The Android's Dream John Scalzi,2007-04-01 From New York Times bestseller and Hugo Award-winner John Scalzi, a wild-and-woolly caper novel of interstellar diplomacy A human diplomat creates an interstellar incident when he kills an alien diplomat in a most . . . unusual . . . way. To avoid war, Earth's

government must find an equally unusual object: a type of sheep (The Android's Dream), used in the alien race's coronation ceremony. To find the sheep, the government turns to Harry Creek, ex-cop, war hero and hacker extraordinaire, who, with the help of a childhood friend turned artificial intelligence, scours the earth looking for the rare creature. But there are others with plans for the sheep as well. Mercenaries employed by the military. Adherents of a secret religion based on the writings of a 21st century SF author. And alien races, eager to start a revolution on their home world and a war on Earth. To keep our planet from being enslaved, Harry will have to pull off a grand diplomatic coup, a gambit that will take him from the halls of power to the lava-strewn battlefields of alien worlds. There's only one chance to get it right, to save the life of the sheep—and to protect the future of humanity. Essays from the Edge of Science Kenneth W. Behrendt, 2015-04-29 Essays from the Edge of Science is author and researcher Kenneth W. Behrendt's latest contribution to the literature of the New Age. It is an exciting and insightful analysis of various topics that takes the reader from the depths of our planet's oceans to the farthest reaches of cosmic space and time while outlining what will most likely be accepted science by the end of this century. You'll learn about the astonishing telepathic powers of the so-called lower animals. An entire chapter is devoted to the living subterrestrial creatures that inhabit the Earth's crust and whose highly evolved paranormal powers are responsible for many of the events taking place in haunted houses. The soon coming elimination of fossil fuels and their replacement by free energy devices that use the power of permanent magnets is discussed. Even the nature of time as well as a means to "travel" through it is explored as the reader is taken on an imaginary ride aboard what could be the first truly functional time machine. In a highly controversial chapter, the author finally gives the real reason that our planet's major governments dare not reveal what they know about the UFO phenomenon! All this, however, is only a small sample of what awaits one in this incredible work. This book is sure to fascinate the general reader who has always suspected that what we have been taught is real is, in fact, only a very small portion of a much larger and stranger reality. Now that rarely seen hidden reality is exposed so that it can finally be a subject for serious scientific inquiry.

Proceedings of the First Mandalika International Multi-Conference on Science and Engineering 2022, MIMSE 2022 (Informatics and Computer Science) I Gede Pasek Suta Wijaya,Junseok Hwang,Agung Mulyo Widodo,Bambang Irawan,2023-02-10 This is an open access book. The covid-19 pandemic today forces humans to do almost all activities from home. Consequently, inventions in many fields of engineering technology are needed to facilitate those activities. First, human activities mainly are based on information technology today and internet connection is very important. People generate, send, and receive data by their smartphones every time and everything is connected to the internet. Equipment becomes smarter to assist the owner. Second, People need powerful, efficient, and smart vehicles and machines in Industry 4.0. Third, the need for energy increases, which causes the decrease of global environmental quality. It needs new technology for saving energy by discovering new technologies in mechanical engineering. Fourth, many technologies emerge as disaster prevention by developing innovations in civil engineering and architecture. The Engineering Faculty of University of Mataram invites engineers and researchers around the world to visit Lombok island and to attend the valuable multi fields conference on science and engineering named “The First Mandalika International Multi-conference on Science and Engineering 2022” or “1st MIMSE 2022”. This fruitful event will be the annual conference in Lombok island which is supported by the West Nusa Tenggara Province government. Initially, the 1st MIMSE 2022 consisted of 5 engineering fields are Civil, Architecture, Electrical, Mechanical, and Informatics Engineering.

Partnering with HMS: A Guide for App Developers Xihai Wang,Yue Wang,Hailiang Wu,2021-09-14 Partnering with HMS: A Guide for App Developers is the first book to introduce readers to the Huawei Mobile Services (HMS) ecosystem. It gives developers a fundamental understanding of the ecosystem and how to leverage kit and tool capabilities to make their apps better. This book is also a quick start guide for kit integration and practical environment setup, detailing the functions and principles behind each kit. By demonstrating how to integrate kits, the authors teach these kits by action: Account Kit, IAP, Push Kit, Location Kit, Map Kit, Site Kit, Safety Detect, and FIDO. Readers are fully introduced to how they can use HMS open capabilities to develop quality apps, acquire users, and monetize their hard work. In addition, the ecosystem background – the business model and value chain that underpin the entire ecosystem as well as its privacy compliance framework – is crucial to operations and illustrated in this book.

Phantom of Apocalypse Jon Kofas,2019-09-26 Dr. Stein believes that the solution to the pandemic in late 22nd century America rests with his experiment of the first post-plague bio-engineered human. His goal and that of his partner Red carrying the bio-engineered baby is to escape the electronic-fenced city of New Heaven, Iowa. Along with their friend Sarah, they plan to reach their destination in northern Canada where the prototype virus-free baby will grow up, far away from the infected techno-society. Following rebel uprisings in the mid-22nd century, accidental biochemical warfare contamination across the country ushered in a new era and new order in society. Under the cloud of the plague where the majority are infected, survival is a daily struggle behind electric-fenced cities. To feed the virus and maintain their health, the infected resort to physical and psychological violence and aggression. With any act or thought of

love, passion or compassion, the condition of the infected population deteriorates. Free of virus symptoms, a minority of the population known as mutants are relegated to ghettos. Under the watchful eye of the police and widespread satellite and drone surveillance to control the population, the police-state has taken control of cities where rebels hide out in mutant ghettos waiting for the next uprising to topple the regime. In a world of humans with cybernetic organs operating with the aid of cybernetic devices engineered to withstand the polluted environment, Dr. Stein, Red, and Sarah dream of a world where they would be able to distinguish people living free from androids serving their infected masters. Melody, Dr. Stein and Red's bio-engineered child growing up in northern Canada's wilderness, represents new hope for humanity, until she decides to return to New Heaven so she can be a part of the world from which her mother Red and her lab-creator father Dr. Stein escaped.

Petbots: The Pet Factor Judy Brown, 2015-02-05 Archie the Petbot cat, Sparky the mouse and Flo the bird may be robots with special high-tech skills, but they are obsessed with TV show The Pet Factor - where talented pets show off and compete for top prizes. When auditions for the show come to town, the petbots get their human friends - children Jack, Anya and Sophie - to smuggle them into the studios to watch. But pets tipped for stardom are going missing! When Sophie is given a warning to keep her cat out of the semi-finals, Archie volunteers to dress up and act like a real cat in his place. But can a robot be convincing as a real animal? And when Archie is pet-napped, how are the others ever going to rescue him? Packed with brilliant Petbot pictures by the author herself!

IMPROBABLES: a satire about very large numbers SC Marshall, 2018-07-04 Always the same destination... ..an extinction event This is not the first version of the universe. Our technology brings us to an extinction event and we self-destruct, again and again. 1,142 times so far. Can we finally break the cycle? Or are we stuck in a simulation? A Prequel - NO EXPERIENCE NECESSARY Mathematics professor Lawrence Chu is in love with professor Kassman. One night he made a drunken claim that the central tendency of the universe indicated they should kiss again. The seemingly nonsensical argument that followed resulted in a breakthrough mathematical model and a weapon. This is a history of that weapon. They are the Goodness Empire and they control 80% of the universe. Don't let the name fool you. It is an empire built on conquest and slavery. Five former enemies now navigate a bumpy new era of cooperation. Chiro is First Minister and head of the largest faction. He is a ruthless leader and 80% is not enough for him. Scientists are about to give him the weapon he needs to finally destroy the rebels in the outer spiral arms. Elaine McGee is a teacher in a slump. Dark clouds follow her everywhere. So she's making changes. She's broken up with her lying, cheating boyfriend and quit smoking for a start. She's in a tent out in the woods making a plan to turn her life around. A weekend of fresh air and fresh starts. Then the spaceship arrived. Welcome to the Final War, Earthling. RESET Behind the matter/anti-matter barrier it is just another quantum physics experiment. Remove the barrier and it will destroy the universe. Can the most improbable team ever created save us? What should you do? Use all your vacation and call your mother. THE FINAL WAR HAS BEGUN. Get IMPROBABLES now.

Digital Innovations for a Circular Plastic Economy in Africa Muiyiwa Oyinlola, Oluwaseun Kolade, 2023-05-31 Plastic pollution is one of the biggest challenges of the twenty-first century that requires innovative and varied solutions. Focusing on sub-Saharan Africa, this book brings together interdisciplinary, multi-sectoral and multi-stakeholder perspectives exploring challenges and opportunities for utilising digital innovations to manage and

accelerate the transition to a circular plastic economy (CPE). This book is organised into three sections bringing together discussion of environmental conditions, operational dimensions and country case studies of digital transformation towards the circular plastic economy. It explores the environment for digitisation in the circular economy, bringing together perspectives from practitioners in academia, innovation, policy, civil society and government agencies. The book also highlights specific country case studies in relation to the development and implementation of different innovative ideas to drive the circular plastic economy across the three sub-Saharan African regions. Finally, the book interrogates the policy dimensions and practitioner perspectives towards a digitally enabled circular plastic economy. Written for a wide range of readers across academia, policy and practice, including researchers, students, small and medium enterprises (SMEs), digital entrepreneurs, non-governmental organisations (NGOs) and multilateral agencies, policymakers and public officials, this book offers unique insights into complex, multilayered issues relating to the production and management of plastic waste and highlights how digital innovations can drive the transition to the circular plastic economy in Africa. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.
