Manual of Online Search Strategies C.J. Armstrong,J.A.
Large,2018-12-20 Published in 1992, like the first, this second
edition is not intended as introductory textbook command-driven,
Boolean searching. It is targeted at online searchers who already
have some knowledge of command languages and may be
proficient searchers on databases in one or two subject areas, but
when required to venture into new and less familiar territory still
need guidance. It is also offered to end users who possess the
subject expertise but lack of information retrieval know-how. The
Manual is offered as a guide to database selection and a

navigational aid through the twists and turns of the retrieval maze; at least some of the dead ends and backtracking may thereby be avoided. This volume, written by experts in their various fields, deals with the subject coverage and record structures of specific databases, offers comparisons between databases (context, indexing procedures, updating policies, etc.), discusses the choice between online and CD-ROM sources (and between hosts if online is selected), and illustrates strategies with numerous search extracts.

Managing Global Financial and Foreign Exchange Rate

Risk Ghassem A. Homaifar, 2004-03-23 A comprehensive guide to managing global financial risk From the balance of payment exposure to foreign exchange and interest rate risk, to credit derivatives and other exotic options, futures, and swaps for mitigating and transferring risk, this book provides a simple yet comprehensive analysis of complex derivatives pricing and their application in risk management. The risk posed by foreign exchange transactions stems from the volatility of the exchange rate, the volatility of the interest rates, and factors unique to individual companies which are interrelated. To protect and hedge against adverse currency and interest rate changes, multinational corporations need to take concrete steps for mitigating these risks. Managing Global Financial and Foreign Exchange Rate Risk offers a thorough treatment of price, foreign currency, and interest rate risk management practices of

multinational corporations in a dynamic global economy. It lays out the pros and cons of various hedging instruments, as well as the economic cost benefit analysis of alternative hedging vehicles. Written in a detailed yet user-friendly manner, this resource provides treasurers and other financial managers with the tools they need to manage their various exposures to credit, price, and foreign exchange risk. Managing Global Financial and Foreign Exchange Rate Risk covers various swaps in this geometrically growing field with notional principal in excess of \$120 trillion. From caplet and corridors to call and put swaptions this book covers the micro structure of the swaps, options, futures, and foreign exchange markets. From credit default swap and transfer and convertibility options to asset swap switch and weather derivatives this book illustrates their simple pricing and application. To show real-world examples, each chapter includes a case study highlighting a specific problem, as well as a set of steps to solve it. Numerous charts accompanied with actual Wall Street figures provide the reader with the opportunity to comprehend and appreciate the role and function of derivatives, which are often misunderstood in the financial market. This detailed resource will guide the individual, government and multinational corporations safely through the maze of various exposures. A must-read for treasurers, controllers, money managers, portfolio managers, security analyst and academics, Managing Global Financial and Foreign Exchange Rate Risk represents an important collection of up-to-date risk management solutions. Ghassem A. Homaifar is a professor of financial economics at Middle Tennessee State University. He has Master of Science in Industrial Management from State University of New York at Stony Brook and PhD in Finance from University of Alabama in 1982. He is the author of numerous articles that have appeared in the Journal of Risk and Insurance, Journal of Business Finance and Accounting, Weltwirtschaftliches Archiv Review of World Economics, Advances in Futures and Options
