Ancient Egypt Gerald Massey,2007-03-01 With his earlier two series in Egyptology, Gerald Massey turned existing doctrine on its head to argue that not only had Egypt spawned human civilization, but that Egyptian mythology was the basis for Jewish and Christian beliefs. The culmination of his years at this particular intellectual pursuit, Ancient Egypt: The Light of the World is Massey's crown jewel. In this, the most philosophical (in both tone and concept) of his Egyptological works, Massey, ever the intrepid escort, leads a tour through thousands of years of sociological, cultural, and spiritual development, all the while pointing, with dazzling reason and persuasive prose, to a distant, common, Egyptian origin. British author GERALD MASSEY (1828-1907) published works of poetry, spiritualism, Shakespearean criticism, and theology, but his best-known works are in the realm of Egyptology, including A Book of the Beginnings and The Natural Genesis.

I Feel Better with a Frog in My Throat Carlyn Beccia,2010-10-25 It wasn't too long ago that people tried all sorts of things to help sick people feel better. They tried wild things like drinking a glass full of millipedes or putting some mustard on one's head. Some of the cures worked, and some of them...well, let's just say that millipedes, living or dead, are not meant to be ingested. Carlyn Beccia takes readers on a colorful and funny medical mystery tour to discover that while times may have changed, many of today's most reliable cure-alls have their roots in some very peculiar practices, and so relevant connections can be drawn from what they did then to what we do now.

Animals in the Ancient World from A to Z Kenneth F. Kitchell Jr.,2014-06-23 The ancient Greeks and Romans lived in a world teeming with animals. Animals were integral to ancient commerce, war, love, literature and art. Inside the city they were found as pets, pests, and parasites. They could be sacred, sacrificed, liminal, workers, or intruders from the wild. Beyond the city domesticated animals were herded and bred for profit and wild animals were hunted for pleasure and gain alike. Specialists like Aristotle, Aelian, Pliny and Seneca studied their anatomy and behavior. Geographers and travelers described new lands in terms of their animals. Animals are to be seen on every possible artistic medium, woven into cloth and inlaid into furniture. They are the subject of proverbs, oaths and dreams. Magicians, physicians and lovers turned to animals and their parts for their crafts. They paraded before kings, inhabited palaces, and entertained the poor in the arena. Quite literally, animals pervaded the ancient world from A-Z. In entries ranging from short to long, Kenneth Kitchell offers insight into this commonly overlooked world, covering representative and intriguing examples of mammals, reptiles, amphibians and invertebrates. Familiar animals such as the cow, dog, fox and donkey are treated along with more exotic animals such as the babirusa, pangolin, and dugong. The evidence adduced ranges from Minoan times to the Late Roman Empire and is taken from archaeology, ancient authors, inscriptions, papyri, coins, mosaics and all other artistic media. Whenever possible reasoned identifications are given for ancient animal names and the realities behind animal lore are brought forth. Why did the ancients think hippopotamuses practiced blood letting on themselves? How do you catch a monkey? Why were hyenas thought to be hermaphroditic? Was there really a vampire moth? Entries are accompanied by full citations to ancient authors and an extensive bibliography. Of use to Classics students and scholars, but written in a style designed to engage anyone interested in Greco-Roman antiquity, Animals in the Ancient World from A to Z reveals the extent and importance of the animal world to the ancient Greeks and Romans. It answers many questions, asks several more, and seeks to stimulate further research in this important field.

The Religious History of Remote Antiquity Period and The Three Dynasties (Xia, Shang and Zhou Dynasty) Li Shi, The book is the volume of "The Religious History of Remote Antiquity Period and The Three Dynasties (Xia, Shang and Zhou Dynasty)" among a series of books of "Deep into China Histories". The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600–1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070–1600 BC) before the Shang, but no writing is known from the period The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of civilization.The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times.In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the

longer-lived Han dynasty (206 BC – 220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood – the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present. Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.

The King's Frog Hunter Ken Young, 1914-10-15 Readers will be swept away by the harrowing journey taken by the King's Frog Hunter and his loyal companions, a Great-Horned Owl, a giant tortoise, and a Paint stallion, who must fight to bring truth, freedom and honor back to the Kingdom of Ameram. The story draws on art and integrity, devotion, loyalty, friendship and servanthood as beacons that illuminate truth and sharpen the sword against falsehood and evil. In the ancient land of Ameram, where giant, man eating frogs lurk in the marshes of the valleys, an aging and vain king has succumbed to the evil that is grasping control of his kingdom. His selfish behavior blinds his wisdom, opening the doors of Castle Ambermal to a wicked sorcerer who uses smoke, potions and manipulations to steal the throne and power from the rightful heir, the king's only child, Ekala. The truthful beauty and accuracy of a skilled sculptor begins the chiseling that reveals an ancient prophecy and its guardian, The King's Frog Hunter, who gathers a unique cast of characters to help the princess in her fight to save her father and the Kingdom. Together they embark on a dangerous quest that will challenge their courage, test their resolve and forge new friendships while battling to fulfill the Prophecy of Ameram.

Eye of Newt and Toe of Frog, Adder's Fork and Lizard's Leg Marty Crump, Danté Bruce Fenolio, 2015-11-16 Recent estimates suggest that nearly 3 million people in the US alone keep an amphibian or reptile as a pet. YouTube videos with odes to cane toads are ubiquitous. And yet amphibians and reptiles also keep extermination companies in business, and are reviled by many. These emotions pose great challenges to the conservation of these species, just as their populations in the natural world are in great decline. It can be quite hard to inspire stewardship of a tomato toad in the same way that one can more generally charismatic fauna like pandas and polar bears. In response, herpetologists have created large-scale programs such as Amphibian Ark, the umbrella organization behind the Year of the Frog campaign, <http://www.amphibianark.org/>, to educate and enthrall citizens with the charm of the more slimy species of the planet. Few herpetologists have contributed more to the conservation of amphibians and reptiles than Marty Crump, a renowned expert on declining amphibians. This manuscript is her ode to the toad, a masterful compilation of science and narrative centering on human relations with amphibians and reptiles across the globe. An intrepid explorer and skilled writer, Crump has gathered stories and myths and paired them with natural history to give a wonderful view of how essential amphibians and reptiles are to our well being. Using symbolism, folklore, and science, the manuscript also explores the conservation consequences of our complicated amorous and vexed affair with snakes, frogs, toads and other herpetofauna.

The Bloomsbury Handbook of Material Religion in the Ancient Near East and Egypt Nicola Laneri, Sharon R. Steadman, 2023-06-29 With contributions spanning from the Neolithic Age to the Iron Age, this book offers important insights into the religions and ritual practices in ancient Egyptian and Near Eastern communities through the lenses of their material remains. The book begins with a theoretical introduction to the concept of material religion and features editor introductions to each of its six parts, which tackle the following themes: the human body; religious architecture; the written word; sacred images; the spirituality of animals; and the sacred role of the landscape. Illustrated with over 100 images, chapters provide insight into every element of religion and materiality, from the largest building to the smallest amulet. This is a benchmark work for further studies on material religion in the ancient Near East and Egypt.

The Battle Between the Frogs and the Mice A. E. Stallings, 2020-04-28 A virtuosic, witty, charming translation of the greatest epic ever written about mice, with wonderful illustrations by Grant Silverstein. Stallings' elegant rhyming couplets are the perfect choice to honor the mousy Muse.—Emily Wilson, Professor of Classics, University of Pennsylvania From the award-winning poet and translator A. E. Stallings comes a lively new edition of the ancient Greek fable The Battle between the Frogs and the Mice. Originally attributed to Homer, but now thought to have been composed centuries later by an unknown author, The Battle is the tale of a mouse named Crumbsnatcher who is killed by the careless frog King Pufferthroat, sparking a war between the two species. This dark but delightful parable about the foolishness of war is illustrated throughout in striking drawings by Grant Silverstein. The clever introduction is written from the point of view of a mouse who argues that perhaps the unknown author of the fable is not a human after all: "Who better than a mouse, then, to compose our diminutive, though not ridiculous, epic, a mouse born and bred in a library, living off lamp oil, ink, and the occasional nibble of a papyrus, constantly perched on the shoulder of some scholar or scholiast

of Homer, perhaps occasionally whispering in his ear? Mouse, we may remember, is only one letter away from Muse.” [Stallings] couplets . . . have a lively, nimble music that should captivate modern ears . . . Providing an earthy, oboe-like obligato to Ms. Stallings's airs are the illustrations of Grant Silverstein, cross-hatched sketches that multiply like mice on the page . . . The Battle, in which beans are happily worn rather than eaten, still has the power to delight.—Wall Street Journal A. E. Stallings is an American poet who has lived in Athens, Greece since 1999. She studied Classics at the University of Georgia, and later at Oxford University. She has published four collections of poetry, Archaic Smile (which won the 1999 Richard Wilbur Award), Hapax (recipient of the Poets’ Prize), Olives (a finalist for the National Book Critics Circle Award), and Like (a finalist for the Pulitzer Prize in Poetry). Her translation of Lucretius (into rhyming fourteeners), The Nature of Things, was called by Peter Stothard in the TLS “One of the most extraordinary classical translations of recent times.” Grant Silverstein is an American artist who specializes in etchings of a narrative character and in studies of figures, landscapes, and animals. With his wife and two cats, he spends winters holed up in his studio in rural Pennsylvania, where he uses a catch and release system for visiting mice and the occasional frog. Come spring, he ventures forth to display his work at outdoor festivals; he feels fortunate to have made his living this way for forty years. He has illustrated two previous Paul Dry Books titles, Davey McGravy by David Mason and The Verb 'To Bird' by Peter Cashwell.
