Parker Pyne Investigates Agatha Christie,2010-02-10 Agatha Christie once again demonstrates her mastery of the short form mystery with Parker Pyne Investigates—short stories of crime and detection featuring Parker Pyne, certainly one of the most unconventional private investigators ever to pursue a hot lead. Mrs. Packington felt alone, helpless and utterly forlorn. But her life changed when she stumbled upon an advertisement in the Times that read: Are you happy? If not, consult Mr. Parker Pyne. Equally adept at putting together the fragments of a murder mystery or the pieces of a broken marriage, Mr. Parker Pyne is possibly the world's most unconventional private investigator. Armed with just his intuitive knowledge of human nature, he is an Englishman abroad, traveling the globe to solve and undo crime and misdemeanor.

The Apothecary Maile Meloy,2011-10-04 It's 1952 and the Scott family has just moved from Los Angeles to London. Here, fourteen-year-old Janie meets a mysterious apothecary and his son, Benjamin Burrows - a fascinating boy who's not afraid to stand up to authority and dreams of becoming a spy. When Benjamin's father is kidnapped, Janie and Benjamin must uncover the secrets of the apothecary's sacred book, the Pharmacopoeia, in order to find him, all while keeping it out of the hands of their enemies - Russian spies in possession of nuclear weapons. Discovering and testing potions they never believed could exist, Janie and Benjamin embark on a dangerous race to save the apothecary and prevent impending disaster. Together with Ian Schoenherr's breathtaking illustrations, this is a truly stunning package from cover to cover.

The Mushroom at the End of the World Anna Lowenhaupt Tsing,2017-09-19 What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

Reading Stephen King Brenda Miller Power,Jeffrey D. Wilhelm,1997 This collection of essays grew out of the Reading Stephen King Conference held at the University of Maine in 1996. Stephen King's books have become a lightning rod for the tensions around issues of including mass market popular literature in middle and high school

English classes and of who chooses what students read. King's fiction is among the most popular of pop literature, and among the most controversial. These essays spotlight the ways in which King's work intersects with the themes of the literary canon and its construction and maintenance, censorship in public schools, and the need for adolescent readers to be able to choose books in school reading programs. The essays and their authors are: (1) Reading Stephen King: An Ethnography of an Event (Brenda Miller Power); (2) I Want to Be Typhoid Stevie (Stephen King); (3) King and Controversy in Classrooms: A Conversation between Teachers and Students (Kelly Chandler and others); (4) Of Cornflakes, Hot Dogs, Cabbages, and King (Jeffrey D. Wilhelm); (5) The 'Wanna Read' Workshop: Reading for Love (Kimberly Hill Campbell); (6) When 'IT' Comes to the Classroom (Ruth Shagoury Hubbard); (7) If Students Own Their Learning, What Do Teachers Do? (Curt Dudley-Marling); (8) Disrupting Stephen King: Engaging in Alternative Reading Practices (James Albright and Roberta F. Hammett); (9) Because Stories Matter: Authorial Reading and the Threat of Censorship (Michael W. Smith); (10) Canon Construction Ahead (Kelly Chandler); (11) King in the Classroom (Michael R. Collings); (12) King's Works and the At-Risk Student: The Broad-Based Appeal of a Canon Basher (John Skretta); (13) Reading the Cool Stuff: Students Respond to 'Pet Sematary' (Mark A. Fabrizi); (14) When Reading Horror Subliterature Isn't So Horrible (Janice V. Kristo and Rosemary A. Bamford); (15) One Book Can Hurt You...But a Thousand Never Will (Janet S. Allen); (16) In the Case of King: What May Follow (Anne E. Pooler and Constance M. Perry); and (17) Be Prepared: Developing a Censorship Policy for the Electronic Age (Abigail C. Garthwait). Appended are a joint manifesto by National Council of Teachers of English (NCTE) and International Reading Association (IRA) concerning intellectual freedom; an excerpt from a teacher's guide to selected horror short stories of Stephen King; and the conference program. Contains a 152-item reference list of literary works.(NKA)

Essentials of Psychology Jeffrey S. Nevid, 2020-01-07 Did you know that Facebook use can affect grades, and that only about 1% of students in a research study could correctly draw the Apple logo? Written in an engaging style that speaks directly to readers with examples of psychological concepts drawn from daily life, this brief introductory text makes the study of psychology interesting while providing solid grounding in the subject's knowledge base to help you succeed in the course. With built-in learning aids, *ESSENTIALS OF PSYCHOLOGY: CONCEPTS AND APPLICATIONS*, 5th Edition features an effective learning system that helps you absorb and remember important information. In MindTap, the text's online learning experience, you'll find author podcasts and videos that you can access from your smart phone, direct links to TEDTalks, interactive learning activities, cool apps, and more.

Slow Violence and the Environmentalism of the Poor Rob Nixon, 2011-06-01 The violence wrought by climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Using the innovative concept of slow violence to describe these threats, Rob Nixon focuses on the inattention we have paid to the attritional lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today. Slow violence, because it is so readily

ignored by a hard-charging capitalism, exacerbates the vulnerability of ecosystems and of people who are poor, disempowered, and often involuntarily displaced, while fueling social conflicts that arise from desperation as life-sustaining conditions erode. In a book of extraordinary scope, Nixon examines a cluster of writer-activists affiliated with the environmentalism of the poor in the global South. By approaching environmental justice literature from this transnational perspective, he exposes the limitations of the national and local frames that dominate environmental writing. And by skillfully illuminating the strategies these writer-activists deploy to give dramatic visibility to environmental emergencies, Nixon invites his readers to engage with some of the most pressing challenges of our time.

The 71F Advantage National Defense University Press, 2010-09 Includes a foreword by Major General David A. Rubenstein. From the editor: 71F, or 71 Foxtrot, is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living. In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the grey-beards of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families.

Staging Governance Daniel O'Quinn, 2005-11-30 At the same time, official speeches and proceedings on colonial practices, such as the public trials of Clive and Hastings, became theatrical events themselves. --Jacket.

Visible Identities Linda Martin Alcoff, 2005-12-22 In the heated debates over identity politics, few theorists have looked carefully at the conceptualizations of identity assumed by all sides. *Visible Identities* fills this gap. Drawing on both philosophical sources as well as theories and empirical studies in the social sciences, Linda Martin Alcoff makes a strong case that identities are not like special interests, nor are they doomed to oppositional politics, nor do they inevitably lead to conformism, essentialism, or reductive approaches to judging others. Identities are historical formations and their political implications are open to interpretation. But identities such as race and gender also have a powerful visual and material aspect that eliminativists and social constructionists often underestimate. *Visible Identities* offers a careful analysis of the political and philosophical worries about identity and argues that these worries are neither supported by the empirical data nor grounded in realistic understandings of what identities are. Linda Martin Alcoff develops a more realistic characterization of identity in general through combining phenomenological approaches to embodiment with hermeneutic concepts of the interpretive horizon. Besides addressing the general contours of social identity, Linda Martin Alcoff develops an account of the material infrastructure of gendered identity, compares and contrasts gender identities with racialized ones, and explores the experiential aspects of racial subjectivity for both

whites and non-whites. In several chapters she looks specifically at Latino identity as well, including its relationship to concepts of race, the specific forms of anti-Latino racism, and the politics of mestizo or hybrid identity.

Weary Warriors Pamela Moss, Michael J. Prince, 2014-06-01 As seen in military documents, medical journals, novels, films, television shows, and memoirs, soldiers' invisible wounds are not innate cracks in individual psyches that break under the stress of war. Instead, the generation of weary warriors is caught up in wider social and political networks and institutions—families, activist groups, government bureaucracies, welfare state programs—mediated through a military hierarchy, psychiatry rooted in mind-body sciences, and various cultural constructs of masculinity. This book offers a history of military psychiatry from the American Civil War to the latest Afghanistan conflict. The authors trace the effects of power and knowledge in relation to the emotional and psychological trauma that shapes soldiers' bodies, minds, and souls, developing an extensive account of the emergence, diagnosis, and treatment of soldiers' invisible wounds.

Ben Archer and the Cosmic Fall (The Alien Skill Series, Book 1) Rae Knightly, 2020-05-18 Crashed UFOs. A boy with an alien power. You can't put this book down now because you'll instantly want to know why aliens came to Earth.

The Environmentalism of the Poor Joan Martínez-Alier, 2003-01-01 This is a wonderful book rich in empirical detail, full of theoretical insights, offering hope in a bleak world, altogether inspiring. . . a tremendous achievement of having helped to create the disciplines of ecological economics and political ecology, bringing them alive in this book, and making their insights available to the developing worldwide movement for environmental justice. Pat Devine, *Environmental Values* Any book by the ecological economist Joan Martinez-Alier is a Big Publishing Event. . . this is a book by a writer who loves his subject, knows it well, respects its history, and is driven by the desire to do justice. These are qualities enough to send you to the bookshop or the library in search of *The Environmentalism of the Poor*. Andrew Dobson, *Environment Politics* The book is a worthy and in-depth contribution to debates about political ecology and ecological economics. It should be read by all environmental and ecological economists who wish to make their analysis more relevant. Tim Forsyth, *Progress in Development Studies* A marvellous combination of insight, research and activism. . . A must-read for policymakers, practitioners and academics alike, and for anyone concerned with sustainable development, environmentalism or poverty alleviation. *Human Ecology Journal* . . . one of the most important environmental books to have been published recently. Martinez-Alier integrates two of the most significant areas of environmental theory political ecology and ecological economics. Eurig Scandrett, *Friends of the Earth Scotland* The book has three main strengths: its bibliography, which is extensive; the global perspective on the environmental movement and the relationship with poverty; and the general theme of this interdisciplinary work, which is not so much to provide new information, but to consider the existing information in a new light. Martinez-Alier is to be commended for taking such a step in the literature . . . the writing style is extremely approachable . . . Recommended. B.J. Peterson, *Choice* [Joan] Martinez-Alier combines the honest discipline of a scholar with the passionate energy of

an activist. The result, *The Environmentalism of the Poor*, is highly recommended! Herman E. Daly, University of Maryland, College Park, US *The Environmentalism of the Poor* has the explicit intention of helping to establish two emerging fields of study political ecology and ecological economics whilst also investigating the relations between them. The book analyses several manifestations of the growing environmental justice movement , and also of popular environmentalism and the environmentalism of the poor , which will be seen in the coming decades as driving forces in the process to achieve an ecologically sustainable society. The author studies, in detail, many ecological distribution conflicts in history and at present, in urban and rural settings, showing how poor people often favour resource conservation. The environment is thus not so much a luxury of the rich as a necessity of the poor. It concludes with the fundamental questions: who has the right to impose a language of valuation and who has the power to simplify complexity? Joan Martinez-Alier combines the study of ecological conflicts and the study of environmental valuation in a totally original approach that will appeal to a wide cross-section of academics, ecologists and environmentalists.
