

Ambulance Sirens And Lights

Peter Canning

Lights and Sirens Kevin Grange, 2015-06-02 A true account of going through UCLA's famed Daniel Freeman Paramedic Program—and practicing emergency medicine on the streets of Los Angeles. Nine months of tying tourniquets and pushing new medications, of IVs, chest compressions, and defibrillator shocks—that was Kevin Grange's initiation into emergency medicine when, at age thirty-six, he enrolled in the “Harvard of paramedic schools”: UCLA's Daniel Freeman Paramedic Program, long considered one of the best and most intense paramedic training programs in the world. Few jobs can match the stress, trauma, and drama that a paramedic calls a typical day at the office, and few educational settings can match the pressure and competitiveness of paramedic school. Blending months of classroom instruction with ER rotations and a grueling field internship with the Los Angeles Fire Department, UCLA's paramedic program is like a mix of boot camp and med school. It would turn out to be the hardest thing Grange had ever done—but also the most transformational and inspiring. An in-depth look at the trials and tragedies that paramedic students experience daily, *Lights and Sirens* is

ultimately about the best part of humanity—people working together to help save a human life.

EMT Pat Ivey, 2014-04-01 A cardiac technician takes you to the front lines of emergency medicine—from tragic car accidents to gunshot wounds—in this “fast-moving” memoir (Booklist). This book takes the reader to the front lines of medicine, from a serious automobile accident on a dark country road to a woman in cardiac arrest to a young man with near-fatal gunshot wounds. For these patients and countless others, treatment cannot wait until they are wheeled into a distant emergency room. If lives are to be salvaged, care must begin with the life-saving skills of Emergency Medical Technicians. “I could never work on a rescue squad,” is a statement the author has heard over and over throughout her years of squad service and readily admits it once described her own feelings. “If I can do it, so can you,” is her response to those whose fear and self-doubt hold them back. “Anything is possible.” *EMT: Beyond the Lights and Sirens* is more than a personal account of Pat Ivey’s rescue squad experiences. It is a story of courage and hope and letting go of past losses. It is a book for anyone who has ever struggled to go beyond who they are. Step aboard the ambulance. Witness the

tender moments amidst tragedy. Experience the joy and the anguish, and share the tears and laughter of volunteer rescue squad personnel who respond around the clock to the cries of others. In this heartwarming and compelling book, Pat Ivey takes the reader beyond the lights and sirens on a journey they will never forget.

Reading Sounds Sean Zdenek,2015-12-23 The work of writing closed captions for television and DVD is not simply transcribing dialogue, as one might assume at first, but consists largely of making

rhetorical choices. For Sean Zdenek, when captioners describe a sound they are interpreting and creating contexts, they are assigning significance, they are creating meaning that doesn't necessarily exist in the soundtrack or the script. And in nine chapters he analyzes the numerous complex rhetorical choices captioners make, from abbreviating dialogue so it will fit on the screen and keep pace with the editing, to whether and how to describe background sounds, accents, or slurred speech, to nonlinguistic forms of sound communication such as sighing, screaming, or laughing, to describing music, captioned silences (as when a continuous noise suddenly stops), and sarcasm, surprise, and other forms of meaning associated with vocal tone. Throughout, he also looks at closed captioning style manuals and draws on interviews with professional captioners and hearing-impaired viewers. Threading through all this is the novel argument that closed captions can be viewed as texts worthy of rhetorical analysis and that this analysis can lead the entertainment industry to better standards and practices for closed captioning, thereby better serve the needs of hearing-impaired viewers. The author also looks ahead to the work yet to be done in bringing better captioning practices to videos on the

Internet, where captioning can take on additional functions such as enhancing searchability. While scholarly work has been done on captioning from a legal perspective, from a historical perspective, and from a technical perspective, no one has ever done what Zdenek does here, and the original analytical models he offers are richly interdisciplinary, drawing on work from the fields of technical communication, rhetoric, media studies, and disability studies.

Ambulance Girl Jane Stern, 2007-12-18 The basis for the movie starring Kathy Bates, *Ambulance Girl* is an inspiring story by a woman who found, somewhat late in life, that “in helping others I learned to help myself.” Jane Stern was a walking encyclopedia of panic attacks, depression, and hypochondria. Her marriage of more than thirty years was suffering, and she was virtually immobilized by fear and anxiety. As the daughter of parents who both died before she was thirty, Stern was terrified of illness and death, and despite the fact that her acclaimed career as a food and travel writer required her to spend a great deal of time on airplanes, she suffered from a persistent fear of flying and severe claustrophobia. Yet, this fifty-two-year-old writer decided to become an emergency medical technician. Stern tells her story with great humor and poignancy, creating a wonderful portrait of a middle-aged, Woody Allen-ish woman who was “deeply and neurotically terrified of sick and dead people,” but who went out into the world to save other people’s lives as a way of saving her own. Her story begins with the boot camp of EMT training: 140 hours at the hands of a dour ex-marine who took delight in presenting a veritable parade of amputations, hideous deformities, and gross disasters.

Jane—overweight and badly out of shape—had to surmount physical challenges like carrying a 250-pound man seated in a chair down a dark flight of stairs. After class she did rounds in the emergency room of a local hospital. Each call Stern describes is a vignette of human nature, often with a life in the balance. From an AIDS hospice to town drunks, yuppie wife beaters to psychopaths, Jane comes to see the true nature and underlying mysteries of a town she had called home for twenty years. Throughout the book we follow her as she gets her sea legs, bonds with the firefighters who become her colleagues, and eventually, comes to be known as Ambulance Girl.

Lights and Siren Joan E. Lloyd, Edwin B. Herman, 1996 Dial 911 and they are there--the Emergency Medical Technicians, first to arrive on the scene and the lifeline to the E.R. Now, from two veterans of an upstate New York volunteer EMT unit, here is the true, firsthand account of the daily traumas, tragedies, and triumphs behind the Lights and Sirens.

Emergency Vehicle Accidents Stephen S. Solomon, Paul F. Hill, 2002 What causes emergency vehicle accidents, especially with sirens and flashing lights in use? Where do they most often occur?

What can emergency services personnel do to prevent these accidents? And, finally, what laws govern the use of these vehicles? Stephen Solomon, an optometrist who has studied perceptual issues for over thirty years, has updated Part One of this complete guide to the safety issues surrounding emergency vehicles. You will learn about the problems with flashing lights, sirens, retroreflective tape, and the color of the vehicle. Many of these safety devices are used in a way that limits their effectiveness. Part Two of this book discusses the law of emergency vehicles on emergency runs. The drivers of police vehicles, fire trucks, and ambulances have the right to ignore, with due caution and acting without reckless disregard, the rules of the road. This section provides a thorough study of the statutory and case law.

Lights & Sirens James Cowan, Lois Cowan, 1998 This time-saving reference offers practical information on 15 types of emergency professionals and their experiences, featuring chapters that focus on specific professions, such as dispatchers, dog handlers, forest and park rangers, firefighters, EMTs, paramedics, ER personnel and more; complete profiles of each occupation - job descriptions,

qualifications, required skills, necessary equipment, special risks and jargon; charts, lists, sidebars and sample scenarios that help you save time and get the information right; medications and equipment commonly used at emergency scenes - from what they do, to exactly how they are administered; and a detailed glossary of emergency injuries and illnesses and how they are treated.

Rescue 471 Peter Canning,2000-04-04 TRUE LIFE-AND-DEATH DRAMA In taut, thrilling prose, Peter Canning has written a book that captures the rarely seen real world of emergency medicine. A seasoned paramedic who fights under enormous pressure to save lives, Canning trains new paramedics for the rigors of a nonstop, action-packed battle. From a four-month-old baby who has stopped breathing to a sixty-seven-year-old woman with a strange abdominal mass that threatens to explode--these are gripping true stories from the ER on the streets. An exciting, often moving account,

Canning tells a powerful story of camaraderie, selflessness, and courage as paramedics try to stand tall and human through both defeat and victory.
