No More Violence: All You Need To Do Is Speak Up Dr. Sanya Khan,2022-11-04 Domestic violence against women is a prevalent issue. However, determining its full extent is difficult. It could be far higher than stated because many cases of domestic violence against women are not reported. During the COVID-19 lockdown, our country saw a significant surge in incidences of domestic violence. A woman frequently believes that the abuse she experiences is her fault and that she has made a mistake. This conclusion is incorrect; abuse is the fault of the abuser, not the victim. Estimates of violence in our country are higher than official records. Women may fail to report family violence for a variety of reasons. Because they don't know how to deal with domestic abuse or whom to approach and what are the laws and schemes for their empowerment. In contrast to this point of view, the current book, which is based on research in Doda, contrasts this point of view by shedding light on the types, signs, and causes of domestic violence as well as its effects on women's mental health. Additionally, it brought to light the violence committed by parents against their daughters and the various women-focused schemes run by the Ministry of Women and Child Development that assist women in coping with domestic violence and gaining independence so that they are not dependent on anyone.
