Discovering Computers Gary B. Shelly, Thomas J. Cashman, Misty E Vermaat, 2004 We are excited to announce the publication of the ground-breaking Discovering Computers: Fundamentals Edition. This book is the Shelly Cashman Series answer to the many requests we have received from instructors and students for a textbook that provides a succinct, yet thorough, introduction to computers. Discovering Computers: Fundamentals Edition covers the same breadth of topics as our well-known Discovering Computers 2005: Complete, but the depth of coverage focuses on the basic knowledge required to be computer literate in today's digital world. This text is perfect for a short course on computer concepts, or a full semester course that also teaches applications or programming.

Developing Country Perspectives on Public Service Delivery Anjula Gurtoo, Colin Williams, 2015-05-26 The book examines the status of public service in developing countries, in the sectors of health, infrastructure, labour and marginalized populations, rural economy and public administration. The last decade has witnessed significant government focus on service delivery in developing nations like South Africa, Philippines, India and Malaysia. At the forefront of this movement has been the public sector reforms significantly driven by two broad factors: public sector inefficiencies and liberal economic ideology. This move towards efficient public service delivery in developing nations (versus developed nations) has required a significant shift in institutional thinking and institutional capacity for the governments. It is therefore no surprise that while economic liberalization has been relatively easy to implement, governance reforms towards public service delivery has been significantly more challenging. In this background, the chapters of the book, with sector themes, examine the three basic foundations of public policy—courses of action, regulatory measures and issues, and funding structures and priorities—in public service delivery. The book is a multi country, multi sector, perspective since it includes studies from Russian Federation, India, Ethiopia, Pakistan, Fiji, South Africa, Columbia, Philippines, Macedonia and India. This perspective lends itself to the investigation for a comprehensive overall development model.

Disrupting Mobility Gereon Meyer, Susan Shaheen, 2017-01-04 This book explores the opportunities and challenges of the sharing economy and innovative transportation technologies with regard to urban mobility. Written by government experts, social scientists, technologists and city planners from North America, Europe and Australia, the papers in this book address the impacts of demographic, societal and economic trends and the fundamental changes arising from the increasing automation and connectivity of vehicles, smart communication technologies, multimodal transit services, and urban design. The book is based on the Disrupting Mobility Summit held in Cambridge, MA (USA) in November 2015, organized by the City Science Initiative at MIT Media Lab, the Transportation Sustainability Research Center at the University of California at Berkeley, the LSE Cities at the London School of Economics and Politics and the Innovation Center for Mobility and Societal Change in Berlin.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Digital Personalized Health and Medicine L.B. Pape-Haugaard, C. Lovis, I. Cort Madsen, 2020-06-17 Digital health and medical informatics have grown in importance in recent years, and have now become central to the provision of effective healthcare around the world. This book presents the proceedings of the 30th Medical Informatics Europe conference (MIE). This edition of the conference, hosted by the European Federation for Medical Informatics (EFMI) since the 1970s, was due to be held in Geneva, Switzerland in April 2020, but as a result of measures to prevent the spread of the Covid19 pandemic, the conference itself had to be cancelled. Nevertheless, because this collection of papers offers a wealth of knowledge and experience across the full spectrum of digital health and medicine, it was decided to publish the submissions accepted in the review process and confirmed by the Scientific Program Committee for publication, and these are published here as planned. The 232 papers are themed under 6 section headings: biomedical data, tools and methods; supporting care delivery; health and prevention; precision medicine and public health; human factors and citizen centered digital health; and ethics, legal and societal aspects. A 7th section deals with the Swiss personalized health network, and section 8 includes the 125 posters accepted for the conference. Offering an overview of current trends and developments in digital health and medical informatics, the book provides a valuable information resource for researchers and health practitioners alike.

Polyextremophiles Joseph Seckbach, Aharon Oren, Helga Stan-Lotter, 2013-05-13 Many Microorganisms and some macro-organisms can live under extreme conditions. For example, high and low temperature, acidic and alkaline conditions, high salt areas, high pressure, toxic compounds, high level of ionizing radiation, anoxia and absence of light, etc. Many organisms inhabit environments characterized by more than one form of stress (Polyextremophiles). Among them are those who live in hypersaline and alkaline, hot and acidic, cold/hot and high hydrostatic pressure, etc. Polyextremophiles found in desert regions have to cope with intense UV irradiation and desiccation, high as well as low temperatures, and low availability of water and nutrients. This book provides novel results of application to polyextremophiles research ranging from nanotechnology to synthetic biology to the origin of life and beyond.

Remote Sensing Tools for Exploration Pamela Elizabeth Clark, Michael Lee Rilee, 2010-07-01 Remote Sensing from a New Perspective The idea for this book began many years ago, when I was asked to teach a course on remote

sensing. Not long before that time, I had been part of the effort to develop the first database for planetary data with a common digital array format and interactive processing capabilities to correlate those data easily: the lunar consortium. All the available lunar remote sensing data were included, orbital and ground-based, ranging across the entire electromagnetic spectrum. I had used this powerful tool extensively, and, in that spirit, I was determined to create a course which covered the entire spectrum and a variety of targets. As I looked around for the equivalent of a textbook, which I was willing to pull together from several sources, I realized that available material was very heavily focused on the visual and near visual spectrum and on the Earth as a target. Even *The Surveillant Science*, edited by Edward Holz and published in 1973, which broke new ground in having diverse articles on most of the spectrum when it was created, focused entirely on the Earth. My personal favorite, the exceedingly well written book on remote sensing by Floyd Sabins first published in 1978, covered the visual, infrared, and microwave portions of the spectrum beautifully but focused on the Earth as well. Unhindered, I developed what I called ‘packets’ of material for each part of the spectrum.

Discourses of Anxiety over Childhood and Youth across Cultures Liza Tsaliki,Despina Chronaki,2020-07-15 This book revolves around neoliberal notions governing children and youth – a trend that permeates and dominates contemporary perceptions of the young. In fact, given how the disciplinary power of neoliberalism swiftly becomes a common conceptual currency across national and cultural borders, discussing the way in which neoliberal self-governance permeates the cultures of childhood and youth is even more pertinent. This is followed by research on media discourses of children and their cultural practices in Norway, Germany, Austria and Switzerland, Serbia, Greece, and the US.

Italians to America: March 1903-April 1903 Ira A. Glazier,Percy William Filby,1992 *Italians to America* is the first indexed reference work devoted to Italian immigrants to the United States. This series contains passenger list information in chronological order on the first major wave of Italian migration during the last two decades of the nineteenth century, as well as the beginning of the twentieth century. As with the highly regarded companion series on German immigrants, *Italians to America* presents the passenger lists in chronological order, including information on each person's age, sex, occupation, village of origin, and destination, plus the name of the ship, the port of embarkation, and the date of arrival. Each volume also contains an introduction on the history of Italian migration to the U.S. and a full name index, greatly simplifying the researcher's job.

A Republic Under Assault Tom Fitton,2020-10-20 NEW YORK TIMES BESTSELLER In this explosive book, New York Times bestselling author and president of Judicial Watch Tom Fitton explains how the Radical Left and the Deep State destroyed the Trump presidency. With his trademark “readable, engaging, persuasive” (The Washington Times) writing, Tom Fitton identifies the major forces posing a continued threat to American democracy. Hillary Clinton Email Scandal: How the Clinton team and senior officials at the Obama State Department conspired to cover up Hillary Clinton’s secret email system—and shocking revelations that tie the Obama White House to the cover-up! Voter Fraud: How Soros-funded groups attack states that seek to protect clean elections by challenging voter ID laws, and how the Left is cynically peddling COVID-19 crisis electoral “reforms,” such as mail-in voting, which could increase voter fraud and election chaos. And shocking numbers about dirty voting rolls across the nation! Illegal Immigration: How deadly illegal “sanctuary” policies are exploding across America, and how our nation’s sovereignty has been under assault by radical open-border advocates. Subversive Deep State collaborators with ties to the Clinton and Obama machines not only launched countless—often illegal—operations to stop and then remove Trump, but even more alarmingly, are working to transform the United States into something truly unrecognizable to all who believe in liberty and the rule of law. “This is must reading for every American who wants to save our nation” (Sean Hannity, #1 New York Times bestselling author).

Tree Biotechnology Kishan Gopal Ramawat,Jean-Michel Mérillon,M. R. Ahuja,2014-04-01 Forest trees cover 30% of the earth's land surface, providing renewable fuel, wood, timber, shelter, fruits, leaves, bark, roots, and are source of medicinal products in addition to benefits such as carbon sequestration, water shed protection, and habitat for 1/3 of terrestrial species. However, the genetic analysis and breeding of trees has lagged behind that of crop plants. Therefore, systematic conservation, sustainable improvement and pragmatic utilization of trees are global priorities. This book provides comprehensive and up to date information about tree characterization, biological understanding, and improvement through biotechnological and molecular tools.

SRAM Design for Wireless Sensor Networks Vibhu Sharma,Francky Catthoor,Wim Dehaene,2012-07-27 This book features various, ultra low energy, variability resilient SRAM circuit design techniques for wireless sensor network applications. Conventional SRAM design targets area efficiency and high performance at the increased cost of energy consumption, making it unsuitable for computation-intensive sensor node applications. This book, therefore, guides the reader through different techniques at the circuit level for reducing energy consumption and increasing the variability resilience. It includes a detailed review of the most efficient circuit design techniques and trade-offs, introduces new memory architecture techniques, sense amplifier circuits and voltage optimization methods for reducing the impact of variability for the advanced technology nodes.
