The Bavarian royal castles in the Schwangau: Neuschwanstein and Hohenschwangau Hans Steinberger, 1904

A Preface to the 'Nibelungenlied' , 1987-06 This book aims to make available the necessary background for an informed reading of the Nibelungenlied, the twelfth-century epic perhaps best known to non-Germans from Wagner's music dramas. Two traditions of scholarly thought exist about the Nibelungenlied. The first sees the poem as a development out of German heroic legend; the second focuses on the work's location in the contemporary literary context at the end of the twelfth century. The first and older school deals with the evolution of the story over time and the question of how short heroic poems attained epic compass in the later Nibelungenlied. The second seeks to interpret the poem in terms of the new emergence of Arthurian romance around 1200. The author attempts to bridge the gap between the two contending schools, suggesting that neither approach precludes the other. Although the Nibelungenlied poet drew the story itself from earlier heroic poems, the author makes clear that the poet absorbed impulses from other types of literature as well. The book is in three parts. Part I discusses literary antecedents, tracing the development of German heroic poetry from the Migration Age on, then describing narrative practice in the twelfth century, in historical and legendary epic on the one hand and romance on the other. Part II analyzes the Nibelungenlied in its immediate literary context, addressing possible

sources and narrative innovations. The author relates the story of the poem to the immediate antecedent versions of the legend that are now preserved only in the Norse Thidrek's Saga, surveys recent general interpretations, and suggests a literary-historical analysis that can plot the Nibelungenlied more accurately on the literary map of the twelfth century. Part III comprises previously untranslated texts and summaries of source materials bearing on the Nibelungenlied.

Metadata and Semantics Research Emmanouel Garoufallou, Jane Greenberg, 2013-10-25 This book constitutes the refereed proceedings of the 7th Metadata and Semantics Research Conference, MTSR 2013, held in Thessaloniki, Greece, in November 2013. The 29 revised papers presented were carefully reviewed and selected from 89 submissions. The papers are organized in several sessions and tracks. The sessions cover the following topics: platforms for research datasets, system architecture and data management; metadata and ontology validation, evaluation, mapping and interoperability; content management. The tracks cover the following topics: big data and digital libraries in health, science and technology; European and national projects and project networking; metadata and semantics for open repositories, research information systems and data infrastructures; metadata and semantics for cultural collections and applications; metadata and semantics for agriculture, food and environment.

Methods and Techniques for Fire Detection A. Enis Cetin, Bart Merci, Osman Günay, Behçet Ugur Töreyn, Steven Verstockt, 2016-01-29 This book describes the signal, image and video processing methods and techniques for fire detection and provides a thorough and practical overview of this important subject, as a number of new methods are

emerging. This book will serve as a reference for signal processing and computer vision, focusing on fire detection and methods for volume sensors. Applications covered in this book can easily be adapted to other domains, such as multi-modal object recognition in other safety and security problems, with scientific importance for fire detection, as well as video surveillance. Coverage includes: Camera Based Techniques Multi-modal/Multi-sensor fire analysis Pyro-electric Infrared Sensors for Flame Detection Large scale fire experiments Wildfire detection from moving aerial platforms The basics of signal, image and video processing based fire detection The latest fire detection methods and techniques using computer vision Non-conventional fire detectors: Fire detection using volumetric sensors Recent large-scale fire experiments and their results New and emerging technologies and areas for further research

The Endocrine System in Sports and Exercise William J. Kraemer, A. D. Rogol, 2008-04-15 This valuable new addition to the Encyclopaedia of Sports Medicine series provides a comprehensive and logical look at the principles and mechanisms of endocrinology as related to sports and exercise. It looks at growth hormone factors involved in exercise and the endocrinology of

sport competition. It considers various factors and stresses on the body that may alter sporting performance. It covers topics from the acute responses and chronic adaptations of the human endocrine system to the muscular activity involved in conditioning exercise, physical labor, and sport activities. This book is an essential reference for helping to plan better programs of physical fitness, to prepare for sports competitions, and to manage the medical care of athletes.

The Nibelungenlied ,2004-08-26 Written by an unknown author in the twelfth century, this powerful tale of murder and revenge reaches back to the earliest epochs of German antiquity, transforming centuries-old legend into a masterpiece of chivalric drama. Siegfried, a great prince of the Netherlands, wins the hand of the beautiful princess Kriemhild of Burgundy, by aiding her brother Gunther in his struggle to seduce a powerful Icelandic Queen. But the two women quarrel, and Siegfried is ultimately destroyed by those he trusts the most. Comparable in scope to the Iliad, this skilfully crafted work combines the fragments of half-forgotten myths to create one of the greatest epic poems - the principal version of the heroic legends used by Richard Wagner, in The Ring.

Statistical Science in the Courtroom Joseph L. Gastwirth,2012-12-06 Expert testimony relying on scientific and other specialized evidence has come under increased scrutiny by the legal system. A trilogy of recent U.S. Supreme Court cases has assigned judges the task of assessing the relevance and reliability of proposed expert testimony. In conjunction with the Federal judiciary, the American Association for the Advancement of Science has initiated a project to provide judges indicating a need with their own

expert. This concern with the proper interpretation of scientific evidence, especially that of a probabilistic nature, has also occurred in England, Australia and in several European countries. *Statistical Science in the Courtroom* is a collection of articles written by statisticians and legal scholars who have been concerned with problems arising in the use of statistical evidence. A number of articles describe DNA evidence and the difficulties of properly calculating the probability that a random individual's profile would match that of the evidence as well as the proper way to interpret the result. In addition to the technical issues, several authors tell about their experiences in court. A few have become disenchanted with their involvement and describe the events that led them to devote less time to this application. Other articles describe the role of statistical evidence in cases concerning discrimination against minorities, product liability, environmental regulation, the appropriateness and fairness of sentences and how being involved in legal statistics has raised interesting statistical problems requiring further research.
