Ancient Earth and the First Ancestors: A Cultural and Geological Journey Ron Morton,Carl Gawboy,2011-11-30 In this sequel to the award winning Talking Rocks an earth scientist and an Ojibwe elder travel across Minnesota exploring the ancient rocks that make up a large part of that state.As the geologist describes how these rocks formed and brings to life the ancient worlds they created, the elder, through Native American stories, oral history, culture, and science illustrates how his people had an intimate understanding of,and respect for, these ancient rocks and the land they gave shape to.Traveling from Ely, Grand Portage, Gunflint Lake, and Isle Royale in the northern part of the state south to Jeffers, Mor-ton, and Blue Mounds State Park the two find themselves discussing such diverse topics as the nature of science, holistic geology, mining, science and spirituality, the legacy of the furtrade, significance of the Little Spirit Tree, and much more. Ancient Earth and the First Ancestors not only tells a fascinating story that spans billions of years, but is also a wonderful chronicle of two people from different cultural and scientific heritages learning to understand, appreciate,and see the value and importance in each other's way of viewing this land and the planet we all call home.

Ancestors, Kings, and the Dao Constance A. Cook,2020-10-26 Ancestors, Kings, and the Dao outlines the evolution of musical performance in early China, first within and then ultimately away from the socio-religious context of ancestor worship. Examining newly discovered bamboo texts from the Warring States period, Constance A. Cook compares the rhetoric of Western Zhou (1046-771 BCE) and Spring and Autumn (770-481 BCE) bronze inscriptions with later occurrences of similar terms in which ritual music began to be used as a form of self-cultivation and education. Cook's analysis links the creation of such classics as the Book of Odes with the ascendance of the individual practitioner, further connecting the social actors in three types of ritual: boys coming of age, heirs promoted into ancestral government positions, and the philosophical stages of transcendence experienced in self-cultivation.The focus of this study is on excavated texts; it is the first to use both bronze and bamboo narratives to show the evolution of a single ritual practice. By viewing the ancient inscribed materials and the transmitted classics from this new perspective, Cook uncovers new linkages in terms of how the materials were shaped and reshaped over time and illuminates the development of eulogy and song in changing ritual contexts.

Ancestry of Lawrence Williams Cornelia Bartow Williams,2016-10-03 Excerpt from Ancestry of Lawrence Williams: Part I, Ancestry of His Father, Simeon Breed Williams, Descendant of John Williams of Newbury and Haverhill, Mass., 1600-1674, Part II, Ancestry of His Mother Cornelia Johnston, Descendant of Thomas Johnston of Boston, Mass., 1708-1767 Taking as a basis the family chart made by Lawrence Williams, this volume has been compiled from many authentic sources, and contains little original matter. The Williams monographs written some years ago by Timothy Dwight Williams have been edited to come within the scope of the work. As these pages record the lives of some eighty ancestors among the First Settlers, as those were called who came to this country between the years 1620 and 1643, it may be well to recall some of these early emigrations. The Archaeology of Ancestors Hill/Hageman,Hageman, Jon B,2016-03-23 Contributors to this landmark volume demonstrate that ancestor veneration was about much more than claiming property rights: the spirits of the dead were central to domestic disputes, displays of wealth, and power and status relationships. Case studies from China, Africa, Europe, and Mesoamerica use the evidence of art, architecture, ritual, and burial practices to explore the complex roles of ancestors in the past. Including a comprehensive overview of nearly two hundred years of anthropological research, The Archaeology of Ancestors reveals how and why societies remember and revere the dead. Through analyses of human remains, ritual deposits, and historical documents, contributors explain how ancestors were woven into the social fabric of the living.

Mediaeval Ancestors of the House of Peniarth Part 2 Sue Passmore,2018-03-04 Vol 3 of my father's family history. Vol I Bronwylfa a House and its Family, the history of the family from the 17th century when Elizabeth Owen of Peniarth married John Lloyd of Gwyddfryniau, to the present day. Vol II Peniarth 1400-1667 tells the story of Gruffudd ab Aron who founded Peniarth down to his

descendant Margaret Owen, Elizabeth's mother, heiress of Peniarth, who died in 1667. Vol III has been divided into 2 Parts, but the whole Vol covers the mediaeval ancestry of the family at Peniarth before 1400. Part I covers the descent of Gruffudd ab Aron from Ednywain ap Bradwen and the ancestry of his wife Gwenllian; Chapter III, the family's links with Yr Arglwydd Rhys, Lord Rhys ap Gruffudd; and chapter 4 the family's descent from Llywelyn Fawr, Llywelyn ab Iorwerth. Part II tells of our ancestor Rhirid Flaidd; the ancestry of Owain Glyndwr, from whose sister Lowri we descend, the Pulestons of Emral, Royal ancestors of Duke Humphrey of Gloucester, and the families of Bohun, Fitzalan and Mortimer.

Ancestors David Hertz,2017-08-03 People involve their ancestors in every aspect of culture. Individuals and societies worldwide and throughout history have incorporated ancestors into rituals public and private, religious and secular. Societies often organize their aristocracies, tribes, and other kinship groups around ancestral constructions which are defined through laws and customs governing marriage, naming, guardianship, inheritance, and other social practices. Medical professionals consider ancestral information important to a patient's diagnosis and to the study of disease; many psychiatrists consider one's relationship to ancestors important in understanding the mental and emotional disposition of subjects. Ancestry and perceptions of ancestry frequently function as a determinant of personal, ethnic, racial, and national identity. For all its larger philosophical, medical, psychological, and religious implications, one fascinating aspect of ancestry is how passionately many people hold to 'their own' ancestry, and to their own perceptions of the same. In *Ancestors*, David Hertz offers an introductory foray into the nature of relationships people today have with their ancestors, and explores the significance of ancestry and ancestral belief in our modern world. Guided by two questions—"who are your ancestors?" and "what is your relationship to your ancestors?"—Hertz interviewed thirty-five elders and people of prominence within particular social or intellectual communities. Interviewees were accomplished in an area related to ancestry, its nature or its meaning, and included genealogists, geneticists, tribal chiefs and elders, researchers in some aspect of family or ancestry, family elders, and experienced practitioners or supervisors of particular ancestral rituals. Interviewees were selected from a variety of cultural backgrounds for purposes of contrast, comparison, and breadth—but they are not spokespeople and were not asked to 'represent' particular belief systems, doctrines, or Peoples. Rather, the interviewees describe their own personal experiences and beliefs involving ancestors. From these interviews, Hertz identifies common themes to ancestral practices and beliefs, such as the way we sanctify our ancestors, how we create a living narrative of our ancestry, and how experiences like suffering and love are shared across generations and appear to transcend death. Excerpts from interviews serve as examples throughout his narrative exploration of the concept of ancestry; a selection of full interviews are embedded throughout the text and offer glimpses into the diversity of ways that people think about who they are and where they come from.

Emperors and Ancestors Olivier Hekster,2015 This is the first systematic analysis of the different ways in which Roman imperial lineage was represented in the various 'media' through which images of emperors could be transmitted. Rather than focusing on individual rulers of the Roman Empire, it evaluates evidence over an extended period of time and differentiates between various types of sources, such as inscriptions, sculpture, architecture, literary text, and particularly central coinage, which forms the most convenient source material for a modern reconstruction of Roman representations of power over a prolonged period of time.

Ancient Alien Ancestors Will Hart,2017-07-18 Explores evidence for the theory of directed panspermia--that life on Earth and the landscape of Earth itself was engineered by extraterrestrials • Details how the Earth was terraformed through a sophisticated geo-engineering program, providing clear examples such as the precise mathematical longitude configurations of the Great Pyramid of Giza with the major rivers on Earth • Shows how our spectrum of blood types supports the theory of panspermia while directly contradicting the conventional "out of Africa" theory of evolution • Examines the strongest modern UFO accounts, including the Russian Roswell case, as well as the suppressed UFO sightings of NASA astronauts In the early 1970s, Nobel Prize-winning DNA co-discoverer Sir Francis Crick and his colleague Leslie Orgel proposed that in the distant past, an extraterrestrial race sent a spacecraft loaded with microorganisms to seed the Earth with life. Now, more than 40 years later, the fields of space research and biotechnology have advanced to the point where they can back up Crick and Orgel's claims about our ancient alien ancestors. Sharing scientific evidence of alien involvement with life on our planet and with the very landscape of Earth itself, Will Hart refines the theory of directed panspermia--that life was intentionally seeded on Earth by extraterrestrials--to reveal that the same ET agency also created humans and generated civilization. He shows how the Earth was terraformed through an engineering program so sophisticated and vast that it has escaped our attention so far--for example, the major rivers on Earth are precisely aligned through geo-engineering with the Great Pyramid of Giza. Revealing the Great Pyramid as an alien message in stone, the author explains how the Giza pyramids could not have been built by the ancient Egyptians and examines the extraterrestrial energy technologies used to move the pyramids' massive stone blocks, methods later rediscovered by Nikola Tesla and the builder of Coral Castle, Edward Leedskalnin. He details how an advanced race implanted the basic genome on Earth as well as genetically engineered the human race and shows how our spectrum of blood types supports the theory of panspermia while directly contradicting the conventional "out of Africa" theory of evolution. Investigating how the extraterrestrial agency behind the origin of civilization is still working behind the scenes today, the author examines the strongest modern UFO accounts, including the Russian Roswell case and the suppressed UFO sightings of NASA astronauts. He shows that this advanced ET civilization is not an alien race in the way we normally think of "aliens"--they are our ancestors and as human as we are.
