Home Security System Diy Pro Using Android and Ti Cc3200 Simplelink Robert Chin, 2016-08-18 This book shows you how to build and modify your own wifi camera based commercial quality portable wireless security, surveillance, and spy system appropriate for use at home, or during travel. This system uses only an Android cell phone or tablet (operating system 2.2 and above), a TI CC3200 Launchpad or ArduCAM CC3200 UNO, and a TI Camera Booster Pack with MT9D111 digital camera or just an ArduCAM MT9D111 digital camera if you are using an ArduCAM CC3200 Uno which has a built in camera interface. This book shows you how to build and modify your own alarm system that detects the motion of an intruder, calls out to an emergency phone number and sends emergency text messages using an Android cell phone or just alerts you to the intruder using an Android tablet. This alarm system is compact enough to also provide portable security for travelers using hotels and motels or you can use this as a hidden spy camera system. You can also use the security system for high quality continuous real time surveillance of your property. The live video feed is shown on the Android device. The camera can be set to only record pictures where there is movement so you can easily view any saved images to determine what kind of intruder was detected. The image data is stored locally on the Android device and does NOT require payment of storage fees as with some home security company plans. This book will also go into the technical details of the hardware set up as well as the author created Android and TI CC3200 SimpleLink software. With these technical details you will be able to customize and expand these systems to suit your specific needs for your own personal use. This book also serves as a quick start guide for people interested in learning how to program wifi communication between an Android and a TI CC3200 Simplelink device. Who is this book for? This book for people that: * Want a quick start guide to wifi communication between an Android device and a TI CC3200 Simplelink device using a camera. * Travel often and need a low cost, no contract, portable security solution when living in motels and hotels. * Want to secretly monitor a wife, husband, girlfriend, boyfriend, employee, co-worker and/or other people or even animals without their knowledge and have real time notifications sent to your cell phone. Key Feature Summary: * Shows you how to build and modify your own portable wifi camera based commercial quality wireless home or portable security, surveillance, and spy system with real time emergency notification phone call out and text message notifications to your main cell phone. * The home security system presented in this book is easy to assemble and does not require the use of breadboards or soldering. * Follow the detailed Hands on Example and install the pre-made software created by the author on your Android and TI CC3200 SimpleLink devices and get a working commercial quality video surveillance system, or an intruder alarm system up and running quickly * This book explains the author created source code for the Android and TI CC3200 SimpleLink devices so you can customize the home security system yourself for your own specific needs for personal use. Table of Contents: Chapter 1: Introducing the ArduCAM CC3200 UNO Chapter 2: TI CC3200 SimpleLink Programming Language Basics Chapter 3: The Android Controller and Wifi Communication Chapter 4: The CC3200 and Wifi Communication Chapter 5: Motion Detection Using a Camera Chapter 6: The Android Wireless Security System Design Chapter 7: The CC3200 Simplelink Wireless Security System Design Chapter 8: Hands on Example: Building an Android and ArduCAM CC3200 UNO Security System Chapter 9: Deploying your GotchaCAM Wireless Intruder Alarm and Surveillance System

Home Security System DIY Wireless IoT Using ESP32 CAM and Android Robert Chin, 2022-08-07 This book shows you how you can save tons of money by building your own low cost, maximum privacy and maximum security professional quality wireless home security system from common off the shelf parts. You can monitor the home security system using your existing Android cell phone and existing home internet connection. You will save lots of money on the home security system hardware itself as well as enjoy free email alert notifications and/or low cost cell phone text message alert notifications depending on the monitoring options you choose. Easy to understand step by step instructions will be given so that the average non-technical person will be able to assemble and operate this home security system. The main components of the security system are the ESP32 CAM, a motion sensor, an Android cell phone, and a home internet connection. In addition, custom software created by the author will be provided for the ESP32 and Android devices. Security System Main Features: * Live Real Time Local Video Monitoring using multiple ESP32 CAM units * Free Email Notifications With Images Using Your Existing Home Internet Connection * Low Cost Text Message Notifications Using Your Android Cell Phone * Easy Hardware Assembly and Simple Software Setup Procedure * Use your existing Android cell phone to control and monitor your alarm system * Modular sensor system allows you to add up to 11 ESP32 CAM units with motion sensors to the security system. * Maximum Security and Privacy Security System Basic Operation: 1. Set up your security system for operation using your Controller cell phone. 2. Activate the security system using your Controller cell phone. 3. Receive emergency text alerts on your personal cell phone if the alarm has been tripped. 4. Receive emergency emails with images of people that have tripped the sensors in or outside of your home to an email address you designate. 5. If an intruder or other emergency is confirmed then call the police as needed.

Android Apps Security Sheran Gunasekera, 2012-12-03 Android Apps Security provides guiding principles for how to best design and develop Android apps with security in mind. Application Security for the Android Platform Jeff Six,2011-12-01 With the Android platform fast becoming a target of malicious hackers, application security is crucial. This concise book provides the knowledge you need to design and implement robust, rugged, and secure apps for any Android device. You’ll learn how to identify and manage the risks inherent in your design, and work to minimize a hacker’s opportunity to compromise your app and steal user data. How is the Android platform structured to handle security? What services and tools are available to help you protect data? Up until now, no single resource has provided this vital information. With this guide, you’ll learn how to address real threats to your app, whether or not you have previous experience with security issues. Examine Android’s architecture and security model, and how it isolates the filesystem and database Learn how to use Android permissions and restricted system APIs Explore Android component types, and learn how to secure communications in a multi-tier app Use cryptographic tools to protect data stored on an Android device Secure the data transmitted from the device to other parties, including the servers that interact with your app

Home Security Systems DIY Using Android and Arduino Robert Chin,2015-12-15 This book shows you how to build your own wireless home security system using an Android cell phone or tablet, an Arduino microcontroller, an infrared motion detector, a Bluetooth adapter, and an optional ArduCAM Mini digital camera. All these items are low cost off the shelf parts that are widely available for purchase. This book shows you how to build your own home intruder alarm system that allows you to detect the motion of an intruder and then call out to an emergency phone number using an Android cell phone or just alert you to the intruder with an Android tablet. In addition, an ArduCAM Mini digital camera can be added so that pictures of the intruder can be taken when the motion detector is tripped. You can also use the book's ArduCAM Mini camera based security system for continuous surveillance of your property. The image data is stored locally on the Android device and does NOT require payment of storage fees as with some home security company plans. This book will also go into the technical details of the hardware set up as well as the author created Android and Arduino software. With these technical details you will be able to customize and expand these systems to suit your specific needs. Who is this book for? 1. Android Security Internals Nikolay Elenkov,2014-10-14 There are more than one billion Android devices in use today, each one a potential target. Unfortunately, many fundamental Android security features have been little more than a black box to all but the most elite security professionals—until now. In Android Security Internals, top Android security expert Nikolay Elenkov takes us under the hood of the Android security system. Elenkov describes Android security architecture from the bottom up, delving into the implementation of major security-related components and subsystems, like Binder IPC, permissions, cryptographic providers, and device administration. You’ll learn: —How Android permissions are declared, used, and enforced —How Android manages application packages and employs code signing to verify their authenticity —How Android implements the Java Cryptography Architecture (JCA) and Java Secure Socket Extension (JSSE) frameworks —About Android’s credential storage system and APIs, which let applications store cryptographic keys securely —About the online account management framework and how Google accounts integrate with Android —About the implementation of verified boot, disk encryption, lockscreen, and other device security features —How Android’s bootloader and recovery OS are used

to perform full system updates, and how to obtain root access With its unprecedented level of depth and detail, *Android Security Internals* is a must-have for any security-minded Android developer.
