Shemer Kuznits

Plato's Alarm Clock James M. Russell, 2018-11-01 We all like to think we are pretty smart. New medical advances seem to come along every day; space travel suddenly doesn't seem so difficult; self-driving cars are no longer a thing of the future . but if we were stranded on a desert island tomorrow, most of us wouldn't know how to catch a fish or start a fire, let alone rebuild all that extraordinary technology we now rely on. The truth is that we're not necessarily more clever than our ancestors, we just have an accumulation of centuries of technological progress on which we can rely. As this book shows, many of the ancients were much more advanced than we realize - indeed there are recent inventions that had actually been discovered centuries earlier and then forgotten. And what about all those modern day devices and machines that rely on ancient inventions such as paper, levers and gears? From brain surgery in the Stone Age to Chinese whisky from the 7th century BC, to Damascus steel - once the hardest metal in the world, which we no longer know how to make - this insightful book collects together the stories of hundreds of ancient devices, inventions and breakthroughs from around the world and across the centuries, giving us a fascinating glimpse into past eras that were far more technologically advanced than we sometimes realize.

Earth Force Shemer Kuznits, 2019-04-30 On the first day, a mist descended from the heavens blanketing Earth. On the second day, a cryptic message, 'Infusion commencing', appeared in the corner of everyone's eyes. On the third day, the sick were healed and the crippled walked again. On the fourth day, celebration and joy spread across the globe. And on the fifth day, the warping began... There was no warning. A mist descended from the sky,

disabling all technology and causing a weird message to appear at the corner of everyone's eye. The situation grew even worse as animals and people started to warp, transforming into terrible monsters that prey on the livings. Within months, human civilization had crumbled. Unable to fight the seemingly-indestructible beasts, the survivors are reduced to cowering in reinforced shelters. Waiting for the end to come. Helpless. All seemed lost until a few brave souls discovered the secret of their new reality: the Tec and how to use it to level up. Together they represent humanity's last best hope for salvation. But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

The Warlord's Alarm Pilegard, Virginia Walton, 2006 While traveling to an important feast in ancient China, Chuan and his friend Jing Jing devise a water alarm clock to make sure their party reaches the emperor's palace before rival warlords. Includes a brief history of water clocks and instructions for making one.

The Head Trip Jeff Warren, 2009-03-18 A world at once familiar and unimaginably

strange exists all around us, and within us – it is the vast realm of consciousness. In *The Head Trip*, science journalist Jeff Warren explores twelve distinct, natural states of consciousness available to us in a twenty-four-hour day, each state offering its own kind of knowledge and insight – its own adventure. The hypnagogic state, when our minds hover between waking and sleeping, can be a rich source of creativity and even compassion. Then there's the Watch, an almost magical waking experience in the middle of the night that has been all but lost to electric light and modern sleep patterns. Daydreaming and trance, lucid dreaming, the Zone, and the Pure Conscious Event – from sleep laboratory to remote northern cabin, neurofeedback clinic to Buddhist retreat, Warren visits them all. Along the way, he talks to neuroscientists, chronobiologists, anthropologists, monks, and many others who illuminate his stories with cutting-edge science and age-old wisdom. On this trip, all are welcome and no drugs are required: all you need to pack are a functioning cerebrum and an open mind. Replete with stylish graphics and brightened by comic panels conceived and drawn by the author, *The Head Trip* is an instant classic, a brilliant and original description of the shifting experience of consciousness that's also a practical guide to enhancing creativity and mental health. This book does not just inform and entertain – it shows how every one of us can expand upon the ways we experience being alive.

Dictionary of Spoken Spanish U. S. War Dept, 2013-03-27 This is a complete, unabridged republication of a Dictionary of Spoken Spanish, which was specially prepared by nationally known linguists for the U.S. War Department (TM#30-900). It is compiled from spoken Spanish and emphasizes idiom and colloquial usage in both Castilian and Latin American areas. More than 16,000 entries provide exact translations of both English and Spanish sentences and phrases; as many as 60 idioms are listed under each entry. This is easily the largest list of idiomatic constructions ever published. Travelers, business people, and students who are interested in Latin American studies have found this dictionary their best source for those expressions of daily life and social activity not usually found in books. More than 18,000 idioms are given, not as isolated words that you have to conjugate or alter, but as complete sentences that you can use without change. A 25-page introduction provides a rapid survey of Spanish sounds, grammar, and syntax, with full consideration of irregular verbs. It is especially apt in its modern treatment of phrase and clause structure. A

17-page appendix gives translations of geographical names, numbers, national holidays for Spanish countries, important street signs, useful expressions of high frequency, and a unique 7-page glossary of Spanish and Spanish-American foods and dishes.
