### **Discrete Cosine Transform, Second Edition**

Humberto Ochoa-Dominguez, K. R. Rao, 2019-04-18 Many new DCT-like transforms have been proposed since

the first edition of this book. For example, the integer DCT that yields integer transform coefficients, the directional DCT to take advantage of several directions of the image and the steerable DCT. The advent of higher dimensional frames such as UHDTV and 4K-TV demand for small and large transform blocks to encode small or large similar areas respectively in an efficient way. Therefore, a new updated book on DCT, adapted to the modern days, considering the new advances in this area and targeted for students, researchers and the industry is a necessity.

Panduan Menggunakan Media Sosial untuk Generasi Emas Milenial Mohamad Fadhilah Zein, 2019-03-15  
Perkembangan dunia maya tidak mungkin dibendung dan semakin sulit untuk ditahan lajunya. Gelombang itu menghantarkan siapa pun yang dapat memanfaatkannya dengan baik, namun tidak jarang menghancurkan sosok individu, organisasi, lembaga pemerintahan bahkan negara. Banyak khalayak yang memanfaatkan era kebebasan ini secara tidak bertanggung jawab sehingga penyalahgunaan media internet terjadi di level personal, sosial,

nasional bahkan regional. Banyak contoh yang terjadi di dalam negeri, misalnya masa-masa pemilu dan tahun-tahun politik. Massa berlomba membuat berbagai propaganda melalui website, blog, twitter, facebook dan lainnya untuk mengirimkan agitasi, hoax dan propaganda yang ujungnya bisa saja menghancurkan persatuan dan kesatuan bangsa. Informasi yang disampaikan pun bias dan cenderung fitnah mengadu domba, mengakibatkan sampah-sampah informasi bertebaran di jagad virtual. Akibatnya, tidak jarang pengguna medsos dan khalayak awam beranggapan agitasi sesat itu sebagai sebuah kebenaran. Para pengguna medsos kemudian beramai-ramai “membunuh” karakter orang-orang tertentu atau lembaga-lembaga tertentu. Inilah yang disebut sebagai pembunuhan karakter (character assassination). Fenomena yang terjadi di Indonesia seperti yang dijelaskan di atas menunjukkan bahwa netizen di dalam negeri, masih gagap dalam menghadapi perkembangan media digital. Di satu sisi, mereka mampu mengoperasionalkan perkembangan piranti keras (hardware) dan piranti lunak (software), namun di sisi lain banyak rakyat Indonesia yang belum memahami tentang konsekuensi dari keberadaan media digital dalam kehidupan sehari. Hingga saat ini, masih banyak masyarakat yang belum memanfaatkan media internet sebagai sarana produktif untuk mendapatkan, menyebarluaskan dan memasok informasi yang benar dan bermanfaat bagi kehidupan manusia. Meski berbagai upaya telah dilakukan, Pemerintah, ormas keagamaan, akademisi hingga LSM untuk membangkitkan literasi media digital di kalangan khalayak, namun untuk mengurangi berita-berita

sampah masih perlu perjuangan berat dan perjalanan terjal yang panjang. Harus diakui, masyarakat Indonesia pada umumnya telah sanggup mengikuti perkembangan literasi digital. Namun, kesadaran untuk melakukan cek, ricek dan kroscek terhadap informasi yang didapat, masih sangat lemah. Pengguna internet tidak mengenal usia, mulai dari usia anak hingga manula.

### Infusing Technology in the 6-12 Classroom

Valerie Morrison, Stephanie Novak, Tim Vanderwerff, 2022-08-24 6-12 teachers will discover how to integrate the tech requirements found within today’s academic standards into their everyday curriculum. Perhaps your district provides current technology development for staff on a regular basis and has instructional coaches to help teachers infuse technology into their curriculum to meet various academic standards. But in reality, most districts don’t have this kind of support. In this book (the second in a two-book series), you’ll learn how to shift your instructional practice and leverage technology to meet today’s curriculum education standards for grades 6-12. This book doesn’t cover every 6-12 national standard, but identifies the standards with a technology component and provides resources and lessons to help you teach those standards effectively. This book includes: • Classroom-

tested lesson ideas in English language arts, math, science and social studies mapped to ISTE and tech-related standards to support college- and career-readiness. • Lists of technology-embedded college- and career-readiness standards for each grade level, along with practical ideas and up-to-date resources (apps, software and websites) that can be used in meeting these standards. • Suggestions for addressing roadblocks to incorporating technology in the classroom. • Ways to incorporate staff development and parental support at the school level. • Access to a companion website with information on the tools referenced in the text. With the implementation of these strategies, you'll help your students become self-directed and critical readers, writers and thinkers so they're better prepared for the future!

**Shadows of Time** Joseph J. Reinemann, 2006-04 The first book in the award-winning Shadows of Time series introduces John Roley, Tim Jackson, and 2 intelligent computer prototypes known as ISAC-9. During their vacation, they are surprised to find that they have been proclaimed to be the guardians of time, a confusing situation since none of them had even been aware they were up for consideration. Before they have a chance to fully absorb this information (or decline the offer) they are thrown back in time to a point near the end of Mayan civilization. Immediately John is captured by Mayans, Tim is rescued by a group of people whose technology has no business existing anywhere, and both discover that real history is considerably more messed up than anyone could have

imagined.

Virtual Reality in Engineering Kevin Warwick, John Gray, J. O. Gray, David Roberts, 1993 An introduction to virtual reality as it can be applied within the engineering profession, in such areas as the rapid prototyping of new products, simulation and systems management. The text combines tutorials with material which demonstrates the existing technology available.

Tell Me a Story Roger C. Schank, 1995 In this study by an expert on learning and computers, the author argues that artificial intelligence must be based on real human intelligence.

*Sanctioning Modernism* Timothy Parker, Monica Penick, Vladimir Kulic, 2014-06-01 In the decades following World War II, modern architecture spread around the globe alongside increased modernization, urbanization, and postwar reconstruction—and it eventually won widespread acceptance. But as the limitations of conventional conceptions of modernism became apparent, modern architecture has come under increasing criticism. In this collection of essays, experienced and emerging scholars take a fresh look at postwar modern architecture by asking what it meant to be modern, what role modern architecture played in constructing modern identities, and who sanctioned (or was sanctioned by) modernism in architecture. This volume presents focused case studies of modern architecture in three realms—political, religious, and domestic—that address our very essence as human beings. Several essays explore developments in Czechoslovakia, Romania, and Yugoslavia and document a modernist design culture

that crossed political barriers, such as the Iron Curtain, more readily than previously imagined. Other essays investigate various efforts to reconcile the concerns of modernist architects with the traditions of the Roman Catholic Church and other Christian institutions. And a final group of essays looks at postwar homebuilding in the United States and demonstrates how malleable and contested the image of the American home was in the mid-twentieth century. These inquiries show the limits of canonical views of modern architecture and reveal instead how civic institutions, ecclesiastical traditions, individual consumers, and others sought to sanction the forms and ideas of modern architecture in the service of their respective claims or desires to be modern.

Just-in-time Teaching Gregor M. Novak, 1999 The authors explain how a group of higher education schools used just-in-time teaching (JiTT) methods to increase interactivity for the physics student. By enhancing courses with multimedia Web activities and electronic communications, the classroom environment allowed less dependence on lecture and more rapid responses to students' problems.

Digital Storytelling in the Classroom Jason Ohler, 2008 Jason Ohler, well-known education technology teacher, writer, keynoter, futurist, and Apple Distinguished Educator, guides educators on how to effectively bring digital storytelling into the classroom. The author links digital storytelling to improving traditional, digital, and media literacy and offers teachers ways to: o

Combine curriculum content and storytelling o  
Blend multiple literacies within the context of  
digital storytelling o Plan for creating and  
executing digital stories.

Literacies Colin Lankshear, Michele Knobel, 2011  
This book presents sixteen essays in the new  
literacy studies tradition, written during the  
period 1985-2010. It covers a diverse range of  
themes with a particular emphasis on topics of  
cultural, political and historical interest. The  
collection includes both previously published and  
unpublished works, and is organized in four  
sections. Topics addressed in Part 1 include  
functional literacy, the politics of literacy in  
Nicaragua during the Sandinista period  
(1979-1990), the rise of the working class press  
in Britain, and reader response and the teacher as  
meaning-maker. Part 2 discusses critical literacy  
and active citizenship, literacy and empowerment,  
language and the new capitalism, varying ways of  
using computers in and out of school, and the way  
a low achieving student challenges conventional  
notions of literacy failure. Part 3 addresses the  
new literacy studies and the study of new  
literacies, the theory and practice of attention  
economics, and early developments in the use of  
ratings within online communities and social  
practices. The final part of the book takes up the  
theme of researching new literacies, discusses  
practices of digital remix, and provides a case  
study of becoming research literate within a  
context of DIY media creation.

Worlds Within Worlds Isaac Asimov, 1980 For the  
first time in history, humans are learning to

produce and control nuclear energy -- the energy that, in the form of sunlight, has served humankind for its entire existence. With fossil fuel supplies dwindling, concerned citizens, no matter how scant their scientific knowledge, must understand this enormous force. Book jacket.
