Swartz,Stephen Leatherwood,2012-12-02 The Gray Whale: Eschrichtius robustus provides an introduction to the understanding of Eschrichtius robustus or the gray whale. Organized into four parts encompassing 25 chapters, this book begins with an overview of the gray whale evolution, fossils, and subfossil remains, range, and systematics in historical times. This text then presents the historical of gray whale exploitation and the economic importance of these whales to humans. Other chapters consider the gray whale migration, abundance, and seasonal distribution in the wake of the California population's recovery from depletion. This book discusses as well the methods used in shore-based censuses during migration and in aerial surveys of gray whales taken on their winter grounds. When Bubbles Burst John P. Calverley,2011-01-11 Surviving the financial fallout John Calverley's new book is about

understanding what's going on, how policy impinges on it, what investors can do and what is likely to happen. This extremely topical and timely new book from the well-known economist and Head of Research, Standard Chartered Bank is the first book to examine in depth the financial fallout of 2008 and explore the implications and solutions for individuals, companies and central banks. His previous book, *Bubbles and How to Survive Them* predicted the current financial situation. He warned vigorously of the danger from the housing bubble and warned that stock prices might take off again and reach vulnerable levels (as indeed occurred in 2006-7.) This essential readable, non-technical guide is essential reading for everyone and particularly for investment professionals everywhere. In this new book - an investor's survival kit - he:

- * Outlines the crises we now face and reviews how we got here.
- * Looks closely at the huge housing bubbles in UK and the US, as well as those in Australia, Spain, Japan and Hong Kong.
- * Explores the anatomy of bubbles and presents a checklist for identifying them.
- * Tells the story of how the housing bubble led to the current financial crisis and how far prices might fall, focusing on household debt as the value of household assets collapse.
- * Examines strategies for investors, who must try to avoid bubbles or, more dangerously, seek them out and ride them.
- * Reveals what will happen next.

Once Upon a Tide Stephanie Kate Strohm, 2021-09-14 Princess Lana is the youngest ambassador ever to represent her underwater kingdom, Clarion, at the Royal Festival on land. And even though it means trading her mermaid tail for a clumsy pair of legs—and worse, spending a week with her mother, who chose life on land over her children seven years ago—Lana can't wait to prove her political chops. But once on shore, nothing goes as planned. The children of visiting dignitaries spread nasty rumors about Lana and her brother eavesdropping on humans' thoughts just because they can communicate telepathically underwater—never mind that their powers don't work on land. Lana's mom is wrapped up in the king of a neighboring kingdom, who turns out to be her new boyfriend. And despite her ambassador status, no one will let Lana near a single important negotiation or meeting. Then an earthquake strikes Clarion, and though Lana's desperate to rush to the aid of her people, her father insists she stay away indefinitely. As the days on land add up, nothing her parents tell her about the disaster makes sense. Soon Lana uncovers signs that more nefarious forces may be at work—and they could spell war for her people. Can Lana uncover the truth about what happened and protect those she loves before it's too late?
