**The Little House** Kyoko Nakajima, 2019-01-31 The Little House is set in the early years of the Showa era (1926-89), when Japan's situation is becoming increasingly tense but has not yet fully immersed in a wartime footing. On the outskirts of Tokyo, near a station on a private train line, stands a modest European style house with a red, triangular shaped roof. There a woman named Taki has worked as a maidservant in the house and lived with its owners, the Hirai family. Now, near the end of her life, Taki is writing down in a notebook her nostalgic memories of the time spent living in the house. Her journal captures the refined middle-class life of the time from her gentle perspective. At the end of the novel, however, a startling final chapter is added. The chapter brings to light, after Taki's death, a fact not described in her notebook. This suddenly transforms the world that had been viewed through the lens of a nostalgic memoir, so that a dramatic, flesh-and-blood story takes shape. Nakajima manages to combine skillful dialogue with a dazzling ending. The result is a polished, masterful work fully deserving of the Naoki Prize.

**Perspectives on Research with H5N1 Avian Influenza**

National Research Council, Institute of Medicine, Division on Earth and Life Studies, Committee on Science, Technology, and Law, Board on Global Health, Board on Life Sciences, Policy and Global Affairs, Forum on Microbial Threats, 2013-04-04 When, in late 2011, it became public knowledge that two research groups had submitted for publication manuscripts that reported on their work on mammalian transmissibility of a lethal H5N1 avian influenza strain, the information caused an international debate about the appropriateness and communication of the researchers' work, the risks associated with the work, partial or complete censorship of scientific publications, and dual-use research of concern in general. Recognizing that the H5N1 research is only the

most recent scientific activity subject to widespread attention due to safety and security concerns, on May 1, 2012, the National Research Council's Committee on Science, Technology and Law, in conjunction with the Board on Life Sciences and the Institute of Medicine's Forum on Microbial Threats, convened a one-day public workshop for the purposes of 1) discussing the H5N1 controversy; 2) considering responses by the National Institute of Allergy and Infectious Diseases (NIAID), which had funded this research, the World Health Organization, the U.S. National Science Advisory Board for Biosecurity (NSABB), scientific publishers, and members of the international research community; and 3) providing a forum wherein the concerns and interests of the broader community of stakeholders, including policy makers, biosafety and biosecurity experts, non-governmental organizations, international organizations, and the general public might be articulated. *Perspectives on Research with H5N1 Avian Influenza: Scientific Enquiry, Communication, Controversy* summarizes the proceedings of the workshop.

*Pan-Asianism and Japan's War 1931-1945* E. Hotta, 2007-12-25  
The book explores the critical importance of Pan-Asianism in Japanese imperialism. Pan-Asianism was a cultural as well as political ideology that promoted Asian unity and recognition. The focus is on Pan-Asianism as a propeller behind Japan's expansionist policies from the Manchurian Incident until the end of the Pacific War.

*The Digital Classroom* David T. Gordon, 2000  
Educators and technology experts share their thoughts on classroom technology and how equity, the digital divide, and other issues need to be addressed to ensure students and teachers are realizing the full potential of different technologies.

*Ozu and the Poetics of Cinema* David Bordwell, 1988  
Over the last two decades, Yasujiro Ozu has won international recognition as a major filmmaker. Combining biographical information with discussions of the films' aesthetic strategies and cultural

significance, David Bordwell questions the popular image of Ozu as the traditional Japanese artisan and examines the aesthetic nature and functions of his cinema.

*Laboratory Biorisk Management* Reynolds M. Salerno, Jennifer Gaudioso, 2015-12-01 Over the past two decades bioscience facilities worldwide have experienced multiple safety and security incidents, including many notable incidents at so-called sophisticated facilities in North America and Western Europe. This demonstrates that a system based solely on biosafety levels and security regulations may not be sufficient. Setting the stage for a substantively different approach for managing the risks of working with biological agents in laboratories, *Laboratory Biorisk Management: Biosafety and Biosecurity* introduces the concept of biorisk management—a new paradigm that encompasses both laboratory biosafety and biosecurity. The book also provides laboratory managers and directors with the information and technical tools needed for its implementation. The basis for this new paradigm is a three-pronged, multi-disciplinary model of assessment, mitigation, and performance (the AMP model). The application of the methodologies, criteria, and guidance outlined in the book helps to reduce the risk of laboratories becoming the sources of infectious disease outbreaks. This is a valuable resource for those seeking to embrace and implement biorisk management systems in their facilities and operations, including the biological research, clinical diagnostic, and production/manufacturing communities.

**Measuring Liquidity in Financial Markets** Abdourahmane Sarr, Tonny Lybek, 2002-12 This paper provides an overview of indicators that can be used to illustrate and analyze liquidity developments in financial markets. The measures include bid-ask spreads, turnover ratios, and price impact measures. They gauge different aspects of market liquidity, namely tightness (costs), immediacy, depth, breadth, and resiliency. These measures are

applied in selected foreign exchange, money, and capital markets to illustrate their operational usefulness. A number of measures must be considered because there is no single theoretically correct and universally accepted measure to determine a market's degree of liquidity and because market-specific factors and peculiarities must be considered.

**Establishing a Hematopoietic Stem Cell Transplantation**

**Unit** Éliane Gluckman, Dietger Niederwieser, Mahmoud Aljurf, 2017-11-17 This text aims to provide simplified practical guidelines to start a hematopoietic stem cell transplantation unit which could be implemented in most centers and countries worldwide. The book also provides guidelines for existing transplantation units to upgrade their practice and implement new policies and procedures, in addition to developing therapies according to latest international standards and regulations. The book covers a wide range of practical implementation tools including HSCT program team structure, building inpatient and outpatient HSCT units, requisite laboratory support for transplantation program, practical aspects of stem cell collection and processing, HSCT program quality management, education and training, and data management. The book also addresses cost effectiveness and recommendations for establishing transplantation program in countries with limited resources. Written by group of internationally established experts in their corresponding hematopoietic stem cell transplantation fields, with contributions from many leaders of hematopoietic stem cell transplantation organizations, *Establishing a Hematopoietic Stem Cell Transplantation Unit: A Practical Guide* is an essential, practical resource for all members of the multidisciplinary hematopoietic stem cell transplantation team.

*Research and Development in Breast Ultrasound* E. Ueno, T.

Shiina,M. Kuboto,K. Sawai,2006-03-20 This book was planned in order to announce the contents discussed in the 13th International Congress on the Ultrasound Examination of the Breast. Breast ultrasound has become a indispensable method for the diagnosis of cancer of the breast. Breast ultrasound will become more convenient and precise diagnostic method according to the development of the device. In addition, application to breast screening or medical check has started, on the other hand the interventional method has also developed.

**Wandering Heart** Susanna Fessler,1998-08-27 Despite being one of the most popular writers of her day, Hayashi Fumiko (1903-1951) has remained virtually unknown outside of Japan. Describing her life and literature, author Susanna Fessler weaves together major events in Fumiko's life and the effect they had on her writing by using a thematical narrative including translations of key passages, critical commentary, and full translations of three essays (My Horizon, Literature, Travel, Etc., and My Work). Particular focus is given to Fumiko's imagery, the centrality of longing and loneliness in her writing, the influence of travel on her life and work, the non-political nature of her narratives, and the importance of free will in her world view

Digital Mammography Nico Karssemeijer,Martin Thijssen,Jan Hendriks,Leon van Erning,2012-12-06 In June 1998 the Fourth International Workshop on Digital Mammography was held in Nijmegen, The Netherlands, where it was hosted by the department of Radiology of the University Hospital Nijmegen. This series of meetings was initiated at the 1993 SPIE Biomedical Image Processing Conference in San Jose, USA, where a number of sessions were entirely devoted to mammographic image analysis. At very successful subsequent workshops held in York, UK (1994) and Chicago, USA (1996), the scope of the conference was broadened, establishing a platform for presentation and discussion of new developments in digital mammography. Topics that are addressed at these meetings are computer-aided diagnosis, image

processing, detector development, system design, observer performance and clinical evaluation. The goal is to bring researchers from universities, breast cancer experts, and engineers together, to exchange information and present new scientific developments in this rapidly evolving field. This book contains all the scientific papers and posters presented at the work shop in Nijmegen. Contributions came from as many as 20 different countries and 190 participants attended the meeting. At a technical exhibit companies demonstrated new products and work in progress. Abstracts of all papers were reviewed by members of the scientific committee. Many of the accepted papers had excellent quality, but due to limited space not all of them could be included as full papers in these proceedings. Papers that were rated high by the reviewers are included as long or short papers, others appear as extended abstracts in the last chapter.

**100 Silent Films** Bryony Dixon, 2017-10-07 100 Silent Films provides an authoritative and accessible history of silent cinema through one hundred of its most interesting and significant films. As Bryony Dixon contends, silent cinema is not a genre; it is the first 35 years of film history, a complex negotiation between art and commerce and a union of creativity and technology. At its most grand – on the big screen with a full orchestral accompaniment – it is magnificent, permitting a depth of emotional engagement rarely found in other fields of cinema. Silent film was hugely popular in its day, and its success enabled the development of large-scale film production in the United States and Europe. It was the start of our fascination with the moving image as a disseminator of information and as mass entertainment with its consequent celebrity culture. The digital revolution in the last few years and the restoration and reissue of archival treasures have contributed to a huge resurgence of interest in silent cinema. Bryony Dixon's illuminating guide introduces a wide range of films of the silent period (1895–1930), including classics such as *The Birth of a Nation* (1915), *The*

General (1926), Metropolis (1927), Sunrise (1927) and Pandora's Box (1928), alongside more unexpected choices, and represents major genres and directors of the period – Griffith, Keaton, Chaplin, Murnau, Sjöström, Dovzhenko and Eisenstein – together with an introductory overview and useful filmographic and bibliographic information.

*Things Remembered and Things Forgotten* Kyoko

Nakajima,2021-05-13 'If we want to understand what has been lost to time, there is no way other than through the exercise of imagination ... imagination applied with delicate rather than broad strokes'. So wrote the award winning Japanese author Kyoko Nakajima of her story, *Things Remembered and Things Forgotten*, a piece that illuminates, as if by throwing a switch, the layers of wartime devastation that lie just below the surface of Tokyo's insistently modern culture. The ten acclaimed stories in this collection are pervaded by an air of Japanese ghostliness. In beautifully crafted and deceptively light prose, Nakajima portrays men and women beset by cultural amnesia and unaware of how haunted they are - by fragmented memories of war and occupation, by fading traditions, by buildings lost to firestorms and bulldozers, by the spirits of their recent past.

*Testing and Assessment in Translation and Interpreting*

*Studies* Claudia V. Angelelli,Holly E. Jacobson,2009-10-22 *Testing and Assessment in Translation and Interpreting Studies* examines issues of measurement that are essential to translation and interpreting. Conceptualizing testing both as a process and a product, the collection of papers explores these issues across languages and settings (including university classrooms, research projects, the private sector, and professional associations). The authors have approached their chapters from different perspectives using a variety of methods, some focusing on very specific variables, and others providing a much broader overview

of the issues at hand. Chapters range from a discussion of the measurement of text cohesion in translation; the measurement of interactional competence in interpreting; the use of a particular scale to measure interpreters' renditions to the application of a specific approach to grading or general program assessment (such as interpreter or translator certification at the national level or program admissions processes). These studies point to the need for greater integration of research and practice in the specific area of testing and assessment and are a welcome addition to the field.

Activating Human Rights and Peace GOH Bee Chen, Baden Offord, 2016-03-16 Human rights and peace issues and concerns have come about at a critical time. The world has recently witnessed a plethora of turning points that speak of the hopes and vulnerabilities which are inherent in being human and demonstrate that change in the service of human rights and peace is possible. At the same time, however, other events indicate that wherever there is life, there is vulnerability in a world characterized by instability and endemic human suffering. On top of all this, the collapse of the global financial system and the serious, rapid destruction of the environment have brought the world to a precarious state of vulnerability. Activating human rights and peace is, therefore, a project that is always in progress, and is never finally achieved. This enlightening collection of well thought through cases is aimed at academics and students of human rights, political science, law and justice, peace and conflict studies and sociology.

**Handbook of Industrial Robotics** Shimon Y. Nof, 1992 120 leading experts from twelve countries have participated in creating this Second Edition of the Handbook of Industrial Robotics. Of its 66 chapters, 33 are new, covering important new topics in the theory, design, control, and applications of robotics. Other key features include a larger glossary of robotics terminology with over 800 terms and a CD-ROM that vividly conveys the colorful motions and intelligence of robotics. With

contributions from the most prominent names in robotics worldwide, the Handbook remains the essential resource on all aspects of this complex subject.
