FORENSIC ALCOHOL TEST EVIDENCE (FATE) John Brick ,2016-10-04 Everyday problems associated with the consequences of alcohol use disorders require answers, and it is for this reason Forensic Alcohol Test Evidence (FATE) was written. Forensic alcohol test evidence focuses on the evaluation, interpretation and application of the effects of alcohol or an alcohol test result to some legal issue such as a crime, accident or consequence of alcohol exposure. In FATE, many of the issues pertinent to a thorough forensic evaluation and trial testimony are discussed, but most importantly is the focus on consistent, unbiased, and comprehensive application of diverse scientific disciplines and research to questions of forensic interest. This requires evaluating behavioral, analytical, physiological, pharmacological and toxicological evidence in the puzzle; determining if the pieces go together; and reaching a conclusion to a reasonable degree of scientific certainty. The first chapter discusses what is forensic alcohol test evidence and why it is studied. Chapter 2 explores forensic alcohol evidence and what are the types of alcohol and quantitative expression of blood alcohol. Chapter 3 examines alcohol pharmacokinetics, alcohol pharmacodynamics site of alcohol action, and basic neurophysiology. Neuropharmacology of alcohol intoxication is also discussed. Chapter 4 covers laboratory and clinical-based tests of impairment. In Chapter 5, DWI high-risk behaviors and injuries are discussed. Chapter 6 defines alcohol and the law: drunk driving, visible intoxication, and aggression, while Chapter 7 covers the DWI investigation and arrest, elements of the DWI report, outside vehicle test, and obtaining blood samples. Chapters 8 and 9 describe alcohol-drug interactions and medical consequences and toxicological considerations. Chapters 10 and 11 pursue alcohol use, tolerance, dependence, and the need for standardization and estimating blood alcohol levels. The remaining two chapters cover accident reconstruction and neuropsychology. This book will be an essential tool and valuable resource for all law enforcement officers and investigators, forensic examiners and other professionals in the evaluation and interpretation of alcohol evidence in crimes and accidents.

Drug and alcohol testing of employees and privacy rights Marion Maguire,2004-01-03 Seminar paper from the year 2003 in the subject Business economics - Law, grade: 1.0 (A), Hawai'i Pacific University (-), course: MBA-Program (Vorlesung), language: English, abstract: Employee privacy is increasingly becoming an issue for employers, unions, employees and lawyers. Employer requirements to conduct tests and acquire additional information from employees, such as drug and alcohol use and testing has become a privacy concern. While increasingly employers have to ensure that their employees are fit for duty, the use of drug and alcohol testing is still controversial. With respect to drug and alcohol testing, some states prohibit such tests but state law varies dramatically. A study shows that America's drug problem is big. America, with 5% of the entire world's population buys and consumes fully 60% of the entire world's supply of illegal drugs and 77% of all illegal drug users are employed. Ostensibly, prospective employers and employees want the same thing: to match the best person with the most fitting job. Many employers are quick to welcome outside evaluations of an individual's mental and physical fitness and integrity, and to believe in their results - often at the risk of sacrificing individual privacy rights. The issue here is, should employers require their employees to be alcohol and drug tested and how does it affect privacy rights. In general, under human rights law, drug and alcohol testing are only allowed in certain circumstances. It is discriminatory to test potential or existing employees for drug and alcohol use if there is not a valid reason to test. The alternatives employers have are either drug test job applicants and existing employees or do not drug test them. There are pros and cons regarding alcohol and drug testing that need to be considered before deciding which alternative to chose. Criteria that is used in this research paper are basically violation of privacy rights and security and safety concerns.
