky proved himself to be one of the greatest pilots and combat leaders in American history, but his story has never been told – until now. It was Wade McClusky who remained calm when the Japanese fleet was not where it was expected to be. It was he who made the counterintuitive choice to then search to the north instead of to the south. It was also McClusky who took the calculated risk of continuing to search even though his bombers were low on fuel and may not have enough to make it back to the Enterprise. His ability to remain calm under enormous pressure played a huge role in the US Navy winning this decisive victory that turned the tide of war in the Pacific. This book is the story of exactly the right man being in exactly the right place at exactly the right time. Wade McClusky was that man and this is his story.
