Algebra Iglobal Educational Services, 2017-04-27 Tutoring is beginning to get the respect and recognition it deserves. More and more learners require individualized or small group instruction whether it is in the classroom setting or in a private tutoring setting either face-to-face or online. It is conceived and created for tutors and educators who desire to provide effective tutoring either in person or online in any educational setting, including the classroom. Rather than provide a specific curriculum to follow, Algebra: High School Math Tutor Lesson Plan Series provides a blueprint to design effective tutoring lessons that are aligned with the Dr. Holland-Johnson's Session Review Framework. Tutor evaluators and coaches are able to analyze tutoring sessions and coach tutors when utilizing the Dr. Holland-Johnson's Lesson Plan Blueprint for Tutors. In each lesson plan, learners have an opportunity to focus on real-world connections, vocabulary, and practice the math concepts learned in the tutoring sessions in the appropriate amounts to learn and retain the content knowledge. Tutors will

have an opportunity to provide direct and guided instruction, while learners practice concepts on their own during independent instruction. Each lesson plan comes with a mini-assessment pertaining to the math concepts learned in the specific tutoring session. Depending on the learner's academic needs, the tutor or teacher will deem when it is appropriate to administer the mini-assessment. For online tutoring sessions or as an online option to take the mini-assessment, tutors and teachers can upload these mini-assessments to be completed online in their choice of an online assessment tool.

Audry R.- 5th grade ...and ended the quarter with a 93! You're a great teacher. Matt D.- Algebra II He provides alternate learning methods which help me very much. Lynn Ann B.- College Algebra (went from C to A+) You explain Geometry so well! Amanda R. Math Made a Bit Easier Lesson Plans Larry Zafran,2010-01-19 This is the third book in the Math Made a Bit Easier series by independent math tutor Larry Zafran. It is a book of sixty lesson plans for tutors, parents, and homeschoolers. Each lesson plan includes all the components of a typical classroom lesson such as aim, motivation, warm-up exercises, demonstrative examples, questions for thought and discussion, and connections to earlier and later material. The math content in this book is directly aligned and ideally used in conjunction with the first book of the series and its companion workbook of practice exercises. It covers the topics which comprise the foundation of math beginning with lessons in basic arithmetic, followed by basic operations, negative numbers, fractions, decimals, percents, and basic probability and statistics. If these topics are not completely mastered, later work will prove to be quite difficult. This is especially true of algebra. The book includes a chapter on how to be an effective math tutor, as well as a chapter on how to optionally incorporate meditation instruction to help students get into a relaxed and alert state of mind which is ideal for learning math and taking exams.
