-  **ANIMATION AND ADVERTISING** Malcolm Cook, Kirsten Moana Thompson, 2019-12-17 Throughout its history, animation has been fundamentally shaped by its application to promotion and marketing, with animation playing a vital role in advertising history. In individual case study chapters this book addresses, among others, the role of promotion and advertising for anime, Disney, MTV, Lotte Reiniger, Pixar and George Pal, and highlights American, Indian, Japanese, and European examples. This collection reviews the history of famous animation studios and artists, and rediscovers overlooked ones. It situates animated advertising within the context of a diverse intermedial and multi-platform media environment, influenced by print, radio and digital practices, and expanding beyond cinema and television screens into the workplace, theme park, trade expo and urban environment. It reveals the part that animation has played in shaping our consumption of particular brands and commodities, and assesses the ways in which animated advertising has both changed and been changed by the technologies and media that supported it, including digital production and distribution in the present day. Challenging the traditional privileging of art or entertainment over commercial animation, animation and advertising establishes a new and rich field of research, and raises many new questions concerning particular animation and media histories, and our methods for researching them.
-  **THE CRAFT OF SCIENTIFIC FILMS** Lauren Murphy, Michael Alley, 2023-08-31 This book, the first of its kind, helps scientists and engineers of all stages and disciplines share their work in a new way—with movies. Today, much of scientific communication is embedded in papers and presentations, but these documents don’t often extend outside of a specific academic field. By adding movies as a medium of communication, scientists and engineers can better communicate with their colleagues while also increasing their reach to students, professors, peers, potential collaborators, and the public. Scientific films help translate complex technical topics into more accessible and consumable messages. By following Lauren Murphy’s filmmaking formula – planning, shooting, and editing – readers will create their very own scientific films that look professional and polished. Using tools as simple as a smartphone, readers can develop short, personal stories with no cost or experience needed. This book will guide readers through all steps of the movie making process to a finished product. Readers will evolve their creative thinking skills and use their movies to improve classroom presentations, network across student organizations, present at conferences, recruit students for their labs, secure grant money, and more. Adding a movie to your body of work can be the tool that sparks interest in audiences to learn more—driving traffic to your publications, research projects, and websites. This book will help you develop new skills to become a better communicator while spreading your ideas and research to new audiences.

Bishop Jakes wants to show you how God uses difficult, crushing experiences to prepare you for unexpected blessings. If you are faithful through suffering, you will be surprised by God’s joy, comforted by His peace, and fulfilled with His purpose. -  **STAYIN’ ALIVE** Jefferson Cowie, 2010-09-14 Winner of the 2011 Merle Curti Award, an epic account that recasts the 1970s as the key turning point in modern U.S. history, from the renowned historian A wide-ranging cultural and political history that will forever redefine a misunderstood decade, Stayin’ Alive is prize-winning historian Jefferson Cowie’s remarkable account of how working-class America hit the rocks in the political and economic upheavals of the 1970s. In this edgy and incisive book—part political intrigue, part labor history, with large doses of American music, film and television lore—Cowie, with “an ear for the power and poetry of vernacular speech” (Cleveland Plain Dealer), reveals America’s fascinating path from rising incomes and optimism of the New Deal to the widening economic inequalities and dampened expectations of the present.

-  **TEACHING CONTEMPORARY ART WITH YOUNG PEOPLE** Julia Marshall, Connie Stewart, Anne Thulson, 2021 This practical resource will help educators teach about current art and integrate its philosophy and methods into the K–12 classroom. The authors provide a framework that looks at art through the lens of nine themes—everyday life, work, power, earth, space and place, self and others, change and time, inheritance, and visual culture—highlighting the conceptual aspects of art and connecting disparate forms of expression. They also provide guidelines and examples for how to use contemporary art to change the dynamics of a classroom, apply inventive non-linear lenses to topics, broaden and update the art “canon,” and spur creative and critical thinking. Young people will find the selected artwork accessible and relevant to their lives, diverse and expansive, probing, serious and funny. Challenging conventional notions of what should be considered art and how it should be created, this book offers a sampling of what is out there to inspire educators and students to explore the limitless world of new art. Book features: Indicators and lenses that make contemporary art more familiar, accessible, understandable, and useable for teachers. Easy-to-reference descriptions and images from a variety of contemporary artists. Strategies for integrating art thinking across the curriculum. Suggestions to help teachers find contemporary art to fit their curriculum and school settings. Concrete examples of art-based projects from both art and general classrooms. Guidance for developing curriculum, including how to create guiding questions to spur student thinking.
