Radio and Television Broadcasting on the European Continent

Burton Paulu, 1967-10-30 Radio and Television Broadcasting on the European Continent was first published in 1967. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. In this book Dr. Paulu provides a comprehensive survey based on firsthand study of the development and current status of radio and television broadcasting in continental Europe. He discusses the technical, organizational, financial, and programming aspects of European broadcasting in both Communist and Western countries. The material is organized, not on a country-by-country basis, but as it relates to broad basic issues, and it is presented in a framework of such interrelated factors as geography, history politics, international relations, religious traditions, language, national economic standards, and cultural and social life. The broadcasting systems studied include those of the Soviet Union and other Communist countries, France, West Germany, Belgium, the Netherlands, Italy, Sweden, and Switzerland. The account is particularly timely in view of the concern and discussion about the future course of broadcasting in the United States. It has relevance not only for communications specialists but for political scientists and other scholars in the social sciences as well as for the growing public which is interested in the improvement of American broadcasting.

Broadcasting Freedom Arch Puddington, 2021-05-11 Among America's most unusual and successful weapons during the Cold

War were Radio Free Europe and Radio Liberty. RFE-RL had its origins in a post-war America brimming with confidence and secure in its power. Unlike the Voice of America, which conveyed a distinctly American perspective on global events, RFE-RL served as surrogate home radio services and a vital alternative to the controlled, party-dominated domestic press in Eastern Europe. Over twenty stations featured programming tailored to individual countries. They reached millions of listeners ranging from industrial workers to dissident leaders such as Lech Walesa and Vaclav Havel. *Broadcasting Freedom* draws on rare archival material and offers a penetrating insider history of the radios that helped change the face of Europe. Arch Puddington reveals new information about the connections between RFE-RL and the CIA, which provided covert funding for the stations during the critical start-up years in the early 1950s. He relates in detail the efforts of Soviet and Eastern Bloc officials to thwart the stations; their tactics ranged from jamming attempts, assassinations of radio journalists, the infiltration of spies onto the radios' staffs, and the bombing of the radios' headquarters. Puddington addresses the controversies that engulfed the stations throughout the Cold War, most notably RFE broadcasts during the Hungarian Revolution that were described as inflammatory and irresponsible. He shows how RFE prevented the Communist authorities from establishing a monopoly on the dissemination of information in Poland and describes the crucial roles played by the stations as the Berlin Wall came down and the Soviet Union broke apart. *Broadcasting Freedom* is also a portrait of the Cold War in America. Puddington offers insights into the strategic thinking of the RFE-RL leadership and those in the highest circles of American government, including CIA directors, secretaries of state, and even presidents.

The History of a Popular European Radio Station Denis Marechal, 2012-11-28 The book traces the history of a famous non-specialized commercial radio station, through from its beginnings in trans-frontier broadcasting in the 1930s to its enviable

position at the heart of a Europe-wide multi-media empire. Indeed, part of the book relates to rivalry with the BBC and other European broadcasters before and after the Second World War. The station played a pivotal role in the events of May 1968, and the evolving attitudes to homosexuality and other subjects, affecting even the use of language. Echoing the instability of the media world and the commercial and political tensions within it, the book also shows the struggle with various governments to defend freedom of expression.

Europe - On Air Suzanne Lommers, 2012 During the interwar years, broadcast radio became a popular way for Europeans to consume local, national, and international news. The medium not only began to shape European policy and politics, but also laid the foundation for European unification and global interconnectedness. In *Europe On Air*, Suzanne Lommers has documented the rich and often underexposed history of broadcast radio through the lens of international European relations. She specifically explores the roles of Radio Moscow, Radio Luxembourg, Vatican Radio, and the International Broadcasting Union as institutions that played an important role in national identities and establishing standards for broadcasting. The radio also offered new opportunities to politicians, who seized upon a vibrant and more direct way to communicate with their constituents. Essential reading for scholars of technology and European history, *Europe-On Air* reveals broadcast radio to be a technology that revolutionized international relations during the brief respite between the chaos of war in Europe.

Radio World, 1922

Cold War Broadcasting A. Ross Johnson, R. Eugene Parta, 2010-01-01 It was not a matter of propaganda ... black and white ideological broadcasts ... What made [Radio Free Europe] important were its impartiality, independence, and objectivity.--- Vaclav Havel Radio Free Europe and Radio Liberty were critically important weapons in the free world's competition with Soviet

totalitarianism---and without them the Soviet bloc might even have not disintegrated ... The account in this book of their activities is therefore not only informative, but critical to understanding recent history.---Zbigniew Brzezinski The studies and translated Soviet bloc documents published in this book demonstrate the enormous impact of Radio Free Europe, Radio Liberty, and Voice of America during the Cold War. By promoting democratic values and undermining the monopoly of information on which Communist regimes relied, the Radios contributed greatly to the end of the Cold War.---George P. Shultz I know of no other mass media organization that has done more than RFE/RL to help create the Europe in which we live today---a Europe not divided into two opposing camps.---Elena Bonner Examines the role of Western broadcasting to the Soviet Union and Eastern Europe during the Cold War, with a focus on Radio Free Europe and Radio Liberty. It includes chapters by radio veterans and by scholars who have conducted research on the subject in once-secret Soviet bloc archives and in Western records. It also contains a selection of translated documents from formerly secret Soviet and East European archives, most of them published here for the first time.

European Media Stylianos Papathanassopoulos, Ralph M. Negrine, 2011-06-27 European Media provides a clear, concise account of the structures, dynamics and realities of the changing face of media in Europe. It offers a timely and illuminating appraisal of the issues surrounding the development of new media in Europe and explores debates about the role of the media in the formation of a European public sphere and a European identity. The book argues that Europe offers an ideal context for examining interactions between global, regional and national media processes and its individual chapters consider: the changing structure of the European media; the development of new media; the Europeanization of the media in the region; the challenges for the content; and audiences. Special emphasis is given to the

transformation of political communication in Europe and the alleged emergence of a European public sphere and identity. *European Media: Structures, Politics and Identity* is an invaluable text for courses on media and international studies as well as courses dealing with European and national policy studies. It is also helpful to students, researchers and professionals in the media sector since it combines hard facts with theoretical insight.

Passport to World Band Radio Lawrence Magne, 2004-10-19 World band radio is a trusted source of daily entertainment and crisis reporting for millions of Americans. Passport, the #1 seller in the field, provides exactly what world band listeners want. Entering its 21st year, it outsells all competitors combined.

The Cultural Histories of Radio Luxembourg and Europe n°1 Richard Legay, 2024-01-31 This book focuses on two commercial radio stations, Radio Luxembourg and Europe n°1, which were popular institutions in Western Europe throughout the Long Sixties, working across media and broadcasting transnationally. It argues that the existence of an overarching 'dispositif' of commercial radio stations enabled them to operate on various dimensions and differentiated them from other broadcasters. The book therefore answers current calls in media history to look beyond national and single-medium borders and contributes to the cultural and media history of Western Europe.

Radio Free Europe's Crusade for Freedom Richard H. Cummings, 2010-09-24 From 1950 to 1960, millions of Americans participated in Radio Free Europe's "Crusade for Freedom." They signed "Freedom Scrolls" and "Freedom Grams," attended Crusader meetings, marched in parades, launched leaflet-carrying balloons, and donated Truth Dollars in support of the American effort to broadcast news and other programming to the peoples of communist-governed European countries. The Crusade for

Freedom proved to be a powerful tool of the state-private network's anti-communist agenda. This book takes an in-depth look at the Crusade for Freedom, revealing how its unmatched pageantry of patriotism led to the creation of a dynamic movement involving not only the government but also private industry, mass media, academia, religious leaders, and average Americans.
