Concrete-Filled Double-Skin Steel Tubular Columns Mostafa Fahmi Hassanein, Mohamed Elchalakani, 2023-02-16 Concrete-Filled Double-Skin Steel Tubular Columns: Behavior and Design provides a thorough review of the recent advances on the behaviour and design of concrete-filled double-skin steel tubular (CFDST) columns. Drawing on their extensive knowledge and research, the authors cover topics such as different CFDST columns under axial compression, innovative techniques including the use of rubberised concrete, columns with different cross-sections, and steel material envelops and failure modes. This book is an overview of research carried out by this highly experienced and leading research group with specialist knowledge in the topic. It is an invaluable resource for researchers, graduates and post-graduate civil engineers and civil engineering designers. Provides a comprehensive overview of advances on the behaviour and design of concrete-filled double-skin steel tubular (CFDST) columns over the past decade Gives deep-dive explanation of important concepts such as the void ratio which makes these girders different from conventional concrete-filled steel tubular (CFST) columns Explains the failure modes of short and slender columns under compression, with detailed illustrations and photos from both real-life and virtual tests performed by the authors Presents in-depth analysis of the ultimate strengths of CFDST columns with different steel envelops and concrete infills Makes a detailed comparison with available international codes, such as Eurocode 3, and provides recommendations for future studies Discusses new innovative confining stress-based design for different types of CFDST short columns

Concrete-Filled Double Skin Steel Tubular Column with Hybrid Fibre Reinforced Polymer Kok Keong Choong, Jayaprakash Jaganathan, Sharifah Salwa Mohd Zuki, Shahiron Shahidan, Nurul Izzati Raihan Ramzi Hannan, 2021-07-06 This book highlights the residual strength

of the CFDST column, that can be used to determine the most suitable repair method in order to retrofit the column. The book elaborates on the behavior of CFDST column after being exposed to fire. This book also discusses the effectiveness of repair method using single and Hybrid Fibre Reinforced Polymer (FRP) of fire-damaged CFDST columns. It concludes by taking a look at different parameters such as thickness of outer steel tube and fire exposure time as factors affecting thermal properties/stability.

Am Simon Plant, 2012-12 Only upon publication do I realise this book's genre: Horror! The first part of this book Am is only a fragment of a book I wrote largely in the eighties about my search for my mind after a serious mental breakdown after leaving Oxford University in 1976, my subsequent conversion to Christianity and the development of a personal relationship with Jesus. It also describes some of the relationships in my life, my mother, my father, my ex wife and my brothers and sisters, plus a few friends, and associates. Their names are disguised! It is written in broken language to evoke my mentality at the time. Please forgive some of the errors in text, because I haven't had the time or patience(!) to work any more on it because it belongs in the past. However some of the 'errors' are deliberate, I was thinking very much of James Joyce's style in Ulysses. The second half, Regime in the Head, written before AM, is about my life in the mental health system

and the Church of England, and is largely a diary.

The Engineering Index Annual for ..., 1915 Since its creation in 1884, Engineering Index has covered virtually every major engineering innovation from around the world. It serves as the historical record of virtually every major engineering innovation of the 20th century. Recent content is a vital resource for current awareness, new production information, technological forecasting and competitive intelligence. The world's most comprehensive interdisciplinary engineering database, Engineering Index contains over 10.7 million records. Each year, over 500,000 new abstracts are added from over 5,000 scholarly journals, trade magazines, and conference proceedings. Coverage spans over 175 engineering disciplines from over 80 countries. Updated weekly.

AM (combined) Simon Plant, 2014-07-04 When reality, fiction and imagination melanged into the personal diary, writings and religion of an academic schizophrenic within the asylum of mental health protection, Am was born. A unique experience, by a survivor, that you can now revisit, but don't let it get in your head! It is book about survival and the story of one persons survival in a mental health regime! It is a psychological thriller about my attempt to make sense of a confusing life situation.

Iron Skin Brendan John Lee, It is 2019 and life is good for Brendan Lee - he spends ten months a year globetrotting as a travel writer, his afternoons are spent writing stories in coffee shops, his

evenings are spent wandering new cities, eating street food and mingling in bars until the morning hours. But overnight, everything changes. With the sudden onset of TSW - a debilitating skin condition - he is on a last-minute flight home. Days are now spent lifeless in his old childhood bedroom - the pain is constant, the nights are sleepless, his face is unrecognisable. Even getting up and down the stairs is a struggle. But the doctor's orders are clear: If you want to heal, no matter how much it hurts, you need to spite hating running with a passion, despite not having worn a pair of running shoes in twenty years, he goes for his first run. He barely survives it. He goes for another. Within weeks he's running every day and soon he realises, his old life - the backpacking, the wandering in exotic cities - it's not coming back. Running is all he has now. And even though he hates it - hates it more every time he laces up his shoes - running is what will eventually help him achieve the impossible, and ultimately save his life.

Laser Heating of Metals A. M. Prokhorov,2018-01-31 In order to ensure efficient use of lasers, and for any large-scale implementation, a thorough knowledge of the fundamental laws governing the interaction of radiation with matter is required. Laser Heating of Metals provides a systematic and comprehensive presentation of the fundamental principles underlying the physical and chemical mechanisms governing the interaction of laser radiation with solid targets, and in particular metals in gaseous environments, for a wide range of beam parameters. The authors have been active in the field of interactions between lasers and materials for many years, and this book summarises the results of their work, in particular concerning the action of CO2 lasers on metals. These results are

then discussed at some length. Laser Heating of Materials will be of interest to scientists at all levels with an interest in the interaction of radiation with condensed matter, and in particular to those involved in laser cutting and welding etc, and metal-working.

Sixty Shades of Generalized Continua Holm Altenbach, Arkadi Berezovski, Francesco dell'Isola, Alexey Porubov, 2023-02-13 In this book, well-known scientists discuss modern aspects of generalized continua, in order to better understand modern materials and advanced structures. They possess complicated internal structure, and it requires the development of new approaches to model such structures and new effects caused by it. This book combines fundamental contributions in honor of Victor Eremeyev and his 60th birthday.
