*Beyond the Sea* Felan Parker, Jessica Aldred, 2018-11-09 The Bioshock series looms large in the industry and culture of video games for its ambitious incorporation of high-minded philosophical questions and retro-futuristic aesthetics into the ultraviolent first-person shooter genre. *Beyond the Sea* marks ten years since the release of the original game with an interdisciplinary collection of essays on Bioshock, Bioshock 2, and Bioshock Infinite. Simultaneously lauded as landmarks in the artistic growth of the medium and criticized for their compromised vision and politics, the Bioshock games have been the subject of significant scholarly and critical discussion. Moving past well-trodden debates, *Beyond the Sea* broadens the conversation by putting video games in dialogue with a diverse range of other disciplines and cultural forms, from parenting psychology to post-humanism, from Thomas Pynchon to German expressionist cinema. Offering bold new perspectives on a canonical series, *Beyond the Sea* is a timely contribution to our understanding of the aesthetics, the industry, and the culture of video games. Contributors include Daniel Ante-Contreras (Miracosta), Luke Arnott (Western Ontario), Betsy Brey (Waterloo), Patrick Brown (Iowa), Michael Fuchs (Graz), Jamie Henthorn (Catawba), Brendan Keogh (Queensland), Cameron Kunzelman (Georgia), Cody Mejeur (Michigan State), Matthew Thomas Payne (Notre Dame), Gareth Schott (Waikato), Karen Schrier (Marist), Sarah Stang (York/Ryerson), Sarah Thorne (Carleton), John Vanderhoef (California State, Dominguez Hills), Matthew Wysocki (Flagler), Jordan R. Youngblood (Eastern Connecticut State), and Sarah Zaidan (Emerson).

**Franchise Era** Fleury James Fleury, 2019-04-01 As Hollywood shifts towards the digital era, the role of the media franchise has become more prominent. This edited collection, from a range of international scholars, argues that the franchise is now an integral element of American media culture. As such, the collection explores the production, distribution and marketing of franchises as a historical form of media-making - analysing the complex industrial practice of managing franchises across interconnected online platforms. Examining how traditional media incumbents like studios and networks have responded to the rise of new entrants from the technology sector (such as Facebook, Apple, Amazon, Netflix and Google), the authors take a critical look at the way new and old industrial logics collide in an increasingly fragmented and consolidated mediascape.

Becoming Alien Sarah Welch-Larson, 2021-02-25 The Alien films are perceived to be a fractured franchise, each one loosely related to the others. They are nonlinear, complicated, convoluted: a collection of genre movies ranging from horror to war to farce. But on closer examination, the threads that bind together these films are strong and undeniable. The series is a model of Catherine Keller's cosmology as a cycle of order out of chaos, an illustration of her concept of evil as discreation. When viewed through the lens of Keller's Face of the Deep, the Alien films resolve into a cohesive whole. The series becomes six views of the idea of evil-as-exploitation, its origins, and its consequences. Each film expands on the concept of evil set forth by its predecessors, complicating that conception, and retroactively enriching readings of the films that came before.

**The Eternal Future of the 1950s** Dennis R. Cutchins, Dennis R. Perry, 2023-07-07 Science fiction cinema, once relegated to the undervalued B movie slot, has become one of the dominant film genres of the 21st century, with Hollywood alone producing more than 400 science fiction films annually. Many of these owe a great deal of their success to the films of one defining decade: the 1950s. Essays in this book explore how classic '50s science fiction films have been recycled, repurposed, and reused in the decades since their release. Tropes from Don Siegel's *Invasion of the Body Snatchers* (1956), for instance, have found surprising new life in Netflix's wildly popular *Stranger Things*. *Interstellar* (2014) and *Arrival* (2016) have clear, though indirect roots in the iconic 1950s science fiction films *Rocketship X-M* (1950) and *The Day the Earth Stood Still* (1951), and *The Shape of Water* (2017) openly recalls and reworks the major premises of *The Creature From the Black Lagoon* (1954). Essays also cover 1950's sci-fi influences on video game franchises like *Fallout*, *Bioshock* and *Wolfenstein*.

Alien Legacies Nathan Abrams, Gregory Frame, 2023-03-27 The 1979 film *Alien* has left an indelible mark on popular culture. Directed by Ridley Scott, at the time known primarily for making advertisements, and starring then-unknown actor Sigourney Weaver in the lead role, it transcended its humble origins to shock and disturb audiences upon its initial release. Its success has led to three

direct sequels, two prequels, one mashup franchise, a series of comic books, graphic novels, novelizations, games, and an enormous and devoted fanbase. For forty years, *Alien* and its progeny have animated debate and discussion among critics and academics from a wide variety of fields and methodological perspectives. This book brings together scholars from diverse disciplinary backgrounds to explore *Alien* through a contemporary lens. The chapters here demonstrate the extent to which its effects and reception are deeply multifaceted, with the *Alien* franchise straddling the lines between high and low culture, playing with generic categories, crossing media boundaries, and animating theoretical, critical, and political debates. Chapters touch on female agency and motherhood, the influence of H.R. Giger, the viscosity of *Alien*'s body horror, the narrative tradition of the Female Gothic, the patriarchal gaze in the *Alien* video games, and the rise of in-universe online marketing campaigns. In so doing, the volume aims to debate *Alien*'s legacy, consider its current position within visual culture, and establish what the series means--and why it still matters--forty years since its birth.

*Aliens: Life and Death* Dan Abnett, 2017 This volume collects the Dark Horse comic book series *Aliens: Life and Death* #1-#4, originally published September-December 2016.--Title page verso.

*Alien RPG* Free League Publishing, 2019-12-10 Space is vast, dark, and not your friend. Gamma rays and neutrino bursts erupt from dying stars to cook you alive, black holes tear you apart, and the void itself boils your blood and seizes your brain. Try to scream and no one can hear you - hold your breath and you rupture your lungs. Space isn't as empty as you'd think, either - its frontiers are ever expanding. Rival governments wage a cold war of aggression while greedy corporations vie for valuable resources. Colonists reach for the stars and gamble with their lives - each new world tamed is either feast or famine. And there are things lurking in the shadows of every asteroid - things strange and different and deadly. Things alien. This is the official ALIEN tabletop roleplaying game - a universe of body horror and corporate brinkmanship, where synthetic people play god while space truckers and marines serve host to newborn ghoulish creatures. It's a harsh and unforgiving universe and you are nothing if not expendable. Stay alive if you can--Back cover.

Set during the events of all four Alien™ films, sending the Marines to alien worlds, to derelict space settlements, and into the nests of the universe's most dangerous monsters, these adventures are guaranteed to send the blood racing-- One way or another.

*Alien: Prototype* Tim Waggoner, 2019-10-29 When an industrial spy steals a Xenomorph egg, former Colonial Marine Zula Hendricks must prevent an alien from killing everyone on an isolated colony planet. Venture, a direct rival to the Weyland-Yutani corporation, will accept any risk to crush the competition. Thus, when a corporate spy acquires a bizarre, leathery egg from a hijacked vessel, she takes it directly to the Venture testing facility on Jericho 3. Though unaware of the danger it poses, the scientists there recognize their prize's immeasurable value. Early tests reveal little, however, and they come to an inevitable conclusion. They need a human test subject... ENTER ZULA HENDRICKS A member of the Jericho 3 security staff, Colonial Marines veteran Zula Hendricks has been tasked with training personnel to deal with anything the treacherous planet can throw their way. Yet nothing can prepare them for the horror that appears--a creature more hideous than any Zula has encountered before. Unless stopped, it will kill every human being on the planet.
