Zoo Story Thomas French,2010-07-06 This story, told by a master teller of such things, does more than take you inside the cages, fences, and walls of a zoo. It takes you inside the human heart, and an elephant's, and a primate's, and on and on. Tom French did in this book what he always does. He took real life and wrote it down for us, with eloquence and feeling and aching detail. -Rick Bragg, Pulitzer Prize-winning journalist and bestselling author An insightful and detailed look at the complex life of a zoo and its denizens, both animal and human. -Yann Martel, author of *Life of Pi* and *Beatrice and Virgil* Welcome to the savage and surprising world of *Zoo Story*, an unprecedented account of the secret life of a zoo and its inhabitants. Based on six years of research, the book follows a handful of unforgettable characters at Tampa's Lowry Park Zoo: an alpha chimp with a weakness for blondes, a ferocious tiger who revels in Obsession perfume, and a brilliant but tyrannical CEO known as El Diablo Blanco. The sweeping narrative takes the reader from the African savannah to the forests of Panama and deep into the inner workings of a place some describe as a sanctuary and others condemn as a prison. *Zoo Story* shows us how these remarkable individuals live, how some die, and what their experiences reveal about the human desire to both exalt and control nature.

Among the beings you'll meet in its pages are Abraham, a collection of highly evolved entities that speak in one voice; Metranon, the divine interface between God and the Outer Worlds (and sometime Old Testament angel); and The Planetary Council, whose members include Jove, Merlin, Quetzalcoatl, and Lao-Tzu.

American Zoo David Grazian, 2017-12-05 A close-up look at the contradictions and wonders of the modern zoo Orangutans swing from Kevlar-lined fire hoses. Giraffes feast on celebratory birthday cakes topped with carrots instead of candles. Hi-tech dinosaur robots growl among steel trees, while owls watch animated cartoons on old television sets. In *American Zoo*, sociologist David Grazian takes us on a safari through the contemporary zoo, alive with its many contradictions and strange wonders. Trading in his tweed jacket for a zoo uniform and a pair of muddy work boots, Grazian introduces us to zookeepers and animal rights activists, parents and toddlers, and the other human primates that make up the zoo's social world. He shows that in a major shift away from their unfortunate pasts, American zoos today emphasize naturalistic exhibits teeming with lush and immersive landscapes, breeding programs for endangered animals, and enrichment activities for their captive creatures. In doing so, zoos blur the imaginary boundaries we regularly use to separate culture from nature, humans from animals, and civilization from the wild. At the same time, zoos manage a wilderness of competing priorities—animal care, education, scientific research, and recreation—all while attempting to serve as centers for conservation in the wake of the current environmental and climate-change crisis. The world of the zoo reflects how we project our own prejudices and desires onto the animal

kingdom, and invest nature with meaning and sentiment. A revealing portrayal of comic animals, delighted children, and feisty zookeepers, *American Zoo* is a remarkable close-up exploration of a classic cultural attraction.

We Bought a Zoo Benjamin Mee, 2011-11-22 The remarkable true story of a family who move into a rundown zoo—already a BBC documentary miniseries and excerpted in *The Guardian*. In the market for a house and an adventure, Benjamin Mee moved his family to an unlikely new home: a dilapidated zoo in the English countryside. Mee had a dream to refurbish the zoo and run it as a family business. His friends and colleagues thought he was crazy. But in 2006, Mee and his wife with their two children, his brother, and his 76-year-old mother moved into the Dartmoor Wildlife Park. Their extended family now included: Solomon, an African lion and scourge of the local golf course; Zak, the rickety Alpha wolf, a broadly benevolent dictator clinging to power; Ronnie, a Brazilian tapir, easily capable of killing a man, but hopelessly soppy; and Sovereign, a jaguar and would-be ninja, who has devised a long term escape plan and implemented it. Nothing was easy, given the family's lack of experience as zookeepers, and what follows is a magical exploration of the mysteries of the animal kingdom, the power of family, and the triumph of hope over tragedy. *We Bought a Zoo* is a profoundly moving portrait of an unforgettable family living in the most extraordinary circumstances.

Simon Thorn and the Wolf's Den Aimée Carter, 2016-02-02 Simon Thorn is a hero worthy of a young Harry Potter, and readers are bound to be delighted. - Booklist For fans of Rick Riordan and *Spirit Animals*, this thrilling first book in a series follows a boy who discovers a secret race of animal shapeshifters. Twelve-year-old Simon Thorn's life has never been easy or normal, but things like being bullied at school and living in a cramped Manhattan apartment with his Uncle Darryl are nothing compared to his biggest secret: He can talk to animals. But when his mom is suddenly kidnapped by a herd of rats, Simon finds out that he, his mom, and his uncle are all Animalgams—people born with the ability to change into an animal at will. In search of his mom, Simon discovers the Animalgam Academy based at the Central Park Zoo. There he learns about the fractured five kingdoms—Mammals, Birds, Insects, Reptiles, and Underwater—that make up this secret world . . . and realizes he may be the only one who can save it. This action-packed page-turner is filled with themes of bravery, loyalty, and finding one's true self, and is perfect for fans of Rick Riordan and the *Spirit Animals* series. Don't miss the other books in the Simon Thorn series: *Simon Thorn and the Wolf's Den* *Simon Thorn and the Viper's Pit* *Simon Thorn and the Shark's Cave*

Lift Up Your Eyes on High James Nickel, 1999-12 This astronomy text, written from a Christian perspective, helps high school students to unlock the mysteries and wonders of the stars. Helpful review questions and suggested essays are also provided in the text. Grades 9-12.

Almost Human Alfred Fidjestøl, 2019-09-17 “Alternately joyous and heartbreaking...” —Jane Goodall A moving and revealing biography of Norway's most famous chimpanzee. Julius is a national celebrity, the inspiration behind pop hits and bestselling books. He's also a chimpanzee, born in captivity, but raised in a zookeeper's home after his own mother rejects him. Julius's new parents change his diapers and comfort him when he has nightmares, and their daughters play with him. But soon they must reintroduce Julius to the zoo, a challenging task that brings new learnings on primate behavior and the dangers of animal celebrity. Alternately humorous and

heartbreaking, Almost Human shows that primates are more like us than we once thought possible. It also charts the transformation of one zoo over time: from a small operation of animals behind bars to a fast-growing attraction coming to terms with twenty-first-century views on animal rights and welfare.

Primate Behavior Leonard A. Rosenblum,2013-09-24 Primate Behavior: Developments in Field and Laboratory Research, Volume 4 examines developments in field and laboratory research on primate behavior. Topics range from facial expressions in nonhuman primates to the behavior and malnutrition in the rhesus monkey. The population structure and dynamics of the Borneo orang-utan in relation to its ecology and reproductive strategy are also discussed, along with the social organization of Macaca fascicularis. Comprised of six chapters, this volume begins by discussing a field study that uses sound analysis to investigate the link between vocal pattern and social situation in the Japanese monkey (Macaca fuscata). The next chapter focuses on one particular and very important means of visual communication in nonhuman primates: facial expressions. The behavior of marmoset monkeys (Callithricidae) is then considered, with emphasis on their social structure and social organization as well as patterns of social and sexual communication. The remaining chapters explore feeding behavior and malnutrition in the rhesus monkey; the population structure and dynamics of the Borneo orang-utan in relation to its ecology and reproductive strategy; and the social organization and intergroup behavior of Macaca fascicularis. This book should be of interest to biologists and primatologists.
