Accessibility Handbook Katie Cunningham,2012-08-27 Get practical guidelines for making your website accessible to people with disabilities. With this handbook, you'll learn how to design or develop a site that conforms to Section 508 of the US Rehabilitation Act—and in the process you'll discover how to provide a better user experience for everyone. The Accessibility Handbook introduces you to several audiences that have difficulty using today's complex websites, including people with blindness, hearing loss, physical disabilities, and cognitive disorders. Learn how to support assistive technologies, and understand which fonts, colors, page layouts, and other design elements work best—without having to exclude advanced functions, hire outside help, or significantly increase overhead. Develop solutions that accommodate: Complete blindness. Create a logical document flow to support screen readers Low vision and color blindness. Optimize images and color schemes, and ensure your site enlarges gracefully Hearing impairment. Provide video captions and visual alerts for interactive features Physical disabilities. Make forms, popups, and navigation easier to use Cognitive disorders. Adapt fonts and text styles for dyslexic users, and design consistent, well-organized pages for people with ADHD

Case Studies in School Psychology Stephanie A. Rahill,Lauren T. Kaiser,2021-09-06 Case Studies in School Psychology is the first textbook to

comprehensively introduce the NASP Practice Model through active discussion of real-life, school-based examples of issues facing school psychologists. Incorporating all 10 domains of practice, these true-to-life scenarios span individual child, class-wide, school-wide, and district/community-wide organizational levels across multiple age and developmental ranges. Graduate students will better understand their expansive roles and potential avenues to make positive impacts as school psychologists in children's academic, social, emotional, and behavioral development.
