E-Commerce and Web Technologies Kurt Bauknecht,Min A Tjoa,Gerald Quirchmayr,2002-08-21 The Third International Conference on E-commerce and Web Technology (EC-Web 2002) was held in conjunction with the DEXA 02 in Aix-en-Provence, France. This conference, first held in Greenwich, United Kingdom in 2000, is now in its third year and is very well established. As in the two previous years, it served as a forum bringing together researchers from academia and commercial developers from industry to discuss the current state of the art in E-commerce and web technology. Inspirations and new ideas emerged from intensive discussions during formal sessions and social events. Keynote addresses, research presentations, and discussions during the conference helped to further develop the exchange of ideas among the researchers, developers, and practitioners who attended. The conference attracted more than 100 submissions and each paper was reviewed by at least three program committee members. The program committee selected 40 papers for presentation and publication, a task which was not easy due to the high quality of the submitted papers. We would like to express our thanks to our colleagues who helped to put together the technical program: the program committee members and external reviewers for their timely and rigorous reviews of the papers, and the organizing committee for their help in the administrative work and support. We owe special thanks to Gabriela Wagner and Maria Schweikert for always being available when their helping hand was needed.

Economics and Artificial Intelligence Jean-Louis Roos,2014-05-09 Economics and Artificial Intelligence documents the proceedings of the IFAC/IFORS/IFIP/IASC/AFCET Conference held in Aix-en-Provence, France on September 2-4, 1986. This book discusses the design of intelligent dialogue in D.S.S. qualitative modeling of economic studies; basic propositions for intelligent systems design methods; and expert systems

for confirmatory data analysis. The artificial intelligence for transaction cost economizing; knowledge-based evaluation of strategic investments; and reasoning system for the guidance of technological transfer are also elaborated. This text likewise covers the A.I. impacts on the process of the division of labor; using automated techniques to generate expert systems for R&D project monitoring; and intelligent support to decision making process. This compilation is a good reference for students and researchers conducting work on the nature of economics and artificial intelligence.

Database and Expert Systems Applications Abdelkader Hameurlain,Rosine Cicchetti,Roland Traunmüller,2003-08-02 th 2002 DEXA, the 13 International Conference on Database and Expert Systems Applications was held on September 2-6, 2002, at the Université Aix-Marseille II, France. The quickly growing field of information systems required the establishment of more specialized discussion platforms (the DaWaK conference, EC-Web conference, eGOV conference and DEXA workshops), and there were held in parallel with DEXA, also in Aix-en-Provence. The resulting book was prepared with great effort. Starting with the preparation of submitted papers, the papers went through the reviewing process. The accepted papers were revised to final versions by their authors and arranged to the conference program. This year 241 papers were submitted and our thanks go to all who have contributed. The program committee and the supporting reviewers produced altogether about 730 referee reports, on average three reports per paper, and selected 89 papers for presentation. The papers presented here encompass the extensive domain of databases; together with the other conferences and workshops of the DEXA event cluster a vast part of applied computer science was covered. In this way DEXA has blazed the trail. At this point we would like to acknowledge to all institutions which actively supported this conference and made it possible. These are: • IUT (Université Aix - Marseille II), • FAW, • DEXA Association, • the Austrian Computer Society, • and Microsoft Research

Handbook of Digital Public History Serge Noiret,Mark Tebeau,Gerben Zaagsma,2022-04-04 This handbook provides a systematic overview of the present state of international research in digital public history. Individual studies by internationally renowned public historians, digital humanists, and digital historians elucidate central issues in the field and present a critical account of the major public history accomplishments, research activities, and practices with the public and of their digital context. The handbook applies an international and comparative approach, looks at the historical development of the field, focuses on technical background and the use of specific digital media and tools. Furthermore, the handbook analyzes connections with local communities and different publics worldwide when engaging in digital activities with the past, indicating directions for future research, and teaching activities.

Bayesian Networks Olivier Pourret,Patrick Naïm,Bruce Marcot,2008-04-30 Bayesian Networks, the result of the convergence of artificial intelligence with statistics, are growing in popularity. Their versatility and modelling power is now employed across a variety of fields for the purposes of analysis, simulation, prediction and diagnosis. This book provides a general introduction to Bayesian networks, defining and illustrating the basic concepts with pedagogical examples and twenty real-life case studies drawn from a range of fields including medicine, computing, natural sciences and engineering. Designed to help analysts, engineers, scientists and professionals taking part in complex decision processes to successfully implement Bayesian networks, this book equips readers with proven methods to generate, calibrate, evaluate and validate Bayesian networks. The book: Provides the tools to overcome common practical challenges such as the treatment of missing input data, interaction with experts and decision makers, determination of the optimal granularity and size of the model. Highlights the strengths of Bayesian networks whilst also presenting a discussion of their limitations. Compares Bayesian networks with other modelling techniques such as neural networks, fuzzy logic and fault trees. Describes, for ease of comparison, the main features of the major Bayesian network software packages: Netica, Hugin, Elvira and Discoverer, from the point of view of the user. Offers a historical perspective on the subject and analyses future directions for research. Written by leading experts with practical experience of applying Bayesian networks in finance, banking, medicine, robotics, civil engineering, geology, geography, genetics, forensic science, ecology, and industry, the book has much to offer both practitioners and researchers involved in statistical analysis or modelling in any of these fields.

Covenantal Apologetics K. Scott Oliphint,2022-01-14 Defending the faith can be daunting, and a well-reasoned and biblically grounded apologetic is essential for the challenge. Following in the footsteps of groundbreaking apologist Cornelius Van Til, Scott Oliphint presents us with an introduction to Reformed apologetics as he sets forth the principles behind a distinctly “covenantal” approach. This book clearly explains the theological foundations of covenantal apologetics and illustrates its application in real-world conversations with unbelievers—helping Christians to boldly, knowledgeably, and winsomely proclaim the gospel.

Jours of Our Lives ,2019-05-06 BETH ARNOLD'S Jours of Our Lives is the narrative of one couple's wild-card bet on themselves. In 2002, after living 13 years in their showplace of a Craftsman bungalow in Little Rock, Arkansas, Arnold-a journalist, essayist, and novelist-and her husband, author James Morgan, decided it was time for a change.And what a change they made! When Morgan, a book writer and amateur painter, was stumped for a new book idea, Arnold saw the chance to pull out a dream of hers: to live in France. Arnold's late brother, New York decorator Brent Arnold-whom David Halberstam had called the talent of his generation-had given the couple vivid decorating advice when they'd married and moved into their Craftsman house: Matisse colors and Vuillard patterns. Brent Arnold's advice had turned James Morgan into a devotee of Henri Matisse. So on a day in 2001, when Beth was working with James to help him discover a new book idea, she suggested a facet of artistic life--in this case, Matisse's life--that gripped Morgan: Most people look, but they don't see in the deepest sense of the word. Her idea for him was a book called Learning to See, in which he would follow in the footsteps of Henri Matisse. The book became Chasing Matisse, and soon the two of them had sold their beloved house in Little Rock and embarked on a life-changing journey through France, Corsica, Morocco, and beyond.Jours of Our Lives, which began life as Beth Arnold's daily blog recounting the soap-opera arc of their crazy and heart-wrenching road trip in pursuit of a creative dream, stands today as a vivid depiction of one couple's brave and unwavering commitment to a life that called them. Beth Arnold, writes William Whitworth, editor emeritus of The Atlantic, is a reporter, a novelist, a memoirist, a cook, and a mom, but perhaps most of all she is a wanderer and a gifted travel writer. With wit and offhand ease, Arnold shows

us her world: how to get there, where to stay, what it looks like, how it sounds, and what it tastes like.

Voice Attractiveness Benjamin Weiss,Jürgen Trouvain,Melissa Barkat-Defradas,John J. Ohala,2020-10-10 This book addresses various aspects of acoustic-phonetic analysis, including voice quality and fundamental frequency, and the effects of speech fluency and non-native accents, by examining read speech, public speech, and conversations. Voice is a sexually dimorphic trait that can convey important biological and social information about the speaker, and empirical findings suggest that voice characteristics and preferences play an important role in both intra- and intersexual selection, such as competition and mating, and social evaluation. Discussing evaluation criteria like physical attractiveness, pleasantness, likability, and even persuasiveness and charisma, the book bridges the gap between social and biological views on voice attractiveness. It presents conceptual, methodological and empirical work applying methods such as passive listening tests, psychoacoustic rating experiments, and crowd-sourced and interactive scenarios and highlights the diversity not only of the methods used when studying voice attractiveness, but also of the domains investigated, such as politicians’ speech, experimental speed dating, speech synthesis, vocal pathology, and voice preferences in human interactions as well as in human-computer and human-robot interactions. By doing so, it identifies widespread and complementary approaches and establishes common ground for further research.

Gap Year Girl Marianne C. Bohr,2015-09-01 In the 1960s and ’70s, thousands of baby boomers strapped packs to their backs and flocked to Europe, wandering the continent on missions of self-discovery. Many of these boomers still dream of “going back”—of once again cutting themselves free and revisiting the places they encountered in their youth, recapturing what was, and creating fresh memories along the way. Marianne Bohr and her husband, Joe, did just that. In *Gap Year Girl*, Bohr describes what it’s like to kiss your job good-bye, sell your worldly possessions, pack your bags, and take off on a quest for adventure. Page by page, she engagingly recounts the experiences, epiphanies, highs, lows, struggles, surprises, and lessons learned as she and Joe journey as independent travelers on a budget—through medieval villages and bustling European cities, unimaginable culinary pleasures, and the entertaining (and sometimes infuriating) characters encountered along the way. Touching on universal themes of escape, adventure, freedom, discovery, and life reimaged, *Gap Year Girl* is an exciting account of a couple’s experiences on an unconventional, past the-blush-of-youth journey.
