From Analogue to Digital Radio JP Devlin, 2018-07-23 This book examines the history of UK radio from its analogue beginnings to its digital future by highlighting the roles played by the BBC and commercial radio in ensuring the medium's long-term success. Beginning as a mere technological innovation, radio developed into a broadcasting model which has sustained for almost one hundred years. The UK model was defined by a public service broadcaster responsible for maintaining standards of broadcasting, as well as commercial operators—acting illegally and then legally—who have sought to exploit radio's economic potential. This book aims to show how both these entities have contributed to the success of radio in the UK, whether acting competitively or by cooperating in order to ensure radio's survival into the next century. This study will appeal to students of media or anyone with a general interest in the history of radio.

Women and Radio Caroline Mitchell, 2014-04-23 Combining classic work on radio with innovative research, journalism and biography, *Women and Radio* offers a variety of approaches to understanding the position of women as producers, presenters and consumers as well as offering guidelines, advice and helpful information for women wanting to work in radio. *Women and Radio* examines the relationship between radio audiences, technologies and programming and reveals and explains the inequalities experienced by women working in the industry.

Sounds of Your Life Tony Stoller, 2010 Independent Radio from the mid-1970s onwards touched the lives of an entire generation. Stations in the big cities and the smaller towns provided the music and the news and the style which accompanied the changing patterns of life as the UK grew into a youth-driven, modern state. The initial attempt to harness the power of popular radio, funded by advertising, to provide local public service was characteristic of the ambition of the times. Its later decline into commercial music radio illustrates the failure of those hopes on a wider front too. *Sounds of Your Life* is the first comprehensive telling of the stories and the histories of Independent Radio. Its author, Tony Stoller, was a major figure in the medium. He has had unique access to the people who made and unmade the system, and to the formal and informal archives which cover over 30 lively years. The book is a substantial and substantive history, which illustrates the way in which Britain moved from a social to a market economy, while telling the tales of the people and the processes of Independent Radio as it touched its tens of millions of listeners up and down the country.

The Radio Handbook John Collins, Arran Bee, 2021-03-29 Updated and revised, the fourth edition of *The Radio Handbook* is a comprehensive guide to the medium of radio and the radio industry in the UK. Featuring new chapters on social media and podcasting, this book offers a thorough breakdown of the knowledge and skills needed to work within the contemporary radio industry. Using examples, case studies and transcripts, it examines the various building blocks that make radio, from music scheduling to news values and from phone-ins to sports commentaries. The latest trends in contemporary audio practice are referenced throughout, including the increased adoption of smartphone technology, further consolidation within commercial radio, and the ongoing debate about the future funding of the BBC against the backdrop of an accelerated move towards remote working, the rise in popularity of podcasting and an ever more crowded media landscape. Combining theory and practice, this textbook is ideally suited for students of radio, media, communications and journalism. It equips readers with the skills they need to not only produce good radio themselves, but to have the knowledge they need to become a critical friend of the medium.

No News is Bad News Michael Bromley, 2014-09-11 This volume of collected essays provides a wide-ranging survey of the state of radio and television, especially the idea of public service broadcasting, and of news, current affairs and documentary programming in America, Australia, the UK and the rest of western Europe. Among the key issues it addresses are the 'dumbing down' of TV news, the infotainment factor in current affairs shows and the disappearance of the documentary. Using contemporary cases and examples - from the row over the scheduling of *News at Ten* in the UK to the creation of *ABC News Online* in Australia -- the essays link the performance of radio and television at the turn of the millennium with the processes of deregulation, liberalisation and digitalisation which have been evident since the 1980s. Working from a much needed and original comparative approach which encompasses complex and well-established public broadcasting in the USA as well as emerging and vulnerable participatory radio stations in El Salvador, the book sets a variety of experiences of factual radio and television programming within wider political and cultural contexts. It offers analyses of not only the 'problems' associated with news, current affairs and documentary broadcasting in an era of a declining public service ethos and the apparent triumph of the market, however. The essays also explore the potential of alternative radio and television, new forms of communication, such as the internet, and changing practices among journalists and programme makers, as well as the resilience of public broadcasting and the powers of the public to ensure that the media remain relevant and accountable. A companion text to the bestselling *Sex, Lies and Democracy: The Press and*

the Public, this volume presents a multi-faceted approach to the tumultuous present and the uncertain future of news, current affairs and documentary in radio and television.

How programming developed from a 'free for all', with every aspect of content peppering stations schedules, to the highly sophisticated forum radio heard today. The book tells how speech and music radio developed by public demand into sharply defined streams, following music genres, and was determined by the perceived tastes of the demographics that station operators wanted to reach. Author Paul Rusling has been a radio aficionado for over fifty years and has advised on systems at a variety of radio stations in Europe and the USA>

Radio and Society Matt Mollgaard, 2011-12-14 Radio is the original mass electronic medium and it continues to be critical for audiences wanting news, information, music and entertainment. For over a century enthusiasts, scholars, practitioners, governments, businesses and listeners have developed and influenced radio, making it a fascinating medium to explore today. There is still no mass medium as ubiquitous as radio and the Internet has extended its geographical and temporal reach even further. Radio remains a key media form and technology, not only surviving the challenges of the screen and digital ages, but developing despite and because of them. This book is a collection of contemporary research by radio scholars from the United Kingdom, Canada, Australia and New Zealand. It explores different aspects of this both simple and complex medium, from early radio histories to the contemporary developments of radio on the Internet. Chapters engage with critical debates about the role of government, business and communities in how radio is used in our societies. Some chapters provide important new insights into making radio, and radio as a cultural force. Other chapters explore developments in research methodologies that enable deeper insights into contemporary radio and its audiences. This book provides a range of platforms for engaging with radio and radio research as a rich, vibrant and fruitful way to further our understandings of the media and ultimately, ourselves.

They highlight key issues including ownership and shifting regulatory environments, the revolutionary role of user-generated-content and digital convergence, and coverage of global issues by rolling news services. Chapters include: • a brief history of broadcasting; • an overview of recent commercial challenges in the news industry and the impact on television news; • current trends in the running of local radio stations, with particular focus on the rise of ‘hubbing’; • the ethics of broadcast journalism; • the significance of international broadcasters including the BBC, CNN and Al-Jazeera. The book identifies how the dissemination of broadcast journalism is evolving, whilst also arguing for the continued resilience of this industry now and in the future, making the case that journalistic storytelling remains at its most effective in broadcast environments.
