Find cell phones' area online by cell tower triangulation utilizing LAC (Location Area Code) and Celled from PC, iphone or Androide phone. Cell tower triangulation utilizes the LAC and Cellid to focus the position of a cellular smartphone. With information from no less than three cell towers, this strategy can ascertain a handset's area exactly. Each one base station covers a certain region, the more cell towers in your general vicinity, the more precise result it delivers. So the thickness of cell towers decides the precision. For the most part, the thickness is higher in the urban zones particularly at downtown. While in country territories, where there are less cell towers, the result is less precise. Research Anthology on Securing Mobile Technologies and Applications Management Association, Information Resources,2021-02-05 Mobile technologies have become a staple in society for their accessibility and diverse range of applications that are continually growing and advancing. Users are increasingly using these devices for activities beyond simple communication including gaming and e-commerce and to access confidential information including banking accounts and medical records. While mobile devices are being so widely used and accepted in daily life, and subsequently housing more and more personal data, it is evident that the security of these devices is paramount. As mobile applications now create easy access to personal information, they can incorporate location tracking services, and data collection can happen discreetly behind the scenes. Hence, there needs to be more security and privacy measures enacted to ensure that mobile technologies can be used safely. Advancements in trust and privacy, defensive strategies, and steps for securing the device are important foci as mobile technologies are highly popular and rapidly developing. The Research Anthology on Securing Mobile Technologies and Applications discusses the strategies, methods, and technologies being employed for security amongst mobile devices and applications. This comprehensive book explores the security support that needs to be required on mobile devices to avoid application damage, hacking, security breaches and attacks, or unauthorized accesses to personal data. The chapters cover the latest technologies that are being used such as cryptography, verification systems, security policies and contracts, and general network security procedures along with a look into cybercrime and forensics. This book is essential for software engineers, app developers, computer scientists, security and IT professionals, practitioners, stakeholders, researchers, academicians, and students interested in how mobile technologies and applications are implementing security protocols and tactics amongst devices.

The Caregiver's Toolbox Carolyn P. Hartley,Peter Wong,2015-08-03 Millions of Americans are or will be amateur caregivers for ill spouses, parents, or friends. Caregivers today, more than ever, use technology to help manage schedules, medication routines and pharmacy reminders, legal and financial affairs, as well as travel and expenses. Yet recent insurance options and health care's emerging digital world make for an overwhelming, complex process. If you are one of the 64 million current caregivers, could you access your parents' critical documents in an emergency, using their user IDs and passwords? Do you know how often your parents or parents-in-law are taking medications, how often your loved one goes to the doctor, and how to be involved in medical and life decisions? Statistics show 85 percent of caregivers are not trained in caregiving, so many people are likely winging it, picking up pieces of information here and advice there. The Caregiver's Toolbox is your guide to cool apps and online tools, insider tips on how to reduce your medical bills, your privacy rights as a caregiver, where to go for free and low-cost help, and much more. It clearly shows which tools will relieve your stress, and those that may add stress. The authors dedicate much of their professional lives to helping people navigate the health care matrix. For updates on tools, applications, and emerging technology, visit the authors' website, www.caregivers-toolbox.com.

Innovative Nursing Care Klavdija Čuček Trifković, Mateja Lorber, Nataša Mlinar Reljić, Gregor Štiglic, 2023-01-30 Higher life expectancy on a global level requires complex nursing care as poor education and a lack of knowledge can lead to mistakes. There is a need for nurses who can provide high quality and advanced nursing practice. A mix of well-grounded education and innovative research is needed, where the first provides an understanding of best nursing practice care delivery and the second helps nurses determine best practices and improve nursing care.

Lost in Trans Nation Miriam Grossman, 2023-07-18 Throughout our country, atrocities are taking place in doctor's offices and hospital operating rooms. Physically healthy children and adolescents are being permanently disfigured and sometimes sterilized. Those youth say they're transgender, and we—their parents, teachers, therapists, and doctors—are supposed to agree with their self-diagnosis and take a back seat as they make the most consequential decision of their lives: to alter their bodies in order to, we are told, “align” them with their minds. Medical, educational, and government authorities advise us to support the “gender journeys” of still developing kids, including medical interventions with poor evidence of long-term improvement. This would not be acceptable in any other field of medicine. Indeed, the treatments our medical authorities and Washington call “crucial” and “life-saving” have been banned in progressive Sweden, Finland, and Britain. Dr. Miriam Grossman is a child and adolescent psychiatrist whose practice consists of trans-identified youth and their families. In Lost in Trans Nation, she implores parents to reject the advice of gender experts and politicians and trust their guts—their parental instincts—in the face of an onslaught of ideologically driven misinformation that steers them and their children toward risky decisions they may end up mourning for the rest of their lives. The beliefs that male and female are

human inventions; that the sex of a newborn is arbitrarily “assigned”; and that as a result the child requires “affirmation” through medical interventions—these ideas are divorced from reality and therefore hazardous, especially to children. The core belief—that biology can and should be denied—is a repudiation of reality and a mockery of what hard science teaches about being male and female. Dr. Grossman believes that parents know their child best; they especially know if they have a son or daughter. But currently in our country when it comes to gender identity, everyone knows better than mom and dad. Schools enable students to live double lives—Patrick at home, Patti at school. Activists tell kids their loving homes are “unsafe” when parents voice doubts about the child’s new identity. For refusing to see their son as their daughter, parents might be reported to protective services, a development that can lead to a family’s destruction. Lost in Trans Nation arms parents with the ammunition to avoid, or, if necessary, fight what many families describe as the most difficult challenge of their lives. Parents will learn what to say and how—at home, at school, and if necessary, to police when they appear at the door. “Don’t be blindsided like so many parents I know,” warns Grossman, “be proactive and get educated. Feel prepared and confident to discuss trans, nonbinary, or whatever your child brings to the dinner table.” Whether it’s the “trans is as common as red hair” claim, or the “I’m not your son, I’m your daughter” proclamation, or the “do you prefer a live son or a dead daughter” threat, says Grossman, no family is immune, and every parent must be prepared. No child is born in the wrong body, Dr. Grossman reassures us, their bodies are just fine; it’s their emotional lives that need healing. Whether you’re facing a gender identity battle in your home right now, or want to prevent one, you need this book to guide you and your loved ones out of the madness.

The Business of Android Apps Development Mark Rollins,2012-02-01 The growing but still evolving success of the Android platform has ushered in a second mobile technology “gold rush” for apps developers, but with well over 100,000 apps and counting in the Google Android Market and now the Amazon Android Appstore, it has become increasingly difficult for new applications to stand out in the crowd. Achieving consumer awareness and sales longevity for your Android app requires a lot of organization and some strategic planning. Written for today's Android apps developer or apps development shop, The Business of Android Apps Development shows how to incorporate marketing and business savvy into every aspect of the design and development process, giving your application the best possible chance of succeeding in the the various Android app stores and markets. This book takes you step-by-step through cost-effective marketing, public relations and sales techniques that have proven successful for professional Android app creators and indie shops—perfect for independent developers on shoestring budgets. No prior business knowledge is required. This is the book you wish you had read before you launched your first app!

~~#DELETED~~ Allum Bokhari,2020-09-22 Uncover the hidden systems created by the most powerful tech companies in the world that are determined to stop Donald Trump. Journalist Allum Bokhari has spent four years investigating the tech giants that dominate the Internet: Google, Facebook, YouTube, Twitter. He has discovered a dark plot to seize control of the flow of information, and utilize that power to its full extent—to censor, manipulate, and ultimately sway the outcome of democratic elections. His network of whistleblowers inside Google, Facebook and other companies explain how the tech giants now see themselves as good censors, benevolent commissars controlling the information we receive to protect us from dangerous speech. They reveal secret methods to covertly manipulate online information without us ever being aware of it, explaining how tech companies can use big data to target undecided voters. They lift the lid on a plot four years in the making—a plot to use the power of technology to stop Donald Trump's re-election.
