RISE OF THE HUMAN ANDROIDS Malcolm P. Chester, 2014 In this sequel to the Rise of the Human Androids, lizard like aliens called the Sharptors have perfected high-energy shields for hyperspace travel and begun exploring the galaxy. Meanwhile, James decides to not run for re-election for President of Mars. He plans instead to search the galaxy for old ones technology in a heavy cruiser with a supergun named after his wife. His wife and two children will join him on this journey. Susan, Mars' Secretary of State and former President of the U.S. will run for James' spot and James' adopted human android daughter Martha will run for vice-president. James' actions are motivated by the re-emergence of Ergone as the Marshall of the powerful and independent Altararian military. James knows Ergone wants to avenge his loss to Mars and Earth in their last war. James fears the Altararians with their vastly superior forces will crush Mars if he can't find advanced technology to stop them. In a chance meeting, James encounters the Sharptors while looking at a promising planet for exploration. A fight breaks out. James wins the encounter but the Sharptor warship escapes. Still, a plan begins to emerge in James' mind of how to use the aggressive new aliens against the Altararians. Meanwhile James and his associates explore an old ones site on their promising new earth like world Sisney 1. They must battle a super aggressive mammal the Ratang and insect the Botos, which have stripped Sisney 1 of almost all of its land animal life as they explore the site. They find new technology at the site, which they plan to use against the Altararians. Meanwhile a secret organization called the Committee, which has controlled many economic events on Earth, finds it difficult to control Mars and its allied planets. As a result, to make themselves relevant in the changing world around them, they join with bigoted groups on Mars and Ganymede and in a secret deal with the Altararians to sabotage Mars efforts to arm itself against the expected Altararian invasion. Many characters on Earth, Mars and Ganymede battle this super secret group in their efforts to prepare Mars for the Altararian invasion. All these forces clash as Mars struggles to survive its confrontation with the Altararians and preserve its Utopian World of human androids and human immigrants.

Digital Wars Charles Arthur, 2012-03-03 - Which of Apple, Google and Microsoft had an office with a drawer of broken dreams - and what (real) objects lay inside it? - When did Microsoft have the chance to catch Google in making money from search - and who vetoed it? - Why did Google test 40 shades of blue on its users? - How long did outside developers wait before asking to write apps for Apple's iPhone after Steve Jobs announced it? - Who said that Microsoft should have its own music player - and why did it fail? The answers, and much more, can be found in this new book by Charles Arthur, technology editor of The Guardian newspaper of London. Digital Wars starts in 1998, when the internet and computing business was about to be upended - by an antitrust case, a tiny start-up and a former giant rebuilding itself. It looks at what are now the three best-known tech companies, and through the voices of former and current staff examines their different strategies to try to win the battle to control the exploding network connecting the world. Microsoft was a giant - soon to become the highest-valued company in the world, while Apple was a minnow and Google just a startup. By February 10 2012, Apple was worth more (\$462bn) than

both Microsoft (\$258bn) and Google (\$198bn) combined. The chance had come from tumultuous battles between the three... To win their battles... Apple used design, the vertical model of controlling the hardware and software, and a relentless focus on the customer to the exclusion of others; Microsoft depended on the high quality of its employees' programming skills and its monopolies in software to try to move into new markets - such as search and music; Google focused on being quick, efficient, and using the power of data analysis - not human taste - to make decisions and get ahead of would-be rivals. With exclusive information from interviews with people such as Don Norman, former VP of Apple Computer and Pieter Knook, former SVP of the Mobile Communications Business at Microsoft, and many more current and former staff of the three companies - including one person who has worked for all three - Arthur also addresses: - what the inventors of the hard drive used in the iPod thought it would really be used for - how Apple transformed the smartphone market - which of Android or Apple that forced Microsoft to abandon Windows Mobile - what happened to Microsoft's tablet plans - and much more.

Digital Wars Charles Arthur, 2014-05-03 The first time that Apple, Google and Microsoft found themselves sharing the same digital space was 1998. They were radically different companies and they would subsequently fight a series of pitched battles for control of different parts of the digital landscape. They could not know of the battles to come. But they would be world-changing. This new edition of Digital Wars looks at each of these battles in turn. Accessible and comprehensive, it analyses the very different cultures of the three companies and assesses exactly who are the victors on each front. Thoroughly updated to include information on the latest developments and rising competitors Samsung, it also include a completely new chapter on how China moved from being the assembly plant for music players and smartphones, to becoming the world's biggest smartphone business.

Patent Wars Thomas F. Cotter, 2018-06-01 Patents are ubiquitous in contemporary life. Practically everything we use incorporates one or more patented inventions, and recent years have witnessed epic disputes over such matters as the patenting of human genes, the control of smartphone design and technology, the marketing of patented drugs, and the conduct of patent trolls accused of generating revenue from nuisance litigation. But what exactly is a patent? Why do governments grant them? Can patents simultaneously encourage new invention, while limiting monopoly

and other abuses? In *Patent Wars*, Thomas Cotter, one of America's leading patent law scholars, offers an accessible, lively, and up-to-date examination of the current state of patent law, showing how patents affect everything from the food we eat to the cars we drive to the devices that entertain and inform us. Beginning with a general overview of patent law and litigation, the book addresses such issues as the patentability of genes, medical procedures, software, and business methods; the impact of drug patents and international treaties on the price of health care; trolls; and the smartphone wars. Taking into account both the benefits and costs that patents impose on society, Cotter highlights the key issues in current debates and explores what still remains unknown about the effect of patents on innovation. An essential one-volume analysis of the topic, *Patent Wars* explains why patent laws exist in the first place and how we can make the system better.

Throne Wars Pravin Shekar, 2021-02-11 WAR, HISTORY and MARKETING STRATEGIES! THRONE WARS is a fictionalized presentation inspired by the lives of the Chola and Pandya kings, who ruled vast parts of Southern India many centuries ago. The history of India is replete with colourful stories involving ambitious rulers, wily court strategists, brave commanders and guerilla warfare, all of which make for compelling reading even today. Not just that. They carry many important, timeless marketing lessons for business leaders. This book is a collection of a few such stories with a few such lessons, which will be useful to corporate leaders, entrepreneurs and marketers. It is for them that I have written this book. While I have taken the stories from the history of South India (of which I am a tiny part), I have drawn inspiration for some of the strategies and learnings from Sun Tzu's ancient classic, "The Art of War". The interpretation and learnings mentioned in each chapter are those that I strive to implement for my business and those of my clients. I believe they will help you in your business, too.
