Data-centric Regenerative Built Environment Saeed

Banihashemi, Sepideh Zarepour Sohi, 2022-03-17 This book examines the use of big data in regenerative urban environment and how data helps in functional planning and design solutions. This book is one of the first endeavors to present the data-driven methods for regenerative built environments and integrate it with the novel design solutions. It looks at four specific areas in which data is used – urban land use, transportation and traffic, environmental concerns and social issues – and draws on the theoretical literature concerning regenerative built environments to explain how the power of big data can achieve the systematic integration of urban design solutions. It then applies an in-depth case study method on Asian metropolises including Beijing and Tehran to bring the developed innovation into a research-led practical context. This book is a useful reference for anyone interested in driving sustainable regeneration of our urban environments through big data-centric design solutions.

Advances in Safety Management and Human Performance Pedro

M. Arezes, Ronald L. Boring, 2020-06-30 This book brings together studies broadly addressing human error and safety management from the perspectives of various disciplines, and shares the latest findings on ensuring employees' safety, health, and welfare at work. It combines a diverse range of disciplines – e.g. work physiology, health informatics, safety engineering, workplace design, injury prevention, and occupational psychology – and presents new strategies for safety management, including accident prevention methods such as performance testing and participatory ergonomics. It reports on cutting-edge methods and findings concerning safety-critical systems, defense, and security, and discusses advanced topics regarding human

performance, human variability, and reliability analysis; medical, driver and pilot error, as well as automation error; and cognitive modeling of human error. Further, it highlights cutting-edge applications in safety management, defense, security, transportation, process controls, and medicine. Gathering the proceedings of the AHFE 2020 International Conference on Safety Management and Human Factors and the AHFE 2020 Virtual Conference on Human Error, Reliability, Resilience, and Performance, held on July 16–20, 2020, USA, the book offers an extensive, timely, and multidisciplinary guide for researchers and practitioners dealing with safety management and human error.

Advances in Ergonomic Design of Systems, Products and Processes Barbara Deml, Patricia Stock, Ralph Bruder, Christopher Marc Schlick, 2016-02-15 These proceedings summarize the best papers in each research area represented at the 2015 Annual Meeting of the German Gesellschaft für Arbeitswissenschaft, held at Karlsruhe Institute of Technology (KIT) from February 26-28. The meeting featured more than 160 presentations and 30 posters reflecting the diversity of subject matter in the field of human and industrial engineering.

Computer Security – ESORICS 2017 Simon N. Foley, Dieter Gollmann, Einar Snekkenes, 2017-09-01 The two-volume set, LNCS 10492 and LNCS 10493 constitutes the refereed proceedings of the 22nd European Symposium on Research in Computer Security, ESORICS 2017, held in Oslo, Norway, in September 2017. The 54 revised full papers presented were carefully reviewed and selected from 338 submissions. The papers address issues such as data protection; security protocols; systems; web and network security; privacy; threat modeling and detection; information flow; and security

in emerging applications such as cryptocurrencies, the Internet of Things and automotive.

Imaging Life Lawrence R. Griffing,2023-04-25 Hands-on resource to understand and successfully process biological image data In *Imaging Life: Image Acquisition and Analysis in Biology and Medicine*, distinguished biologist Dr. Lawrence R. Griffing delivers a comprehensive and accessible exploration of scientific imaging, including but not limited to the different scientific imaging technologies, image processing, and analysis. The author discusses technical features, challenges, and solutions of the various imaging modalities to obtain the best possible image. Divided into three sections, the book opens with the basics such as the various image media, their representation and evaluation. It explains in exceptional detail pre- and postprocessing of an image. The last section concludes with common microscopic and biomedical imaging modalities in light of technical limitations and solutions to achieve the best possible image acquisition of the specimen. *Imaging Life: Image Acquisition and Analysis in Biology and Medicine* is written specifically for readers with limited mathematical and programming backgrounds and

includes tutorials on image processing in relevant chapters. It also contains exercises in the use of popular, open-source software. A thorough introduction to imaging methods, technical features, challenges, and solutions to successfully capture biological images Offers tutorials on image processing using open-source software in relevant chapter Discusses details of acquisition needs and image media covering pixels, pixel values, contrast, tonal range, and image formats In-depth presentation of microscopic and biomedical imaging modalities Perfect for professionals and students in the biological sciences and engineering, *Imaging Life: Image Acquisition and Analysis in Biology and Medicine* is an ideal resource for research labs, biotech companies, and equipment vendors.
