*AM-FM Broadcast Financial Data* ,1973

*Davenport's Woc AM-FM-TV* David T. Coopman,2010-05 Beginning in 1922, Davenport's WOC has charted an impressive list of broadcasting firsts: the first licensed commercial radio station west of the Mississippi River; first station to establish logging, the practice of recording program schedules down to the minute and second; the use of time signals at the beginning of programs; first to build and use audio mixing controls that allowed multiple microphone usage; first to broadcast from a state legislature; and first to broadcast programming meant specifically for children. WOC-TV was the first television station in Iowa on the air when it began regular programming in 1949. This volume of images presents an overview to the history, facilities, programming, and technology of the WOC stations and provides a glimpse at the stations today, as new ownership carries on an outstanding tradition in Quad City broadcasting.

**Special Edition Using the Internet and Web** Michael Miller, 2001 Special Edition Using the Internet and Web covers multiple individual end-user activities—it's like having a dozen activity-specific books under a single cover! The book is organized by activity—how people spend their time online. Each chapter describes a specific activity, and shows users the best ways to engage in that activity online—complete with real-world tips and advice for getting the most of that time online. Topics range from getting connected—and getting connected faster—to online shopping and downloading MP3 files. In short, whatever users want to do online, they'll find in this book—without having to wade through hundreds of pages of software-specific instruction.

**Radio 2.0** Matthew Lasar, 2016-03-14 Welcome to the uncertain world of Radio 2.0—where podcasts, mobile streaming, and huge music databases are the new reality, as are tweeting deejays and Apple's Siri serving as music announcer—and understand the exciting status this medium has, and will continue to have, in our digitally inclined society. How did popular radio in past

decades—from President Franklin D. Roosevelt's Fireside Chats in the 1930s through Top 40 music and Rush Limbaugh's talk radio empire—shape American society? How did devices and systems like the iPhone, Pandora, and YouTube turn the radio industry upside-down? Does radio still have a future, and if so, what will we want it to look like? *Radio 2.0: Uploading the First Broadcast Medium* covers the history and evolution of Internet radio, explaining what came before, where Internet radio came from, and where it is likely headed. It also gives readers a frame of reference by describing radio from its introduction to American audiences in the 1920s—a medium that brought people together through a common experience of the same broadcast—and shows how technologies like digital music and streaming music services put into question the very definition of radio. By examining new radio and media technologies, the book explores an important societal trend: the shift of media toward individualized or personalized forms of consumption.

Seattle Radio John F. Schneider, 2013 Seattle's first radio broadcast aired in 1919, and over the next 90 years, the city drew national attention for its collection of flamboyant and sometimes quirky broadcast impresarios and performers. The parade of people that passed in front of and behind the Puget Sound microphones included a big-time bootlegger and his wife, two embezzling bank managers, a political campaign manager, and a lumber mill baron's daughter. Two local radio men started with practically nothing and built their own successful Northwest station groups. An underpaid novice Seattle radio announcer went on to become the dean of the country's television newscasters. A 1950s disc jockey used acrobatic publicity stunts to draw an audience for his station.

A guitar-strumming radio singer capitalized on his fame to build a chain of restaurants. And the founder of a Seattle free form FM radio station went on to build a network of community FM stations around the country, making him The Johnny Appleseed of Community Radio.

Radio William A. Richter,2006 From payola to podcasting, from the advertising office to the DJ booth to the station antenna, Radio: A Complete Guide to the Industry offers a concise, one-stop introduction to all aspects of the radio industry. Readers are taken on a lively tour of radio's history from the early experiments with wireless to today's satellite and digital radio. Industry veteran

William A. Richter brings readers inside the typical station to explain who does what and how all the pieces fit together. The book also includes some brief interviews from working professionals for more perspective. Richter explains how ratings work, gives an overview of the major industry players, and guides readers through FCC regulations and other ethical and legal issues that impact radio. Written in a crisp, easy style, and including glossaries in each chapter, *Radio* is well suited for a range of courses on radio. It is a valuable resource for anyone interested in radio, from aspiring college DJs to general managers of radio stations.

**Sounds of Change** Christopher H. Sterling, Michael C. Keith, 2009-09-15 When it first appeared in the 1930s, FM radio was a technological marvel, providing better sound and nearly eliminating the static that plagued AM stations. It took another forty years, however, for FM's popularity to surpass that of AM. In *Sounds of Change*, Christopher Sterling and Michael Keith detail the history of FM, from its inception to its dominance (for now, at least) of the airwaves. Initially, FM's identity as a separate service was stifled, since most FM outlets were AM-owned and simply simulcast AM programming and advertising. A wartime hiatus followed by the rise of television precipitated the failure of hundreds of FM stations. As Sterling and Keith explain, the 1960s brought FCC regulations allowing stereo transmission and requiring FM programs to differ from those broadcast on co-owned AM stations. Forced nonduplication led some FM stations to branch out into experimental programming, which attracted the counterculture movement, minority groups, and noncommercial public and college radio. By 1979, mainstream commercial FM was finally reaching larger audiences than AM. The story of FM since 1980, the authors say, is the story of radio, especially in its many musical formats. But trouble looms. Sterling and Keith conclude by looking ahead to the age of digital radio--which includes satellite and internet stations as well as terrestrial stations--suggesting

that FM's decline will be partly a result of self-inflicted wounds--bland programming, excessive advertising, and little variety.
